PROTECTION

Protect the front end of your vehicle with a winch-compatible ARB bull bar designed to give you the protection and confidence to explore any terrain.

Summit MKII Bull Bar

The ARB Summit MKII Bull Bar has been designed with the most innovative technology yet, with complete integration to the suite of advanced driver assist safety technology available on modern vehicles. The design has been significantly updated to include a plug-and-play sequential indicator, clearance light, daytime running light and fog light within one complete unit for an integrated approach. Adding to the sleek design, the Summit MKII Bull Bar has robot welds on the front face for a premium finish.

Summit Sahara MKII Bull Bar

The ARB Summit Sahara MKII Bull Bar offers sleek yet rigid styling without sacrificing practicality. The Sahara Bar also features either a polished alloy tube or a textured black tube with an LED light bar recessed into the top hoop, further underlining ARB's commitment to fabrication excellence. The design has been significantly updated to include a plug-and-play sequential indicator, clearance light, daytime running light and fog light within one complete unit for an integrated approach.

ARB SpartanBar

The ARB SpartanBar puts safety first with an advanced front protection system that absorbs impact to reduce the risk of occupant injury and help keep vehicles on the road. Made from durable materials, it absorbs impact to dissipate energy and can return to shape, maintaining protection without compromising vehicle integrity. Its hollow construction and lightweight design also makes it ideal for GVM-conscious owners seeking maximum safety with minimal added weight.

ARB StealthBar

The ARB StealthBar is engineered specifically as a durable, lightweight protection system. Designed and manufactured in Australia, its core function is to absorb impact in the event of a collision, protecting occupants and vital components while remaining compatible with vehicle safety systems such as air bags, parking sensors and radar. Constructed from tough, impact-resistant polymer, the StealthBar blends seamlessly with the vehicle's styling and provides a reliable platform for mounting a winch, driving lights, antennas and other accessories.

Zenith Bull Bar

Sleek and functional, the Zenith Bull Bar is built for off road performance with minimal front overhang, upswept wings for maximum clearance, an integrated bash plate, dual eight-tonne Recovery Points and winch cradle. It retains factory functions and safety systems while allowing optional compact driving lights.

UNDER VEHICLE PROTECTION

When traversing over roads less travelled, the underbody of your 4WD is one of the areas most susceptible to damage. Protect your vehicle from dangerous rocks, ruts or logs with ARB's range of Under Vehicle Protection (UVP).

Under Vehicle Protection (UVP)

Providing an unrivalled safeguard for the underside of your vehicle, ARB's UVP is laser cut, press formed and folded to provide superior strength. Designed to the specifications of the vehicle, it minimises the risk of damage to most vital components of the vehicle's drivetrain.

Under Vehicle Armour (UVA)

Under Vehicle Armour (UVA) is made from durable and impact-resistant cross-linked polymer. ARB's UVA weighs a fraction of any steel aftermarket alternatives, gives greater coverage, is easy to install and remove for vehicle servicing, and is compatible with the OE bumper, as well as bull bars, and the Recovery Points.

SIDE PROTECTION

Designed to protect your vehicle's doors and side sills, side protection gives you the confidence to venture off road, while rear protection ensures durability on steep, rocky terrain.

Summit Side Rails & Steps

ARB Summit Side Rails and Steps act as a shield for your vehicle's vulnerable side panels, protecting against rocks and road debris frequently encountered during remote area travel. Made from 60.3-millimetre tubular steel and featuring an anodised aluminium tread plate, the protection is available as rail and step or step on its own.

Side Steps

ARB Side Steps allow for easier access in and out of your vehicle, all while providing further protection against obstacles and debris when travelling.

RECOVERY

When you need a helping hand out on the tracks, ARB has you covered with a range of recovery equipment and accessories.

Recovery Points

The ARB Recovery Point features a chamfered edge specifically designed to suit both soft and steel shackles. Developed to fit the vehicle with UVP, UVA or OE protection, each ARB Recovery Point is rated at 8,000 kilograms up to the maximum turn angle of the front wheels. Both left-hand and right-hand Recovery Points are a forged construction and have been precision robot welded to allow for different set-ups of recovery equipment to suit each individual situation. As each point is rated at 8,000 kilograms, the use of bridle straps is not required.

WARN VR Evo 10-S Winch

WARN is known for being rugged, durable and reliable and when it comes to winching, these qualities are very important. The WARN VR Evo Winch offers fast line speeds with lower amp draw and is made with a bold tactical look giving your vehicle an aggressive style with premium recovery equipment. This winch features a synthetic rope and can pull up to 10,000 pounds.

