PROTECTION

Protect the front end of your vehicle with a winch-compatible ARB bull bar designed to give you the protection and confidence to explore any terrain.

Summit MKII Bull Bar

Incorporates ARB's renowned multi-fold upswept and tapered wing design for optimum strength and approach angle. It features 60.3-millimetre outer frames and centre cross tube, high lift jack, aerial, light and winch compatibility and is fully compatible with the vehicle's original equipment and safety features.

Summit Sahara MKII Bull Bar

Sharing the core design elements with the Summit MKII, the Sahara series of bars also features either a polished alloy tube or a matte black tube with or without an LED light bar recessed into the top hoop further underlining ARB's commitment to fabrication excellence.

ARB SpartanBar

Using an impact-absorbing, resilient and incredibly durable polyethylene material, the SpartanBar features cutting-edge design and engineering that creates a bull bar offering unsurpassed levels of safety for both driver and pedestrian.

ARB StealthBar

The StealthBar provides an alternative tough aesthetic appearance without compromising on vehicle protection, at approximately 30% less weight than an ARB SpartanBar. Designed using the same cutting-edge polyethylene material and manufacturing process, these bars are now the only bull bar approved for use in Europe.

UNDER VEHICLE PROTECTION

When traversing over roads less travelled, the underbody of your 4WD is one of the areas most susceptible to damage. Protect your vehicle from dangerous rocks, ruts or logs with ARB's range of Under Vehicle Protection.

UVP (Under Vehicle Protection)

Providing an unrivalled safeguard for the underside of your vehicle, ARB's UVP is laser cut, press formed and folded to provide superior strength. Designed to the specifications of the vehicle, it minimises the risk of damage to most vital components of the vehicle drivetrain.

UVA (Under Vehicle Armour)

Under Vehicle Armour is made from durable and impact-resistant cross-linked polymer. ARB's UVA weighs a fraction of any steel aftermarket alternatives, gives greater coverage, is easy to install and remove for vehicle servicing, and is compatible with the OE bumper, as well as bull bars, and the recovery points.

SIDE PROTECTION

Designed to protect the doors and side sills of your vehicle, you won't be afraid when venturing off road with ARB Summit Side Rails and Steps.

Summit Side Rails and Steps

ARB side protection equipment acts as a shield for your vehicle's vulnerable side panels, protecting them from rocks and road debris frequently encountered during remote area travel. Made from 60.3-millimetre tubular steel and featuring an anodised aluminium tread plate.

Side Steps

ARB Side Steps provide easier access and further protection against on road and off road debris and obstacles.

RECOVERY

ARB's Recovery Points are your best friend off road, providing a safer connection point for all forms of winching or snatch recoveries while exploring 4WD tracks.

Recovery Points (Front Forged + Rear)

The ARB Recovery Point slot features a chamfered edge specifically designed to suit both soft and steel shackles. Developed to fit the vehicle with UVP, UVA or OE protection, each ARB Recovery Point is rated at 8,000 kilograms up to the maximum turn angle of the front wheels. Both left- and right-hand Recovery Points have been precision robot-welded and developed to allow for different set-ups of recovery equipment to suit each individual situation. As each point is rated at eight tonnes, the use of bridle straps is not required. Front Recovery Points are a forged construction.

WARN VR Evo 10-S Winch

WARN is known for being rugged, durable and reliable and when it comes to winching, these qualities are very important. The WARN VR Evo Winch offers fast line speeds with lower amp draw and is made with a bold tactical look giving your vehicle an aggressive style with premium recovery equipment. This winch features a synthetic rope and can pull up to 10,000 pounds.

