OUR STORY

The ARB bull bar is born.

The first ARB roof rack is released.

1975

From a home garage to a 1,000-square foot factory in Ringwood, this is where ARB (initials of Anthony Ronald Brown) was founded.

1976

ARB Engineering Pty Ltd was formed.

1987

ARB releases Air Locker in Australia and the USA.

Listed on the stock exchange.

1988

ARB buys Old Man Emu suspension.

ARB USA established in Seattle.

1991

Air Locker Inc. established in Seattle, WA, USA.

1998

ARB launches a range of canopies.

2000

ARB Sahara Bar is released.

2003

ARB acquires Kingsley Enterprises Pty Ltd.

2004

ARB sells the 100,000th Air Locker.

2005

Established Off Road Accessories Ltd Thailand.

2006

ARB products now sold in over 100 countries worldwide.

The ARB story started in 1975 when the company founder, Tony Brown, became inspired while 4WDing through the Top End of Australia.

Back then, 4WDers relied on homemade or ill-fitting equipment that was not designed for extensive outback expeditions. Endless corrugated roads, extreme temperatures and heavy loads punished the vehicles that regularly tackled these kinds of conditions. Tony's many years of toiling in his Series 1 Land Rover proved of enormous benefit to others on that Top End trip, with his expertise regularly called upon to fix damaged bull bars and broken roof racks or come up with an ingenious Plan B when they were beyond repair.

So an idea was born: a company that sourced and produced well-engineered,

durable equipment that would meet the vigorous demands of 4WD owners. And upon his return to Melbourne, Tony put theory into practice and began working in the family garage to address some of the product deficiencies he'd encountered on his trip. It was exactly what Australian 4WDers had been waiting for, and ARB (the initials of Anthony Ronald Brown) was founded.

Today, ARB is Australia's largest manufacturer and distributor of 4x4 accessories. We have a vast international presence – with offices in the USA, UK, NZ, Thailand, Europe and the Middle East – and an export network that extends through more than 130 countries around the globe. Our philosophy, however, has never wavered from its original course: quality, reliability and practicality above all else.

2008

ARB releases its own brand car fridge.

2009

Established ARB Off Road Ltd in Thailand.

2012

Intensity range is released.

50

2014

50th ARB store opens in Australia.

DESIGN & ENGINEERING

To ensure our products consistently meet your expectations, ARB invests substantial capital in research and design each year. Our Design and Engineering Team utilises the latest CAD/CAM parametric modelling systems and finite element analysis packages, and is supported by independent companies and universities for special projects like vibration, strength and crash testing.

We also devote considerable time and resources toward sourcing new products from around the world such as IPF lights

from Japan and Warn winches from the United States. We scan the globe in search of equipment that meets both the demands of our customers, our own stringent quality requirements and those of Australian legislators.

In addition, we are constantly on the lookout for new ways to improve our business practices, from distribution to customer service. ARB is a Quality Endorsed Company and wherever we can, we endeavour to "raise the bar".

MANUFACTURING

ARB is the number one innovator in the industry because we use the most technologically advanced, state-of-the-art fabrication equipment and machinery. Today's requirements for more complex designs are met with highly advanced, Computer Numerically Controlled (CNC) sheet fabrication facilities. Our manufacturing capabilities include laser cutting, brake pressing, guillotining, CNC bending, machining and turning. We're

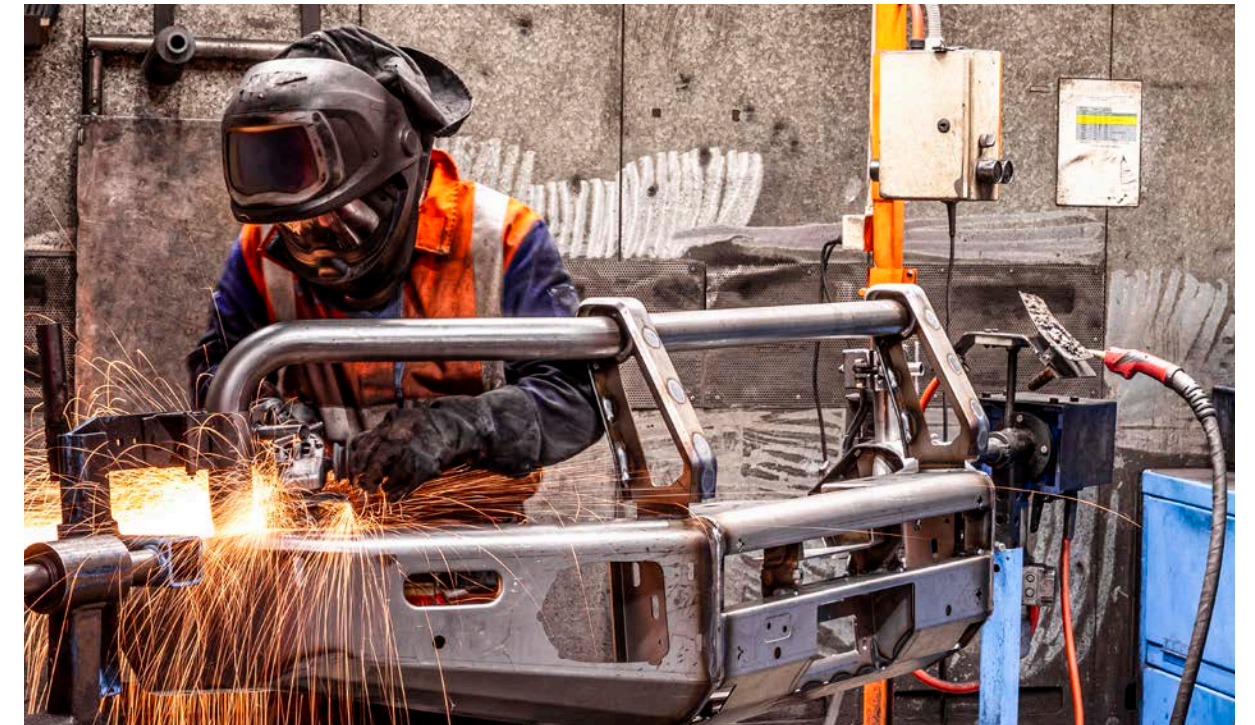

equipped with MIG, TIG, robot and spot welding facilities and also have powder-coating and spray painting centres.

We have a stringent quality control system in place, ensuring our exceptionally high standards are maintained. These factors, combined with our level of automation, enable us to produce some of the finest 4WD accessories in the world.

THE ARB WAY

When you buy ARB, it's not just a product you take home with you, it's an ARB guarantee.

- ✓ Reliable Australian company, one of the biggest in the industry
- ✓ Large store network across Australia including over 80 ARB-branded stores and 150 stockists
- ✓ Aftersales support
- ✓ Three-year warranty on ARB products

CHOOSING A 4WD ACCESSORY PARTNER

Your 4WD accessories are an investment. You're investing in keeping your family safe, protecting your vehicle and safeguarding your adventures. That's why ensuring you buy the best is so important.

A true passion for off road adventure, backed by an incredible investment in research, development and engineering integrity is the key to producing the world's best 4WD equipment. And once you head off road, the assurance of support across the entire country is the added insurance on every accessory investment, big or small. Here are some things to look for when choosing where you buy your 4WD accessories.

Expertise

Countless experts are involved in designing and manufacturing your pride and joy; it is vital that just as much goes into the accessories you add to it. Your 4WD upgrades should be planned, engineered and created by a team of qualified experts. Extensive hours need to be invested into designing, testing and developing to ensure that they withstand the rigours of off road life.

Quality

The 4WD accessories you choose should be made in state-of-the-art facilities using only the best materials. Careful attention needs to be paid to make sure they can stand up to harsh outdoor conditions, extreme temperatures and excessive vibrations. UV stability and corrosion resistance is also vital to ensure they stay looking their best.

Support

If you've chosen the best products money can buy, you want to have the best support in the unlikely event that something goes wrong. Buying your accessories from a reputable supplier with locations all over the country means no matter where your adventures take you, there's always someone to lend a hand or give advice. Having a large and reliable network also means that replacement parts or necessary upgrades are always accessible and available.

Passion

To choose to spend your weekends waist deep in mud, digging tyres out of sand, covered in red dust or driving for hours to catch a breathtaking vista, you've got to have passion. When buying your 4WD accessories, you want to know that the people who conceptualise, design, create and sell them share this passion. The advice you receive should be from 4WDers who live and breathe the off road life.

Why You're Making the Best Choice

ARB was founded on true off road passion. We've been building 4WD products for 50 years. Our engineering department is made up of over 80 qualified experts and our ultra-modern manufacturing and testing facilities maintain our position as leading innovators in the industry. With over 80 stores and over 150 stockists around the country, we're always here to help you out. On average, the staff in each ARB store has a combined 140 years of 4WDing experience inside its doors. In fact many of the people who make up ARB were customers before they started working for us.