Bushranger COVERT 10,000lb Winch

The Bushranger COVERT Winch features a premium, discreet design that seamlessly integrates with modern 4x4 vehicles for a sleek, low-profile look. Proudly engineered and proven in Australia, it's built to perform in the harshest conditions using the highest quality components and rigorous testing methods to deliver long-lasting reliability and performance.

SUSPENSION

Get greater ride comfort and handling across all terrains with an Old Man Emu suspension system from ARB.

OME BP-51 Suspension

Whether it's extended trips, 4WDing or tackling terrain, Old Man Emu BP-51 suspension by ARB provide unrivalled performance, setting the benchmark for all driving conditions thanks to their fully adjustable internal bypass system. The result is the holy grail of suspension performance: the ultimate comfort and control when you need it.

OME Nitrocharger Suspension

Old Man Emu's world-renowned Nitrocharger suspension has stood the test of time, constantly standing up to the conditions and demands of vehicle owners. A Nitrocharger Plus suspension system is an affordable upgrade that provides a significant improvement in comfort over the vehicle's standard suspension both on and off road.

OME MT64 Suspension

The MT64 is a set-and-forget suspension that takes comfort and load carrying to the next level. This highly engineered shock absorber and strut range provides all-round comfort when heavily loaded or tackling the harshest roads on your next adventure.

Gross Vehicle Mass (GVM) Upgrade

A GVM upgrade allows your vehicle to safely carry more than the original maximum weight and ensures that your vehicle is GVM legal in all states of Australia.

STORAGE

Whether it be for a quick weekend getaway or the long haul, maximise the versatility of your vehicle's cargo space with ARB storage solutions.

ARB Modular Drawer System

With the creation of tailor-made trim panels, ARB has set the perfect aperture for the deployment of a fully integrated drawer suite to fit your vehicle. For added practicality, ARB has incorporated accessory switch bezel cut-outs, ideal for use with additional install kits, all while allowing for fitment with or without the tub liner.

BASE Rack

Ultra sleek, boasting a super low mounting profile and lightweight design, the BASE Rack provides unmatched simplicity, flexibility and personalisation with a range of accessories for full customisation.

Thule Evo WingBar

These roof cross bars feature advanced aerodynamic TrailEdge™ design and reduced wind noise thanks to the WindDiffuser™ technology. At 135 centimetres wide with other sizes also available, they can carry up to 100 kilograms.

BASE Rack Roller

Loading pieces of timber and other heavy items onto your BASE Rack will be much easier with this useful accessory. Available in two sizes to suit the standard and narrow racks and can be attached to any section of dovetail around the outer perimeter of the rack.

LIGHTING

Shine the light on the road ahead with a selection of driving lights to suit your driving style. Choose from a variety of options such as spot, flood or combination lights to suit your ideal set-up.

ARB Intensity IQ

ARB Intensity IQ has been developed from the ground up with performance front of mind, whilst delivering a design that complements modern vehicle styling and bar work. Packed with unique features, Intensity IQ sets a new level of driving light design and usability.

ARB Intensity V2

Featuring 21 or 32 LEDs in spot or flood beam for the best use of light for your requirements, ARB Intensity V2 Driving Lights are protected against radio frequency and electromagnetic interference, and have virtually indestructible polycarbonate lenses.

ARB Intensity Solis

The ARB Intensity Solis Driving Lights have 21 or 36 OSRAM LEDs and a unique dimming feature allowing five preset outputs to alter the intensity of light. These have interchangeable red and black bezels, making the Intensity Solis lights suit your aesthetic requirements.

Summit Sahara Tube Light

The integrated 20-inch light bar on the Summit Sahara Bull Bar top tube greatly improves visibility and durability. It features over and under voltage protection, thermal management, protection against radio frequency and electromagnetic interference, and reverse polarity protection.

BASE Rack Lighting

The BASE Rack lighting not only complements the sleek design and mounting system of the BASE Rack but provides instant lighting wherever it is needed most.

The ARB BASE Rack Light Bar and BASE Rack Auxiliary Light both have a unique reflector design to provide optimum distance and width.

Bushranger Night Hawk Variable Series

The Night Hawk Variable Series lights deliver versatile, high-performance lighting designed to adapt to any driving condition. Engineered with advanced optics and durable materials, this series of lights offers user control for maximum visibility on and off the road. With three different models to choose from, they are ideal for 4WDers seeking performance and the ultimate control.