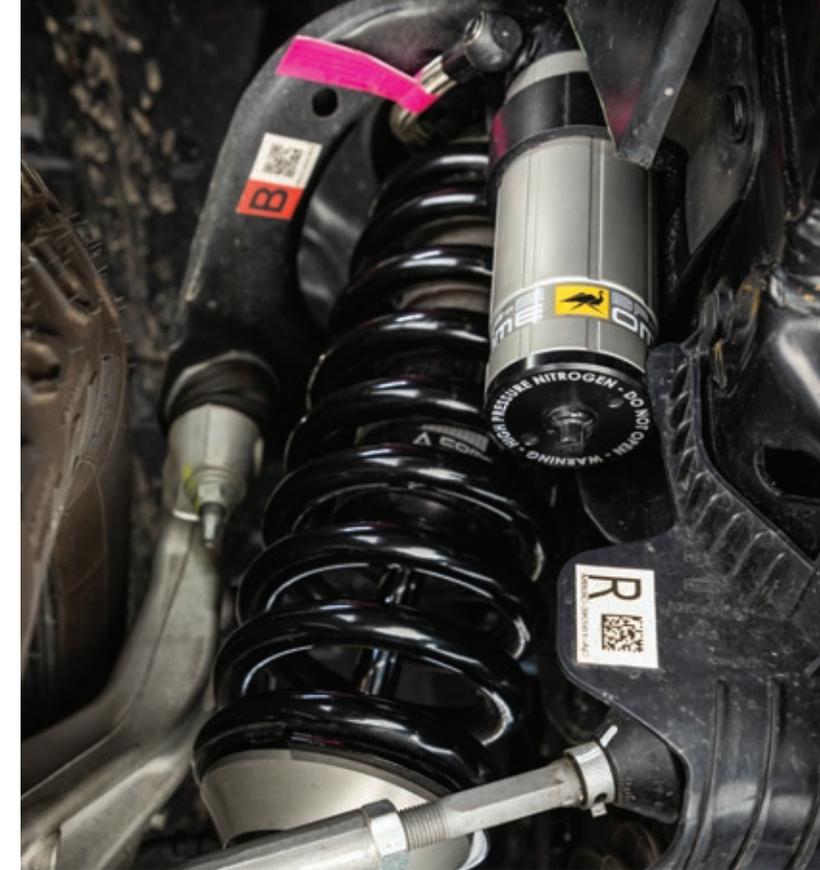

Bushranger COVERT 10,000lb Winch

A premium design with a stylistic and discreet look that seamlessly blends into 4x4 vehicles for a covert appearance. Engineered and proven in Australia, this winch is built to withstand the harshest environments using the highest quality components and rigorous testing methods, ensuring reliability and longevity.

SUSPENSION

Get greater ride comfort and handling across all terrains with an Old Man Emu suspension system from ARB.

BP-51

Whether it's extended trips, off road 4WDing or tackling terrain, Old Man Emu BP-51 shock absorbers by ARB provide unrivalled performance, setting the benchmark for all driving conditions, thanks to their fully adjustable internal bypass system. The result is the holy grail of suspension performance: the ultimate comfort and control when you need it.

Nitrocharger

Old Man Emu's world-renowned Nitrocharger shock absorber has stood the test of time, constantly standing up to the conditions and demands of vehicle owners. The Nitrocharger range utilises significant advances in key componentry and the latest in valving technology to provide tremendous improvements in ride, comfort and handling over all terrains.

GVM Upgrade

A GVM upgrade allows for your vehicle to safely carry more than the maximum weight, it ensures that your vehicle is GVM legal in all states of Australia. Whether your Next-Generation Ford Everest is carrying tools of the trade or packing up the 4WD for a year-long trip.

STORAGE

Whether it be for a quick weekend getaway or long-haul, interstate adventure, maximise the versatility of your vehicle's cargo space with an ARB Modular Drawer System. Configure to suit your needs while taking cargo and equipment organisation to a whole new level.

ARB Modular Drawer System

With the creation of tailor-made trim panels, ARB has set the perfect aperture for the deployment of a fully integrated drawer suite to fit seamlessly into the Next-Generation Ford Everest. For added practicality, ARB has incorporated accessory switch bezel cut-outs, ideal for use with additional install kits, all while allowing for fitment with or without the tub liner.

BASE Rack

Ultra sleek, boasting a super low mounting profile and lightweight design, the BASE Rack provides unmatched simplicity, flexibility and personalisation for the Next-Generation Ford Everest with a range of accessories for full customisation. The BASE Rack is available for fitment on the cab or the canopy of the vehicle.

Thule WingBar Evo

The Thule WingBar Evo is an aerodynamic roof rack system for an exceptionally quiet ride. Its large loading area makes it compatible with various accessories and carriers.

Available in black or aluminium, the 135-centimetre roof bars are suitable for raised rail models.

BASE Rack Roller

Loading pieces of timber and other heavy items onto your BASE Rack will be much easier with this useful accessory. Available in two sizes to suit the standard and narrow racks and can be attached to any section of dovetail around the outer perimeter of the rack.

LIGHTING

Shine the light on the road ahead with a selection of driving lights to suit your driving style. Choose from a variety of options such as spot, flood or combination lights to suit your ideal set-up.

ARB Intensity IQ

The unique four-optic design of the Intensity IQ lights provides virtually unlimited choice of light beams to suit any road conditions. Protected by a virtually indestructible polycarbonate lens and a die-cast aluminium body with incorporated ducts to allow for air flow to maximise cooling.