Whether you're looking for advice on your vehicle, your holiday or just general off road tips, our friendly 4WD experts share your passion. Pop into your local ARB store, give us a call, send us an email or chat with us on Facebook. No matter what support you need, ARB is here to help.

ARB partners with the best 4WD suppliers in the business to ensure customers receive only the best. From REDARC to Safari and Warn, these brands are backed by quality products, sound advice and heritage that dates back decades.

AT ARB... WE GET IT

Getting the right advice is crucial when decking out your 4WD or preparing for a trip, especially when you're venturing into something new. Often it is other product users we turn to for advice and ideas because confidence comes from hearing from real people with real experiences.

ARB 4x4 Accessories is more than just a 4x4 accessory retailer. Our stores are filled with passionate 4WDers, people who have travelled extensively and have real-world experience owning and setting up a range of vehicles.

Collectively, ARB staff and store owners have experienced the highs and the lows of off road travel; they have experimented with vehicle set-ups, towed camper trailers to remote locations and battled the range of extreme conditions our great land is known for.

So whether you are getting ready for an epic trip to the Cape, setting up a vehicle to tow your new caravan or restoring an old classic, whether you're a tradie who likes to escape for the weekend, a young family exploring new horizons or a lifetime 4WDer, at ARB... we get it!

FORD PARTNERSHIP

Two iconic brands have joined forces to bring a best-in-class personalisation to the Next-Generation Ford Ranger and Everest. A strategic collaboration between Ford and ARB has resulted in the best range of accessories whether for work, play or family - new adventures and memories are waiting to be made.

The collaboration began in early 2019, with ARB and Ford engineers joining forces to design, test and validate before ultimately manufacturing over 160 Ranger-specific parts. This included specific rear panel location for the on-board Air Compressor, allowance for an auxiliary battery and BCDC placement under bonnet and when fitting a bull bar to the vehicle, as well as the relocation of the front sensors, radar and 360° camera, all Ford approved to maintain ADAS (Advance Driver Assistance Systems) functionality.

Endorsed by Ford's five-year, unlimited kilometre warranty, all accessories have undergone a rigorous development and validation process by Ford and ARB engineers. This has ensured they're fully compatible with the vehicles, delivering optimal integration and performance.

This partnership has resulted in the best range of accessories whether for work, play or family - new adventures and memories are waiting to be made.

BULL BARS

BULL BAR RANGE

Over one million sold in Australia.
Carries the ARB Guarantee!

An ARB bull bar acts like an insurance policy. It keeps you and your family safe on outback, coastal and rural roads, and minimises damage from impact with animals and other road hazards.

CHOOSING A BAR

Whether you love the classics or need to have the latest and greatest, we have a bar to suit.

Use the handy table to find the best bar for you and rest assured that our engineers have designed the entire range with the following in mind:

- Extra safety for your family
- Protection for your vehicle
- Designed and manufactured for Australian conditions
- Multiple mounting points for a range of accessories
- Tested for air bag compatibility
- The best-built bars in the business

With over one million ARB bull bars manufactured, your only decision is which ARB bull bar is right for you.

SUMMIT MKII BULL BAR

Innovative design, built with advance technology

SUITABLE FOR

- Modern 4WDs
- Owners who want full bonnet protection
- Serious 4WD users
- Tourers
- Rough terrain

