BP-51 shock absorbers are the pinnacle of comfort and durability, embodying Old Man Emu's renowned quality. Whether tackling high-speed terrains or navigating a washed-out mountain track, BP-51 shock absorbers deliver exceptional performance.

Advanced bypass technology allowing for precise control over the damping rate, improving overall vehicle handling and stability

Adjustability of the bypass settings enabling users to fine-tune their suspension set-up to specific driving conditions

Extensive dyno, real world and destructive testing to ensure they are built to perform on and off road

Quality aluminium material for increased heat dissipation and corrosion resistance