Preset eight configurations on the controller, which can instantly be changed at the click of a button, or via LINX or an app.

ARB Intensity V2

Featuring 21 or 32 LEDs in Spot or Flood beam for the best use of light for your requirements. Protected against radio frequency and electromagnetic interference and has a virtually indestructible polycarbonate lens.

ARB Intensity Solis

The ARB Intensity Solis lights have 21 or 36 OSRAM LEDs and a unique dimming feature allowing five preset outputs to alter the intensity of light. The same indestructible polycarbonate lens on the V2, however these have interchangeable red and black bezels making the Intensity Solis lights suit your aesthetic requirements.

Summit Sahara Tube Light

The integrated 20-inch light bar on the tube of the Summit Sahara Bar greatly improves visibility and durability. Featuring over and under voltage protection, thermal management, protection against radio frequency and electromagnetic interference and reverse polarity protection.

BASE Rack Lighting

The BASE Rack Lighting not only complements the sleek design and mounting system of the BASE Rack but provides instant lighting wherever it is needed most.

The ARB BASE Rack Light Bar and BASE Rack Auxiliary Light both have a unique reflector design to provide optimum distance and width.

Bushranger Night Hawk VLI

Built with high output OSRAM/CREE LEDs, intelligent onboard monitoring of the LED temperatures and built-in transistor switch to alleviate complication wiring. The unique shape and low-profile design of these lights allows for diverse fitment to suit most customers.

CAMPING

Take your camping experience to the next level with a range of products designed to improve your trip. From keeping food fresh and drinks cold to getting some shade from the sun, these products are designed with campers in mind.

Elements Fridge Freezer

The Elements Fridge Freezer has a stainless steel exterior with anodised aluminium latches and protected placement of electrical connections making it capable of withstanding any weather conditions. The lid has a gas strut to allow two-handed access to the contents. The touchpad features temperature control, low voltage cut-out and security lock. When the lid's open, you have full use of the touchpad but when it's closed, the adjustment is hidden to prevent unwanted changes. The lid can also be locked with a unique user-selected locking code.

ZERO Fridge Freezer

The ZERO Fridge Freezer features front and rear DC inlets providing more options when mounting, a front USB port for charging devices, a tough steel outer casing, carry handles with integrated tie-down points, wireless monitoring and control via a Bluetooth app, anti-condensation technology, an internal LED light for convenient access and a side-opening reversible lid.

Available in 36L, 44L, 60L, 69L & 96L.

Classic Series II Fridge Freezer

Keeping your food fresh and your drinks cold no matter where you are, the Classic Series II range of fridge freezers includes an advanced electronic control system now with complete mobile control via the ARB Fridge Freezer app. Additional new features include a dimmable backlit touchpad for easy night time operation and a 12V power input readout for simple voltage monitoring on the display.

Available in 35L, 47L, 60L and 78L.

Esperance Rooftop Tent

ARB's first ever hard shell tent, the Esperance Rooftop Tent is a super lightweight, slimline and contemporary looking rooftop tent. It is quick and effortless both to set up and to pack down.

Flinders Rooftop Tent

The Flinders Rooftop Tent is compact without compromising on camping comfort with a quick set-up and pack-up. The ARB Flinders Rooftop Tent features three windows, door entry, skylight and an all-weather ventilation port ensuring you are ready for any destination and climate.

Simpson Rooftop Tent

The ARB Simpson III Rooftop Tent delivers in both ease and convenience when traveling while protecting you from the elements. With the ability to unfold in minutes aiding a faster set-up and pack-down time frame. With the extra feature of an annexe tent included, it provides you that extra level of privacy.

ARB Awnings

ARB Awnings are made from 300gsm PU-coated poly cotton rip stop canvas that is waterproof and UV protected. They have anodised 25-millimetre aluminium poles with nylon cuff joints and anti-wear points. Pegs and reflective guy ropes are included. Awnings come in a grey PVC case and can come with or without LED lighting.

The ARB Awning also has the additional option of coming in an aluminium case, which provides a sleek, stylish look while protecting your awning. This is available in either black or silver.

Slide Kitchen

Featuring a three-burner stove, sink and ample bench space, ARB's fully freestanding Slide Kitchen can be set up in as little as 15 seconds, offering practicality for any tourer. Beyond being one of the most practical features for any 4WD, the Slide Kitchen also boasts an innovative user-friendly design.

AIR SYSTEMS + LOCKER

ARB's world-class Air Locker systems will take you anywhere you choose to go, coupled with our globally used, best-in-class air compressors.