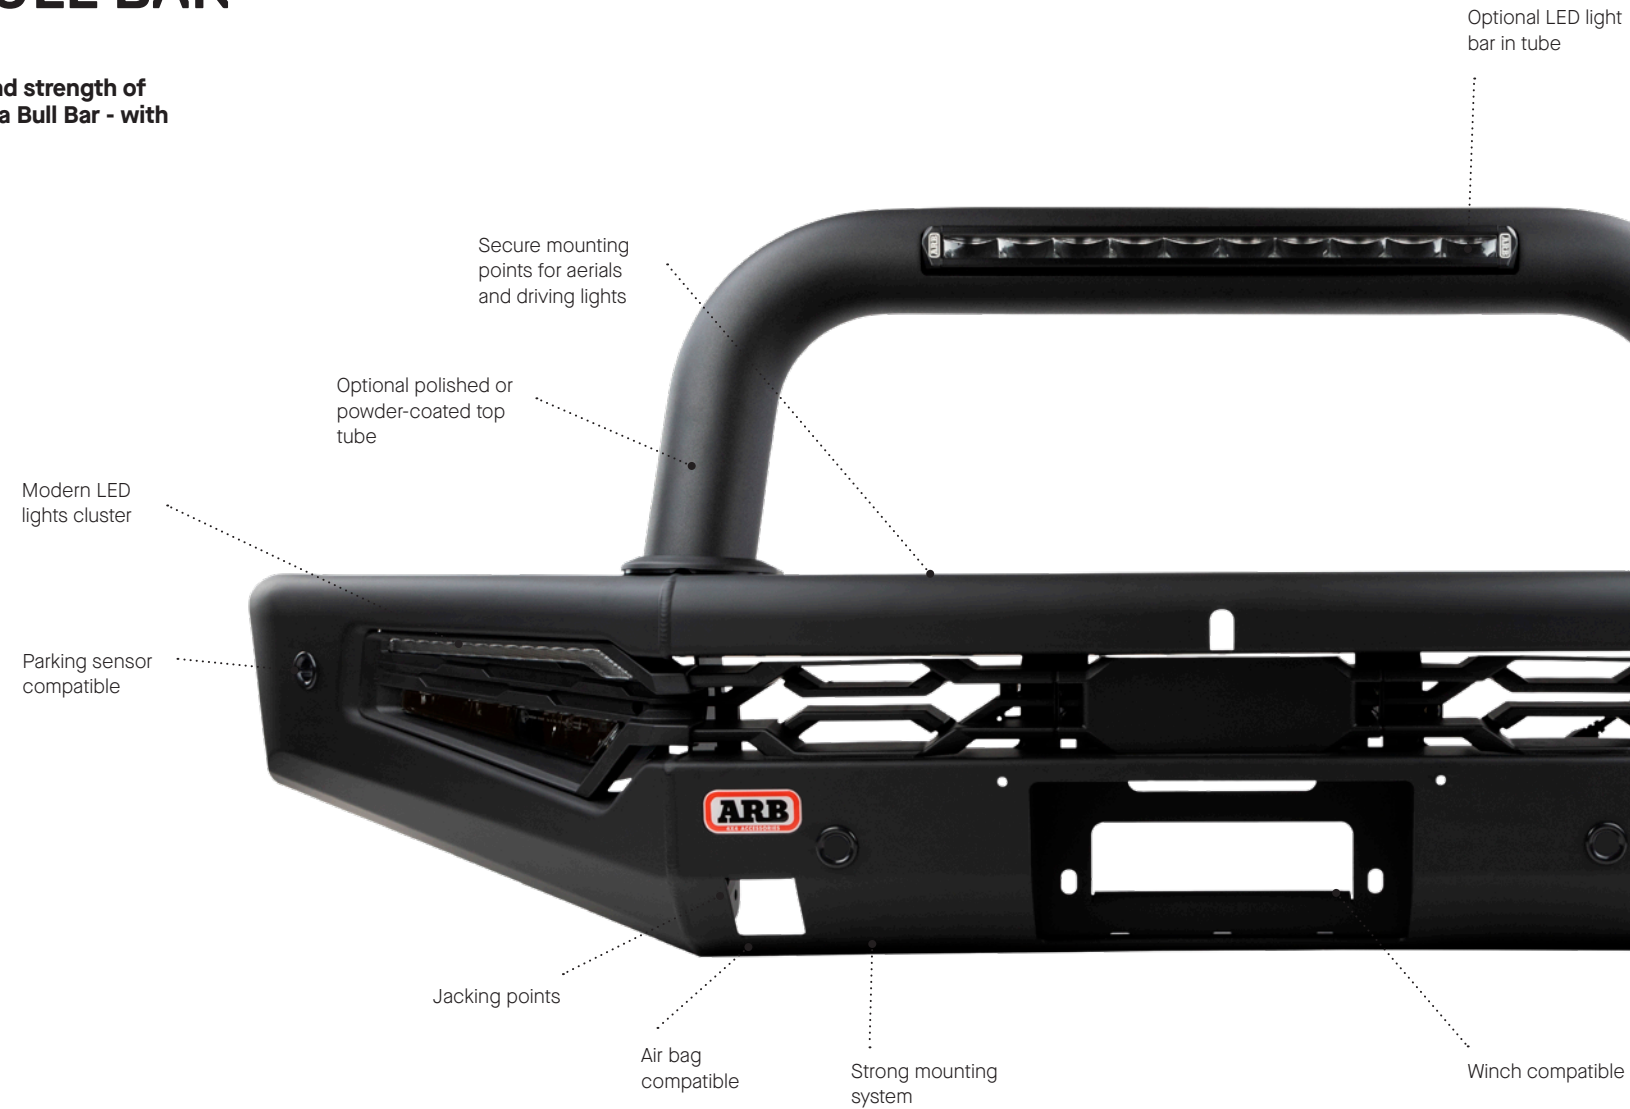

⚙️ LET’S TAKE A CLOSER LOOK

- **Wing design:** The ARB design provides greater strength and maintains an optimum offset approach angle.
- **Wider edge radius:** A 30-millimetre wing and centre section edge radius offers increased strength while complementing modern vehicle design.
- **Off road jacking points:** Allows for the use of an off road jack for effective recovery.
- **Winch compatibility:** The ARB Summit MKII bull bar has the option of fitting a winch and is designed and tested to endure the rigours of maximum recovery stress.
- **Steel uprights:** The key to its strength, steel uprights attached to the mounting system provide maximum support and strike protection.
- **Larger tubing:** 60.3-millimetre mandrel steel tubing provides increased frontal protection and greater visual styling.
- **Press-formed top pan and cover panel:** Stronger centre pan with smooth, continuous edges. A press-formed aluminium winch cover panel finishes off the bar for when a winch is not installed.
- **Mounting system:** Specifically engineered to spread impact and winching loads evenly over the vehicle’s chassis. This ensures the bull bar functions properly in extreme conditions.
- **Aerial brackets:** Two aerial brackets welded behind the top cross tube.
- **Driving light provision:** Securely mounting driving lights prevents problems such as excessive movement, a vibrating beam pattern, premature bulb failure and eventual fatiguing of the light bodies.
- **Split pan design:** Enhances the strength of the bar, while providing the radiator and engine with additional airflow. Also facilitates winch access and operation.
- **Safety first:** ARB bars are compatible with vehicles OE safety systems including air bags, parking sensors and collision avoidance.
- **Modern light cluster:** Includes ARB LED fog light, LED daytime running light, and LED indicators and clearance lights within once complete unit compliments both aesthetic and functional elements of modern vehicles.
- Colour coding option available in Australia.

SUMMIT SAHARA MKII BULL BAR

All the function and strength of the Summit Sahara Bull Bar - with a fresh new look

SUITABLE FOR

- Modern 4WDs
- Low-profile design
- A sleek, understated look
- A great platform for mounting accessories
- Rough terrain

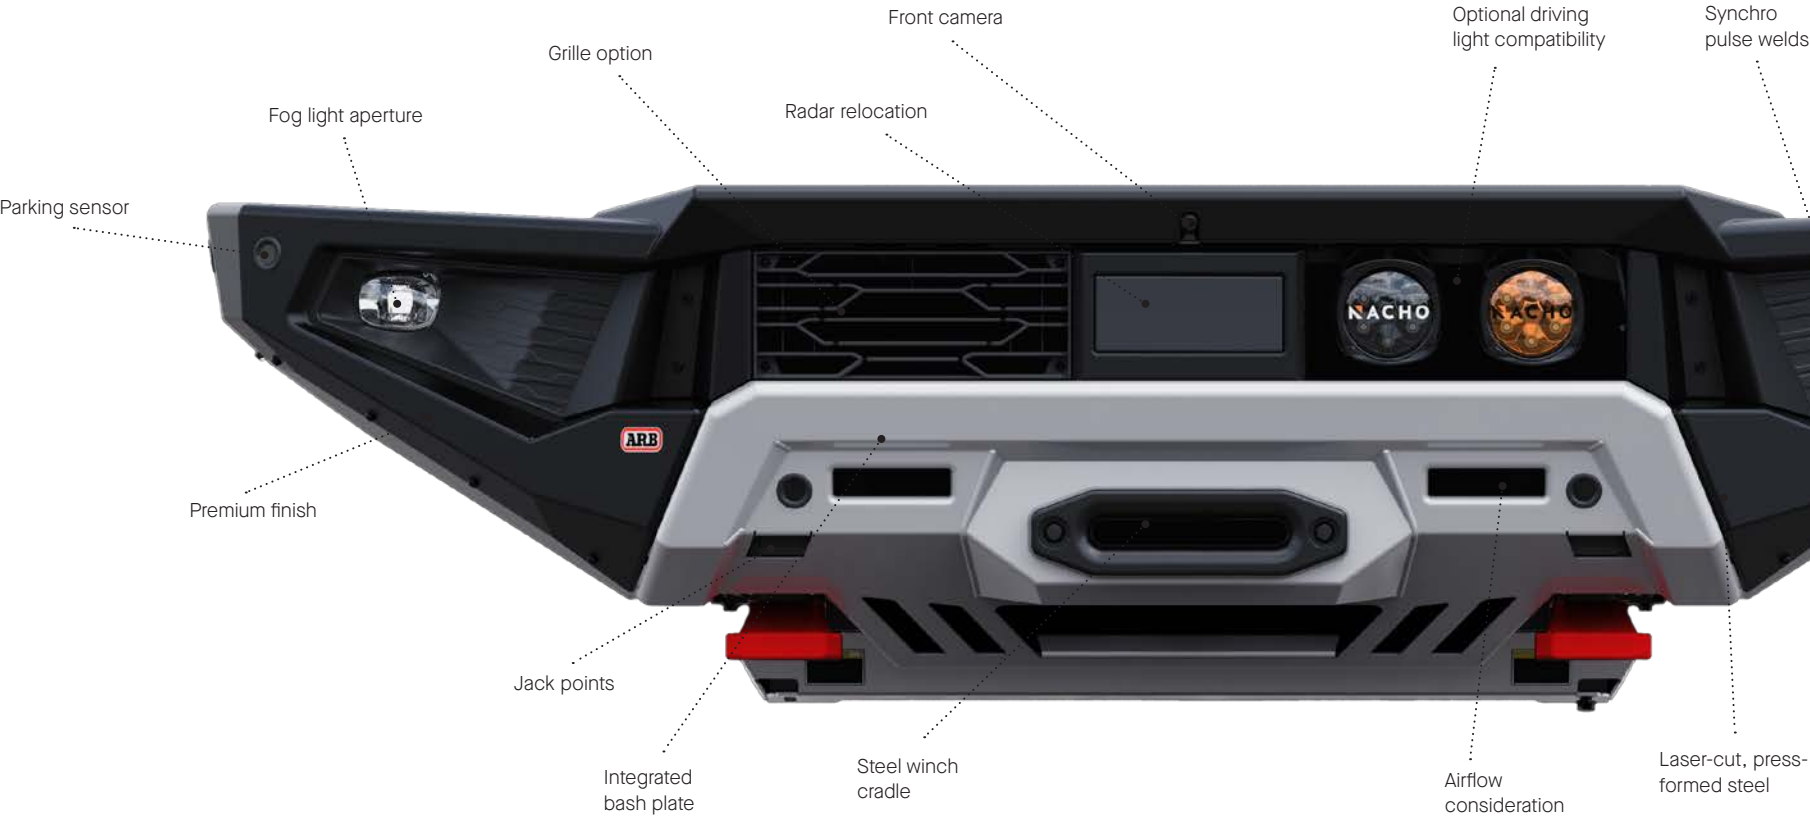

LET’S TAKE A CLOSER LOOK

- **Wing design:** The ARB design provides greater strength and maintains an optimum offset approach angle.
- **Wider edge radius:** 89-millimetre outer frame and centre cross tube offers increased strength while complementing modern vehicle design.
- **Off road jacking points:** Twin ARB JACK or Hi-Lift Jack points located in the lower pan for effective recovery.
- **Winch compatibility:** The ARB Summit Sahara MKII Bull Bar has the option of fitting a winch and is designed and tested to endure the rigours of maximum recovery stress.
- **LED light bar option:** Optional polished tube kit matte black tube with integrated 20-inch LED light bar.
- **Press-formed top pan and cover panel:** Stronger centre pan with smooth, continuous edges. A press-formed aluminium winch cover panel finishes off the bar for when a winch is not installed.
- **Mounting system:** Specifically engineered to spread impact and winching loads evenly over the vehicle’s chassis. This ensures the bull bar functions properly in extreme conditions.
- **Aerial brackets:** Two aerial brackets located on the centre frame.
- **Split pan design:** Enhances the strength of the bar, while providing the radiator and engine with additional airflow. Also facilitates winch access and operation.
- **Safety first:** Durable steel construction for maximum protection. Engineered air bag compatible mounting system secures to the chassis via high tensile bolts.
- **Driving lights compatibility:** Provision to accommodate ARB Intensity and Solis LEDs and a range of Bushranger and IPF lights.
- **Modern LED lights cluster:** Includes ARB LED fog light, LED daytime running light, and LED indicators and clearance lights within once complete unit compliments both aesthetic and functional elements of modern vehicles.
- Colour coding option available in Australia.