NACHO® Grande & Quatro

The unique sizing of the NACHO® range allows mounting locations on your rig to stretch as far as your imagination, whether it's a bar, rack, pillar or custom mount. NACHO® distinguishes itself in putting control back into your hands, through tough, innovative and customisable options.

CAMPING

Take your camping experience to the next level with a range of products designed to improve your trip. From keeping food fresh and drinks cold to getting some shade from the sun, these products are designed with campers in mind.

Altitude Rooftop Tent

The Altitude Rooftop Tent has been engineered with a fully automated open and close function including ARB SmartFold™ hinge technology to enfold the canvas, meaning no manual interaction is required. Designed to suit all requirements with a full-sized ladder including steps and handrails for added comfort.

Esperance 2 Rooftop Tent

The Esperance 2 Rooftop Tent, complete with a lightweight and hard-shell exterior, is suitable for dynamic worldwide climates. With a sleek and contemporary design, an optional shell colour-coding is also available. This rooftop tent is both quick and easy for vehicle mounting, as well as set up and operation with integrated D-handles with key-lockable security.

Flinders Rooftop Tent

The Flinders Rooftop Tent is compact without compromising on camping comfort, from a quick set-up and pack-up to the practicality of storing bedding inside. It features three windows, door entry, skylight and an all-weather ventilation port ensuring you're destination ready.

Simpson Rooftop Tent

The ARB Simpson III Rooftop Tent delivers the ultimate in ease and convenience when travelling. Unfolding in minutes, a rooftop tent provides sleeping quarters off the ground, protected from the elements. All bedding can remain inside the tent during the journey, freeing up vital storage space in the vehicle and allowing the tent to be quickly and easily packed away.

Elements Fridge Freezer

The Elements Fridge Freezer has a stainless steel exterior with anodised aluminium latches and protected placement of electrical connections, making it capable of withstanding any weather conditions. The lid has a gas strut to allow two handed access to the contents. It also features a touchpad that allows for temperature control, low voltage cut-out and security lock. When the lid's open, you have full use of the touchpad but when it's closed, the adjustment is hidden to prevent unwanted changes. The lid can also be locked with a unique user-selected locking code.

ZERO Fridge Freezer

The perfect way to keep cans cold and your meals frozen with the convenience of wireless monitoring and control via your smart device, ARB's range of ZERO dual- and single-zone fridge freezers are the perfect addition to your car. With independently controlled cooling zones to give you the best of both worlds in one fridge, a dual-zone ZERO Fridge Freezer will give you the luxury of fridge and freezer space at the one time, while the single-zone ZERO offers fridge or freezer function to ensure your food stays fresh.

Awnings

ARB Awnings are made from 300gsm PU-coated polycotton rip-stop canvas that is waterproof and UV protected. They feature anodised 25-millimetre aluminium poles with nylon cuff joints and anti-wear points with pegs and reflective guy ropes included. Awnings come in a grey soft case and can come with or without LED lighting. The ARB Awning also has the additional option of coming in an aluminium case, which provides a sleek, stylish look while protecting your awning. This is available in either black or silver.

Slide Kitchen

Featuring a three-burner stove, sink and ample bench space, ARB's fully freestanding Slide Kitchen can be set up in as little as 15 seconds, offering practicality for any tourer. Beyond being one of the most practical features for any 4WD, the Slide Kitchen also boasts an innovative user-friendly design.

AIR SYSTEMS & LOCKER

ARB's world-class air systems will take you anywhere you choose to go.

Air Locker
ARB Air Locker locking differentials allow you to tackle the toughest terrain with confidence. As the world's premium selectable locker, and the locker of choice for gruelling 4WDers and rock racers throughout the world, ARB Air Lockers will keep you moving regardless of the conditions.

Air Compressors & Air Systems
ARB's range of brushed and brushless compressors, both on board and portable, deliver class-leading flow rates for quick tyre inflation and Air Locker activation. A custom bracket system integrates seamlessly into your vehicle to maximise space.

Air Tank
Ideal for use with ARB's on-board compressors, the four-litre aluminium Air Tank delivers high-volume air output suitable for rapid tyre inflation and running most powered air tools. Featuring forged aluminium end caps, it offers flexible mounting with four 1/4 NPT ports with two JIC-4 male fittings to suit different vehicle set-ups.