Air Locker

ARB Air Locker locking differentials allow you to tackle the toughest terrain with confidence. As the world's premium selectable locker, and the locker of choice for gruelling 4WDers and rock racers throughout the world, ARB Air Lockers will keep you moving regardless of the conditions. ARB Air Locker differentials directly replace the front OE differential of the Next-Generation Ford Everest.

Single Air Compressor Kit

The ARB Single Air Compressor has a class-leading flow rate and is constructed of lightweight, high-grade materials that allow for fast tyre inflation, Air Locker activation and a range of other functions. Also available is an engineered bracket system to smoothly integrate an ARB Air Compressor without compromising on space. Designed to be discreetly mounted in the right rear fender of the Next-Generation Ford Everest, the ARB Single Air Compressor Kit utilises minimal space of this cavity while leaving room for your air accessories such as gauges, hoses and inflators.

Air Tank

Ideal for use with ARB's on-board compressors, the four-litre Aluminium Air Tank delivers high-volume air output suitable for rapid tyre inflation and running most powered air tools. Featuring forged aluminium end caps, it offers flexible mounting with four 1/4NPT ports with two JIC-4 male fittings to suit different vehicle set-ups.

Portable Twin Compressor

ARB also offers a portable twin compressor including a six-metre air hose, battery clamps, inflation kit and a durable carry case. Providing you with twice the flow and twice the speed at all times. This portable twin compressor is perfect for serious 4WDers, vehicles with larger than average tyre size or for competition purposes.

ELECTRICAL

Adding additional lighting options such as driving or auxiliary lights will require electrical components to connect and control them. ARB's range of specific solutions is there to help.

Wiring Loom (Everest-Specific Solis Driving Light Harness)

For the Next-Generation Ford Everest, ARB has designed a plug-and-play wiring harness to connect into ARB Solis and Intensity driving lights, offering seamless integration into the ARB bull bar and electrical system.

LINX Vehicle Accessory Interface

LINX is a unique modern controller that declutters the dashboard and centralises the command of vehicle accessories by replacing classic switches, gauges and monitors with one sleek and smart driver interface. Built on an expandable platform, LINX will continue to evolve your on and off road driving experience both now and into the future.

LINX A-Pillar Bracket

To complement ARB's LINX Vehicle Accessory Interface, the LINX A-Pillar Bracket mounts the LINX display screen in a safe and easy-to-reach location specific to the Next-Generation Ford Everest. Utilising the LINX mount, the display can be orientated to the desired position so each time the display is returned to the vehicle, it's always in the optimal position.

Auxiliary Battery Kit

Offering an independent power source for items such as fridges and camp lights, an auxiliary battery system offers peace of mind and powers additional accessories without the risk of flattening the main battery. The Auxiliary Battery Kit is designed to be fitted in the engine bay and is supplied with a battery tray, mounting hardware, plug-and-play wiring loom and a REDARC BCDC charger.

OFF ROAD ESSENTIALS

Always take the scenic route with a range of products to help you stay off road, for longer.

Frontier Long-Range Diesel Tank

Made in Australia from durable and impact-resistant polymer material that's designed to flex with the vehicle's chassis, the ARB Frontier Long-Range Diesel Tank provides a significant upgrade to the Next-Generation Ford Everest OE fuel tank, allowing 140 litres to be carried.

Safari V-Spec Snorkel

Utilising Safari's traditional design concepts and incorporating the very latest in scanning and CAD design software, Safari's V-Spec Snorkel for the Next-Generation Ford Everest is ready to perform in the most extreme environments, protecting the vehicle's engine against water, dust and snow ingress while delivering cool, clean air.

INTERIOR PROTECTION

Providing unbelievable protect against damage from the elements such as sun, dirt, water and debris.

Sun Shade

ARB Sun Shades are specific to the Ford Everest, meaning fuss-free protection from the sun that does not require suction caps or straps. Simple to set up and simple to store with an included storage roll bag.

Floor Mat

Expertly designed to catch and hold debris, ARB Floor Mats are a waterproof solution that includes secure floor placement and a snug fit to cover all areas of your OE footwells and even utilise the vehicle's retention clips where applicable.

Seat Covers

ARB Seat Covers are designed to last. These covers are machine washable and UV protected for everyday wear, whilst also being compatible with the vehicle's seat heating and airbags (ADR compliant) to ensure normal seat functionality.

Available in both neoprene and canvas materials, these vehicle-specific covers will fit snug to your seats and protect them from spills and any debris you bring in.