ZENITH BULL BAR

Bridging functionality and style

SUITABLE FOR

- Modern 4WDs
- Low-profile design
- A sleek, understated look
- Rough terrain
- Urban living

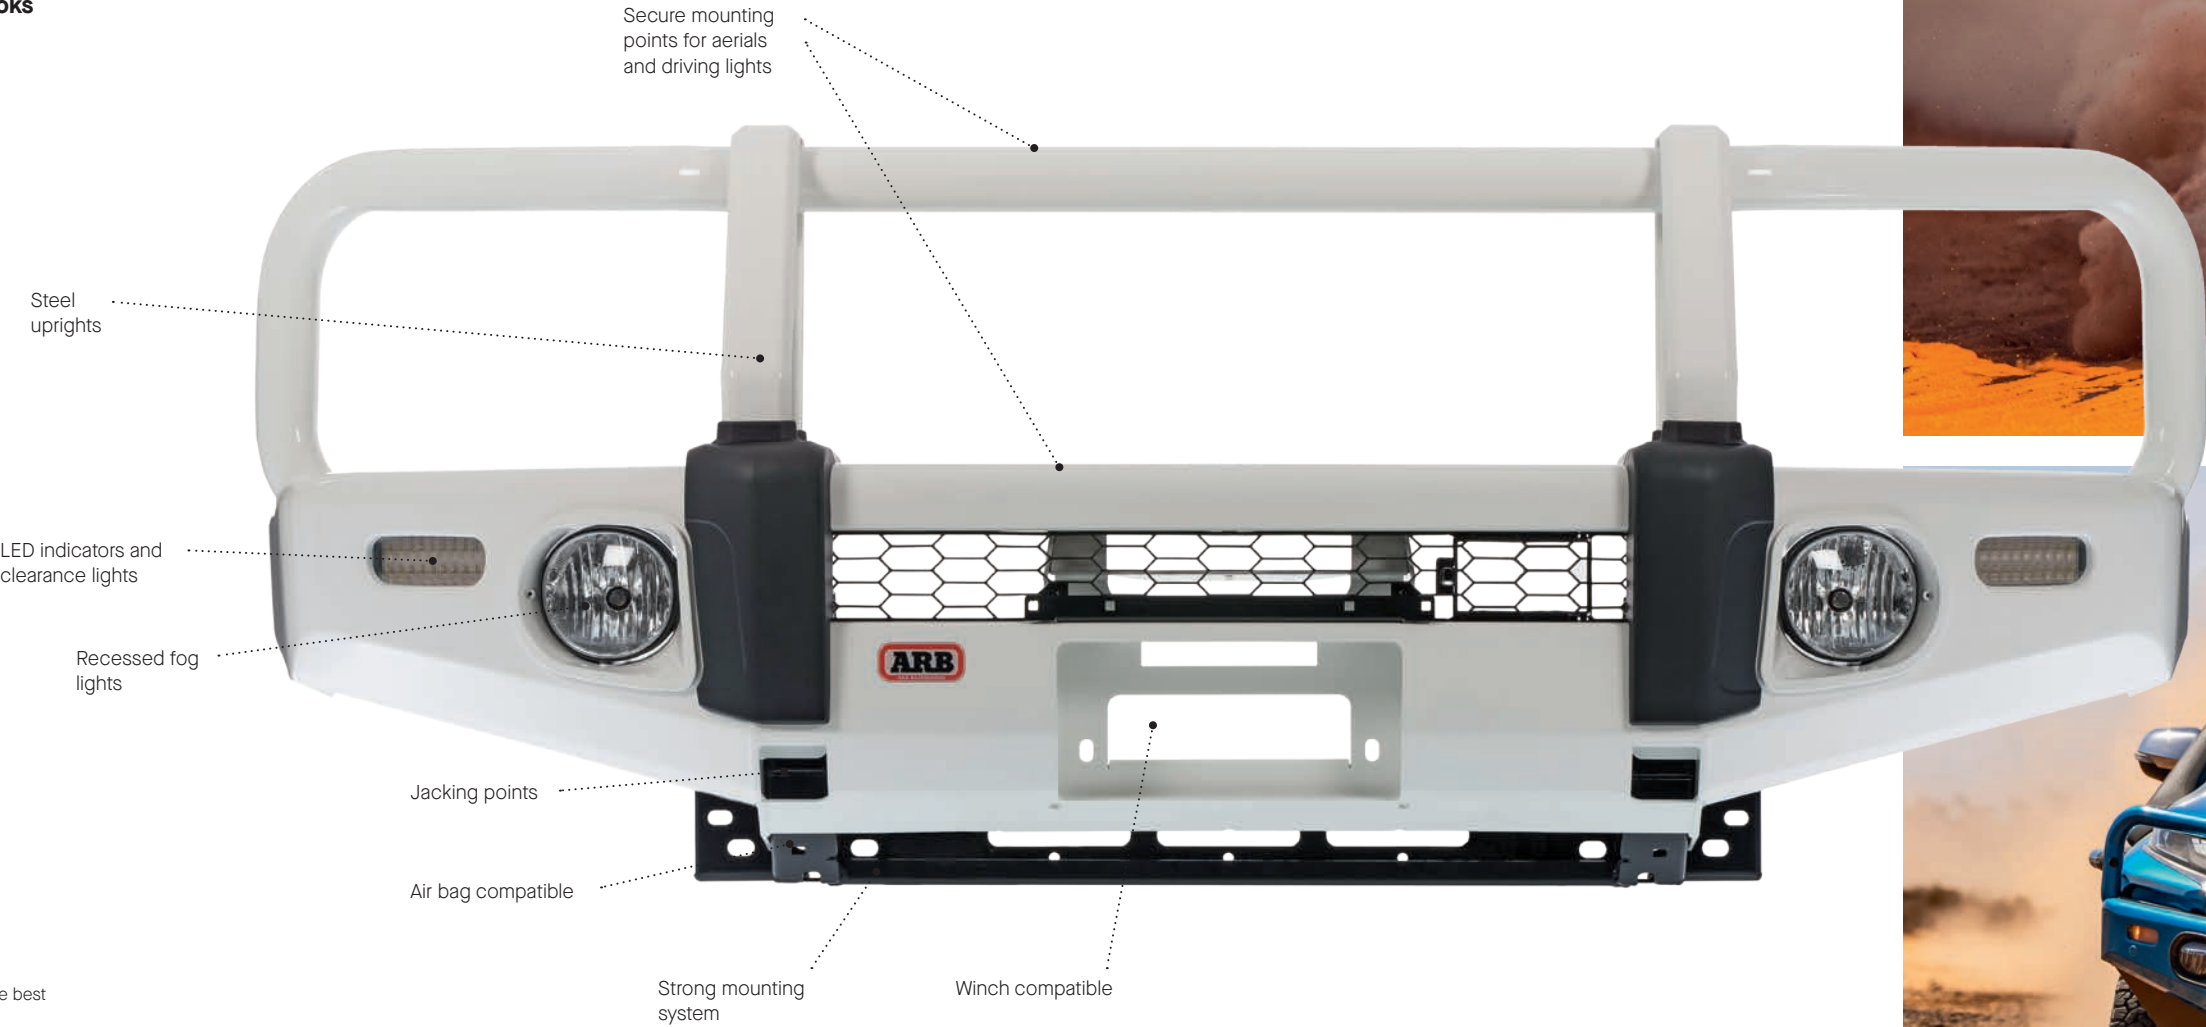

⚙️ LET'S TAKE A CLOSER LOOK

- **Superior construction:** Laser-cut, press-formed and folded three-millimetre steel maximises the strength-to-weight ratio and ensures durability when tackling tough terrain.
- **Integrated bash plate:** Strengthened with high tonnage press forms for durable protection of vulnerable vehicle components. Removable for ease of access and winch servicing. Keep your vehicle safeguarded on every adventure.
- **Enhanced approach angle:** Improved clearance for off road capability so you can take on obstacles with confidence.
- **Included eight tonne rated recovery points:** Forged with chamfered edges for a safe, stress-free recovery when you need it most.
- **Steel winch cradle:** Stay prepared for any challenge. Designed to seamlessly integrate your winch, ensuring you're ready for recovery when it matters most.
- **Retention of original functions:** No compromises! This ensures that your SRS air bags, parking sensors, front camera and radar remain fully functional.
- **Integrated lighting solutions:** Compatible with ARB's range of NACHO Quatro driving lights, ensuring superior night-time visibility. Factory fog lights are retained in neatly crafted wings or an ARB kit is available for models without.
- **Durable finish:** Featuring a MetaPrep primer and a high-quality powder coat, our standard finish enhances durability and corrosion resistance, ensuring longevity in all conditions. The Zenith Bar can also be colour-coded on both the bar and/or the bash plate as desired.