ELECTRICAL

Adding additional lighting options such as driving or auxiliary lights will require electrical components to connect and control them. ARB's range of specific solutions is there to help.

Wiring Loom (Everest-Specific Solis Driving Light Harness)
ARB has designed a plug-and-play wiring harness to connect into ARB Solis and Intensity driving lights, offering seamless integration into the ARB bull bar and electrical system.

LINX Vehicle Accessory Interface
LINX is a unique modern controller that declutters the dashboard and centralises the command of vehicle accessories by replacing classic switches, gauges and monitors with one sleek and smart driver interface. Built on an expandable platform, LINX will continue to evolve your on and off road driving experience both now and into the future.

LINX A-Pillar Bracket
To complement ARB's LINX Vehicle Accessory Interface, the LINX A-Pillar Bracket mounts the LINX display screen in a safe and easy-to-reach location. Utilising the LINX mount, the display can be orientated to the desired position so each time the display is returned to the vehicle, it's always in the optimal position.

Auxiliary Battery Kit
Offering an independent power source for items such as fridges and camp lights, an auxiliary battery system offers peace of mind and powers additional accessories without the risk of flattening the main battery. The Auxiliary Battery Kit is designed to be fitted in the engine bay and is supplied with a battery tray, mounting hardware, plug-and-play wiring loom and a REDARC BCD charger.

Slimline 100 12V/100Ah Lithium Ion Phosphate Battery
Take control of your off road adventures with the ARB Slimline 100 12V/100Ah Lithium Iron Phosphate Battery. Designed with innovative features, it keeps you powered up while enjoying life's simple pleasures.

OFF ROAD ESSENTIALS

Always take the scenic route with a range of products to help you stay off road for longer.

Frontier Long Range Diesel Tank
The ARB Frontier Long Range Tank is setting the benchmark for long range fuel tanks around the world. Manufactured in Australia from a durable and impact-resilient cross-linked polymer designed to flex with the vehicle's chassis, each Frontier Tank offers incredible strength and rigidity, while providing a significant weight reduction over steel long range tanks. The UV-stable material ensures these tanks will survive in the most hostile environments and allow you to explore more of the off road. With a wall thickness between seven and nine millimetres, every Frontier Long Range Tank is individually pressure tested and backed by an industry-leading warranty.

Safari V-Spec Snorkel
Utilising Safari's traditional design concepts and incorporating the very latest in scanning and CAD design software, Safari's V-Spec Snorkel is ready to perform in the most extreme environments, protecting the vehicle's engine against water, dust and snow ingress while delivering cool, clean air.

INTERIOR PROTECTION

Providing unbelievable protection against damage from the elements such as sun, dirt, water and debris.

Sun Shade
ARB Sun Shades are tailored to your vehicle, meaning fuss-free protection from the sun that does not require suction caps or straps. Simple to set up and simple to store with an included storage roll bag.

Floor Mat
Expertly designed to catch and hold debris, ARB Floor Mats are a waterproof solution that includes secure floor placement and a snug fit to cover all areas of your footwells, even utilising the vehicle's retention clips where applicable.

Seat Covers
ARB Seat Covers are designed to last. These covers are machine washable and UV protected for everyday wear, whilst also being compatible with the vehicle's seat heating and air bags (ADR compliant) to ensure normal seat functionality. Available in both neoprene and canvas materials, these vehicle-specific covers will fit snug to your seats and protect them from spills and any debris you bring in.

4X4 ACCESSORIES

ARB accessorised vehicles shown with optional accessories depicted throughout this publication are for illustration purposes only. Current features and specifications may vary. Not all accessories are available on or compliant for all model variants. Accessories depicted comprise ARB and aftermarket accessories. ARB accessories as fitted to vehicles are covered by the ARB and product-specific warranty. Terms and conditions apply, for full details please visit our Warranties page: arb.com.au

Please check with your local ARB Store or Stockist to confirm pricing, availability, compatibility, specific vehicle applications or for any other queries. Always consider the mass of your load and your selected accessories to ensure your vehicle will not exceed vehicle and accessory load limits. The illustrations used are not an indication or promise that the accessories and/or vehicle shown is compliant in your country, state or location.

All efforts are made to ensure images are accurate representations of the actual product; however, some images are computer-generated renders. Appearance of the actual product may differ due to print quality or other factors and customers are advised to satisfy themselves of the features of the actual ARB accessories.