SUMMIT BULL BAR

As tough as it looks

- SUITABLE FOR**
- Owners who want the best
 - Serious 4WD users
 - Rough terrain
 - Around Australia driving
 - Maximum protection

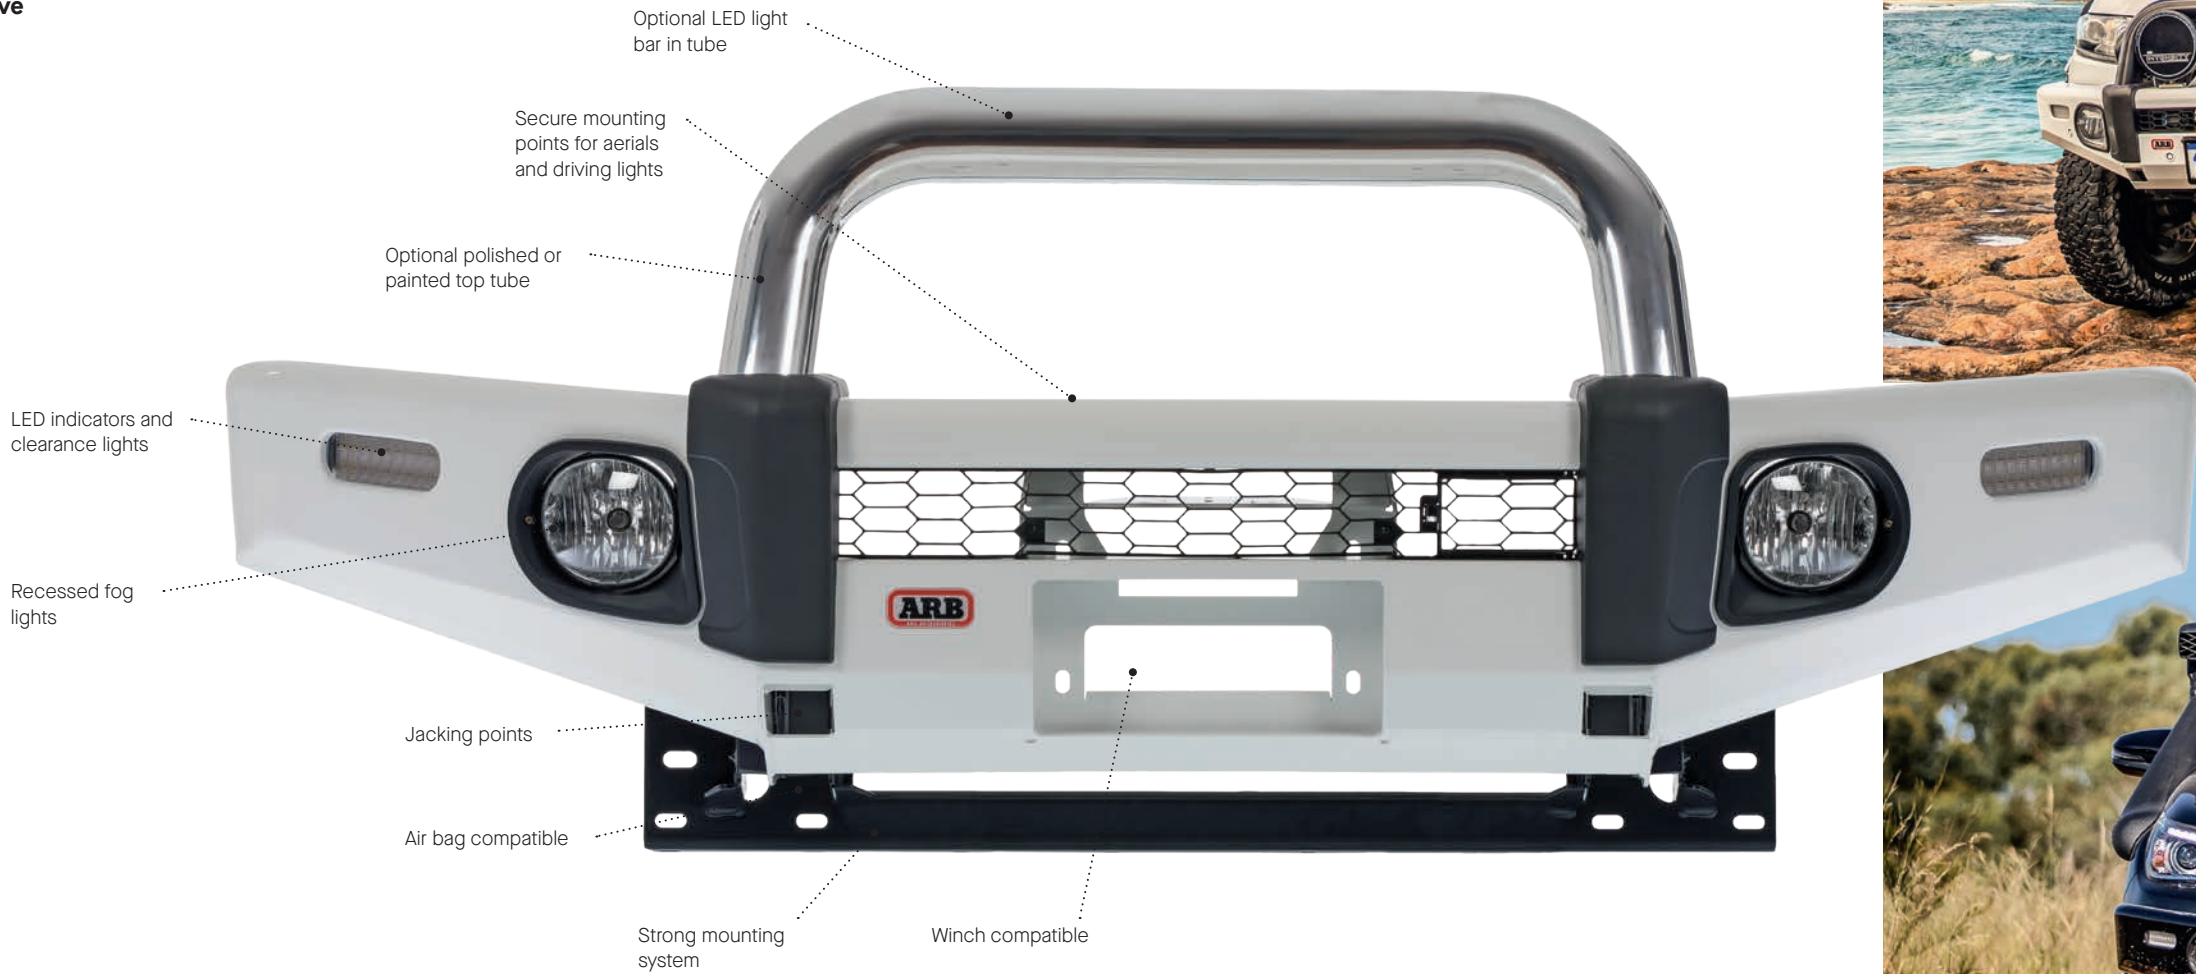

⚙️ LET’S TAKE A CLOSER LOOK

- **Optional LED fog lights:** Perfect for driving in inclement weather, these fog lights provide a broad spread of light to illuminate the road ahead.
- **LED indicators and clearance lights:** Fully sealed and water-resistant LEDs provide increased service life and a modern look, and come standard on all Alloy Bull Bars.
- Colour coding option available in Australia.

COMMERCIAL BULL BAR

The Aussie workhorse

LET'S TAKE A CLOSER LOOK

- **Recessed indicators:** For protection against branches and road debris.
- **Steel tube:** 76.1-millimetre steel centre frame tube and 60.3-millimetre outer frame tube for added strength.
- **Aerial brackets:** Some ARB Commercial Bull Bars incorporate aerial brackets welded behind the top cross tube.
- **Off road jacking points:** Some Commercial Bull Bars feature off road jacking points, allowing a jack to be attached directly to the bar.
- **Winch compatibility:** Some Commercial Bull Bars are available with electric winch provision, and have been specifically designed to accommodate the stresses of winching.
- **Splitpan design:** Enhances the strength of the bar, while providing the radiator and engine with a massive amount of airflow.
- **Mounting system:** Specifically engineered to spread impact and winching loads evenly over the vehicle's chassis. This ensures the bull bar functions properly in extreme conditions.
- **Wing design:** The ARB design provides greater strength and maintains an optimum offset approach angle.
- **Driving light provision:** Secure mounting points ideal for ARB Intensity and IPF driving lights.
- **Safety first:** ARB bars are compatible with vehicles OE safety systems including air bags, parking sensors and collision avoidance.
- **Optional fog lights:** Available for some 4WD models, fog lights are perfect for driving in inclement weather, providing a broad spread of light to illuminate the road ahead.

SUITABLE FOR

- Onsite work
- Fleet and government vehicles
- Tradies
- New and older model 4WDs
- Budget-conscious owners

DELUXE BULL BAR

Maximum protection, functionality and integration

LET'S TAKE A CLOSER LOOK

- **Recessed indicators:** For protection against branches and road debris.
- **Steel uprights:** The key to its strength, steel uprights attached to the mounting system provide maximum support and strike protection.
- **Driving light provision:** Securely mounting driving lights prevents problems such as excessive movement, a vibrating beam pattern, premature bulb failure and eventual fatiguing of the light bodies.
- **Aerial brackets:** The vast majority of ARB Deluxe Bull Bars incorporate two aerial brackets welded behind the top cross tube. Custom-fit, clamp-on brackets are also available for additional antenna mounting.
- **Split pan design:** Enhances the strength of the bar, while providing the radiator and engine with increased airflow.
- **Wing design:** The ARB design provides greater strength and maintains an optimum approach angle.
- **Off road jacking points:** Allows for the use of an off road jack for effective recovery.
- **Winch compatibility:** The ARB Deluxe Bull Bar features the option of fitting a winch, and is designed and tested to endure and exceed loads increased by the use of a snatch block.
- **Mounting system:** Specifically engineered to spread impact and winching loads evenly over the vehicle's chassis. This ensures the bull bar functions properly in extreme conditions.
- Colour coding option available in Australia.

Note: May vary depending on model, refer to application guide.

DELUXE SAHARA BULL BAR

All the function and strength of the Deluxe Bull Bar - with a different look above

LET'S TAKE A CLOSER LOOK

- **Recessed indicators:** For protection against branches and road debris (model specific).
- **Centre tube:** An optional polished or painted centre tube offers a different look to the more traditional bull bar design. An internal mandrel bender is used to shape the tube, ensuring even wall thickness throughout.
- **Driving light provision:** Mounting driving lights prevents problems such as excessive movement, a vibrating beam pattern, premature bulb failure and eventual fatiguing of the light bodies.
- **Aerial brackets:** The bar includes two aerial brackets, which may be located on the wings, the pan or the optional tube.
- **Split pan design:** Enhances the strength of the bar, while providing the radiator and engine with increased airflow.
- **Wing design:** The ARB design provides greater strength and maintains an optimum approach angle.
- **Off road jacking points:** Allows for the use of an off road jack for effective recovery.
- **Winch compatibility:** The ARB Deluxe Sahara Bull Bar features the option of fitting a winch and is designed and tested to endure and exceed loads increased by the use of a snatch block.
- **Mounting system:** Specifically engineered to spread impact and winching loads evenly over the vehicle's chassis. This ensures the bull bar functions properly in extreme conditions.
- **Safety first:** ARB bars are compatible with vehicles OE safety systems including air bags, parking sensors and collision avoidance.
- Colour coding option available in Australia.

SPARTANBAR

⚙️ LET’S TAKE A CLOSER LOOK

- **Produced green:** Manufactured from environmentally friendly, recyclable polyethylene polymer.
- **Designed for style & functionality:** Styled to maintain the vehicle's aesthetic appearance, with side wing under body protection.
- **Weight related savings:** Weight savings provide improved fuel economy and reduced tyre, suspension and brake wear when compared to other alternatives.
- **Mount points:** Accommodates a large range of driving lights, as well as an antenna mount.
- **ARB Compatibility:** Compatible with ARB Under Vehicle Armour (UVA) and ARB Under Vehicle Protection (UVP), as well as ARB Recovery Points.
- **Hollow construction:** Superior frontal protection, due to the impact absorbing design.
- **Jack Points:** Removable off road jacking points available as an option with winch bars only.
- **OE Compatibility:** Compatible with OE features such as airbag, safety and ADAS features.
- **UV Stabilised polymer:** Material increases durability, and also provides minimal repair costs after impact and reduced general maintenance.

STEALTHBAR

⚙️ LET’S TAKE A CLOSER LOOK

- **Produced green:** Manufactured from environmentally friendly, recyclable polyethylene polymer.
- **Designed for style & functionality:** Styled to maintain the vehicle's aesthetic appearance, with side wing under body protection.
- **Weight related savings:** Weight savings provide improved fuel economy and reduced tyre, suspension and brake wear when compared to other alternatives.
- **Mount points:** Accommodates a large range of driving lights, as well as an antenna mount.
- **ARB compatibility:** Compatible with ARB Under Vehicle Armour (UVA) and ARB Under Vehicle Protection (UVP), as well as ARB Recovery Points.
- **Hollow construction:** Superior frontal protection, due to the impact absorbing design.
- **Jack Points:** Removable high lift jack points available as an option with winch bars only.
- **OE compatibility:** Compatible with OE features such as airbag, safety and ADAS features.
- **UV stabilised polymer:** Material increases durability, and also provides minimal repair costs after impact and reduced general maintenance.

SIDE PROTECTION

Protect your vehicle's side and sill panels from rocks and road debris.

ARB's range of side protection products will protect your vehicle from obstacles small and large, while providing easy access to those hard-to-reach areas of your vehicle.

Superbly engineered chassis mounting systems distinguish ARB side protection gear from the standard steps commonly fitted to 4WDs.

Designed and manufactured to ensure compatibility with side air bags and modern vehicle safety systems, ARB side rails and steps come as individual components, allowing for steps to be fitted without rail assembly if required (model dependent).

SIDE RAILS & STEPS

Side rails and steps provide outstanding protection while allowing easier access to your vehicle. Manufactured for fitting to Summit MKII and Deluxe Bull Bars, the Summit Side Rails and Steps have a 60.3-millimetre tube and plastic single-bolt system and the Deluxe options have a 47.6-millimetre tube and steel clamshell three-bolt clamp.

ROCK SLIDERS

Side sill protection on the most challenging terrain. Available for specific vehicle models, Rock Sliders protect door sills from ruts, rocks and other debris.

PROTECTION STEPS

Easier access and further protection against on road and off road debris and obstacles.

DIFF COVERS

If you drive off road, it's not a matter of if, it's a matter of when you will hit a hazard and this may inflict expensive damage to your differential.

ARB's Differential Cover provides increased protection over factory diff covers, giving you the peace of mind to tackle more challenging terrain.

LET'S TAKE A CLOSER LOOK

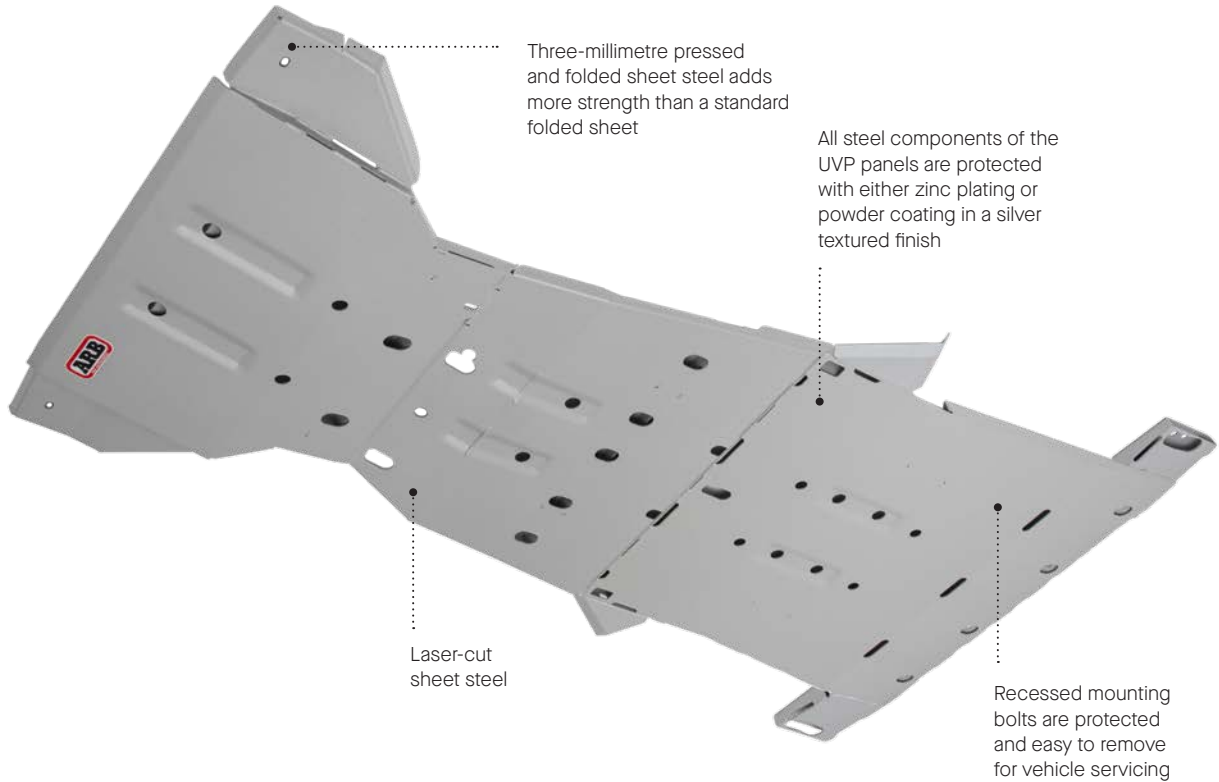

- Approach/departure angle optimised by angled exterior surface.
- High-powered neodymium magnets used to collect metallic wear particles as the vehicle moves.
- Low-profile drain plug design resists damage from obstacles.
- Combination of high filler point and dipstick allows the oil to be checked for water contamination without having to drain the oil.

UNDER VEHICLE PROTECTION

Protect the underbody of your 4WD from rocks, stumps and ruts encountered in the most challenging terrain.

ARB's custom-engineered Under Vehicle Protection shields vital components like the steering, sump, transmission and transfer case. Unlike factory bash plates, ARB's protection offers superior defence.

UNDER VEHICLE ARMOUR

ARB's UVA, made from ultra-strong crosslink polymer, is both durable and impact resistant.

It provides great coverage to help protect, while also being easy to install and remove for servicing and is compatible with the OE bumper, as well as bull bars, and recovery points.

Heat-resistant, non-corrosive UV-stabilised crosslink polymer

Manufactured at a reduced weight that will ultimately reduce the wear and tear on your tyres, suspension and brakes

Compatible with ARB Recovery Points

Reinforcing bracketry to protect underbody components against impact

DRIVING LIGHTS

DRIVING LIGHTS

With so many LED lighting options on the market, choosing the right one for your 4WD can seem daunting. Questions to consider may be:

- What driving conditions am I likely to encounter?
- How much space do I have available to mount lights on my vehicle?
- Do I prefer the look of round lights or a light bar?

The benefits of round lights
Customisation options. The freedom to choose either spot or flood beam (or a combination of both).
The option of large or small round driving lights means more flexibility, regardless of the type of bull bar your 4WD has.
Most modern bull bars have ready-to-mount access points for fitting round driving lights.
The benefits of a light bar
Flexibility in mounting options. Due to their lower profile, light bars can be mounted on a bull bar or roof rack.
Choosing a combination light bar means you have the best of both worlds. Two types of reflectors provide good penetration down the road as well as great peripheral light out to the sides.
The benefits of IQ lights
Provides ultimate control with the ability to modify the light beams from super spot to super flood depending on driving conditions.

Can't decide?

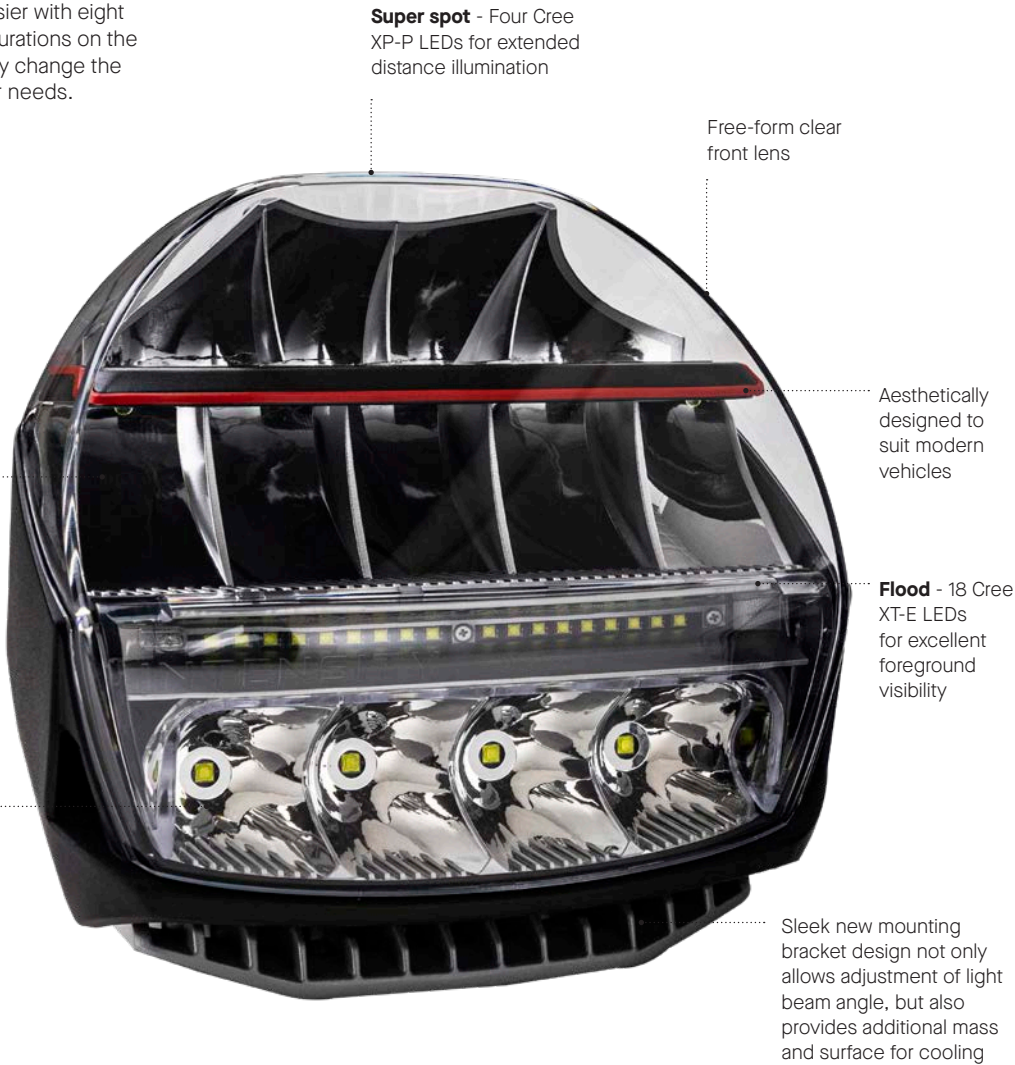

We've taken the guess work out of it. Instead of confusing you with hundreds of options, ARB has designed an uncomplicated range of driving lights that perform so well, regardless of their shape or size, you can simply choose what you think looks best on your 4WD. It's as easy as that!

INTENSITY IQ

The ARB Intensity IQ lights provide a new standard in driving light technology.

Changing your light beam on the go has never been easier with eight different preset configurations on the IQ controller to instantly change the Intensity IQ to suit your needs.

Super spot - Four Cree XP-P LEDs for extended distance illumination

Free-form clear front lens

Aesthetically designed to suit modern vehicles

Flood - 18 Cree XT-E LEDs for excellent foreground visibility

Spot - Two Cree XM-L3 LEDs and three XP-P LEDs for extended distance illumination

Mid-range - Four Cree XM-L3 LEDs to illuminate the mid-range area

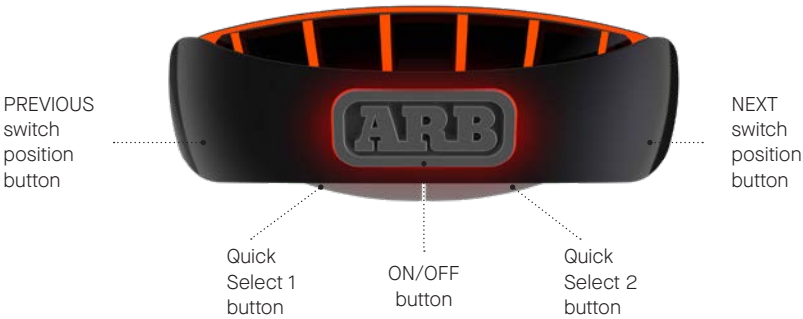

Sleek new mounting bracket design not only allows adjustment of light beam angle, but also provides additional mass and surface for cooling

IQ Controller Functions

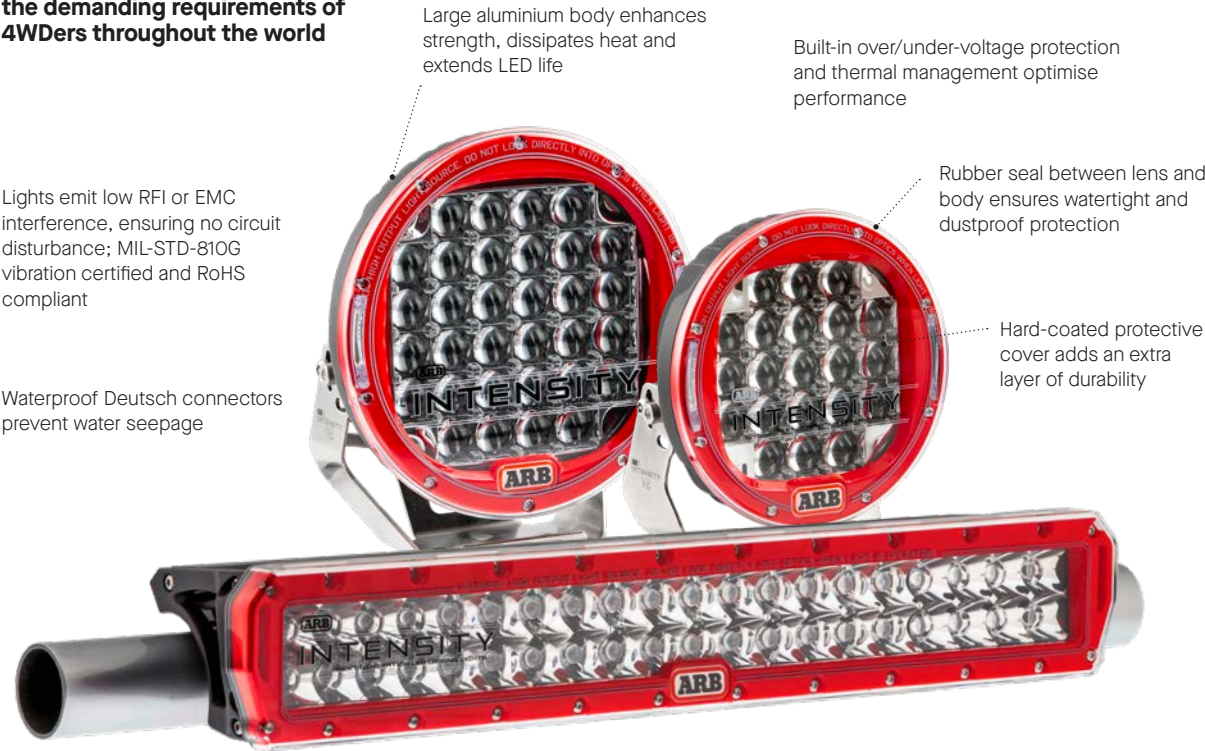

- Turn on/off driving lights
- Provide eight selectable and customisable preset light beams*
- Disable courtesy light function
- Turn on/off Euro mode (light beam complying UNECE149)
- Restore factory settings

*Can be customised by Intensity IQ app

INTENSITY

Specifically designed to meet the demanding requirements of 4WDers throughout the world

Round Light Features

- Multi-position stainless steel mounting bracket offers versatile installation, reduced vibration and added strength with TIG welding.
- Available in spot and flood beams, with 21 or 32 LEDs lasting 50,000+ hours.

Light Bar Features

- Cast aluminium end caps with a Gore® breather allow air expansion while blocking water and dust.

- Stainless steel fasteners secure lights for strength in all road conditions; tube mount fasteners are recessed for added security.
- Mounting kits suit 476-millimetre, 60.3-millimetre and 76.1-millimetre tubes, designed for ARB bull bars, with aluminium construction and stainless fasteners to reduce vibration.
- Pedestal mounting kit available for bull bar pan or roof installations.

INTENSITY LIGHTS COVERS

Protective covers available for the Intensity range. Available in amber, black and clear. One clear cover is included in the kit.

INTENSITY SOLIS

Packed with features, Intensity soils deliver powerful performance and lasting reliability, all at an expectational value.

Available in spot and flood

IP68 waterproof rating and intelligent active thermal management

Over 1,000 metres of light at one lux

Five-stage brightness settings via a digital touchpad for greater light output customisation

SOLIS LIGHT COVERS

Protective covers available for the Intensity Solis. Available in amber, black and clear. One clear cover is included in the kit.

NACHO®

Light your way with NACHO® driving lights.

The NACHO® driving lights range is tough, innovative and flexible, allowing you to customise your vehicle. With two driving light options, NACHO® Grande and Quatro, your possibilities are endless.

NACHO® QUATRO

Cutting-edge lighting performance in a durable and compact four-inch pod design, redefining traditional off-road lighting

The polycarbonate exoskeleton maximises airflow with forced air induction, ensuring optimal cooling, LED protection and extended lifespan

Built-in module allows users to customise light output and patterns

A patented universal mounting system simplifies installation, allowing surface mounting or direct mounting on 1.5-inch tubes

IP68 rating, the NACHO® Grande is protected against dust and water ingress

Trail Running Light (TRL) provides enhanced trail visibility and feature a low power mode for a safe glow without glare

NACHO® GRANDE

Built with robust materials to endure tough environments, ensuring reliability and peace of mind during off road adventures

NIGHT HAWK DRIVING LIGHTS

ARB stocks a range of Night Hawk lights to guide the way through your next night-time escapade!

NIGHT HAWK VARIABLE SERIES LED DRIVING LIGHTS

Bushranger developed the Variable Series LED driving lights to give users complete control. Offering three model variants:

VLI (Variable Light Intensity)

Let's you adjust output across eight brightness setting, all controlled by a single rotary dial

VCT (Variable Colour Temperature & Light Intensity)

Allows you to choose from eight brightness levels and eight colour settings, all easily controlled with a backlit dual dial.

VBP (Variable Beam Pattern & Light Intensity)

Offers eight beam patterns and eight brightness settings, all adjustable with a backlit dual dial to match terrain

LED LIGHT BARS

A range of LED light bars that provide maximum light dispersion in all conditions.

PROTECTIVE COVERS

Available in orange and clear models to suit driving lights and lights bars.

WINCHES

CHOOSING A WINCH

Selecting the right winch for your vehicle can be tough. With so many options to choose from, and being such a vital investment, it's important to ensure you get the right one.

Some things to consider when choosing a winch:

- Your winch should be rated at least 1.5 times the GVM of your vehicle.
- The design of your bull bar may affect the model of the winch that can be fitted.
- Your bull bar may be rated to fit only certain capacity winches.
- Your preference for synthetic or steel rope will affect the choices of winches available.

Check out our comprehensive comparison table on the facing page. However, we recommend visiting your local ARB store before making your choice. Our in-store 4WDing experts live and breathe the off road life and are ready to get you on the tracks with the perfect winch to match your lifestyle and budget.

WARN WINCHES

Portable. Versatile. Dependable.

Designed to perform in the most strenuous situations imaginable. Warn has demonstrated constant innovation throughout their history, investing heavily in state-of-the-art testing equipment to ensure their products perform brilliantly, irrespective of the environmental conditions.

ZEON PLATINUM

An advanced wireless remote controls the winch, clutch and so much more.

The Zeon Platinum is the future of winching. Featuring wireless remote control and available with steel or Warn Spydura synthetic rope, it is available in 8,000-pound, 10,000-pound and 12,000-pound capacity.

The series wound motor with a larger armature featuring 15% more copper than other models provides incredible pulling power and a new brush assembly design ensures a long service life. A convertible control pack can be attached to the winch or remotely mounted, allowing for various winch mounting options and looks.

The Zeon Platinum Winch is finished in a satin black powder-coated exterior and is IP68 rated, offering the highest level of water and dust ingress protection. A remotely operated clutch makes winch operation far easier and will automatically engage if the winch is inactive for longer than five minutes.

The lightweight, large diameter winch drum reduces rope wear and has an integrated rope anchor for easy rope installation.

Smoother, quieter and stronger, sealed with an IP68 rating making the Zeon range ready for serious action.

ZEON PLATINUM 10 & 10S

ZEON PLATINUM 12 & 12S

ZEON

Will pull you through the toughest recovery, time and time again. Features a heat dissipating brake, smooth planetary gear train, faster line speed and sleek design. For owners with heavily loaded off road vehicles.

ZEON 8 & 8S

ZEON 10 & 10S

ZEON 12 & 12S

VR EVO

Evolved to deliver more value. Warn's VR EVO range offers customers the Warn name but at a lower budget.

Available in 8, 8S, 10, 10S, 12 and 12S.

The VR EVO range features the sleek Warn styling, is available with steel or synthetic rope and is IP68 rated. The remote uses a long-lasting li-ion battery and is optioned to be used for wired and wireless operation, simply hold the mode button for two seconds to toggle.

- Fast under load and lower amp draw
- Strong pull-by-layer
- Rugged tie plate for structural integrity

VR EVO 8 & 8S

VR EVO 10 & 10S

VR EVO 12 & 12S

BUSHRANGER WINCHES

REVO WINCH

Incorporating tough construction, low current draw, four-stage oversized gearing with fast line speeds and an advanced proportional friction braking system, the Revo will reliably hold 100% of the rated load with no slippage.

The zero drag braking system allows for fast no load line speeds, making unspooling the rope a breeze.

- Features:
- Four-position motor clocking for versatility during fitting
 - Durable black powder-coat finish
 - IP67 protection with a fully sealed motor, gearbox and drum
 - Multi-mount control box
 - Sealed 500-amp contactor
 - Easy-to-use, spring loaded, cam-style clutch mechanism
 - Extra wide gears improve load distribution for less wear
 - Externally adjustable, 16-position gearbox rotation for ease of fitment and use

BUSHRANGER COVERT

A premium design with a stylistic and discreet look that seamlessly blends into 4X4 vehicles for a covert appearance. Engineered and proven in Australia, this winch is built to withstand the harshest environments using the highest quality components and rigorous testing methods, ensuring reliability and longevity.

Available in 10, 10S, 12 and 12S

SMITTYBILT

SMITTYBILT

The Gen 2 Smittybilt X20 10,000-pound winch has all the muscle and peak performance to keep you moving in just about any situation.

With 28 metres of synthetic rope as standard, waterproof design, outstanding performance, a 218:1 gear ratio that delivers lightning fast speed and the backing of a limited lifetime warranty, you can count on the Gen 2 X20 10 to extract you from the stickiest of situations.

RECOVERY

CHOOSING THE RIGHT RECOVERY

ARB has you covered with a range of recovery equipment and accessories.

Some want 100% self-sufficiency – the ability to get themselves out of any situation. Others travel in groups and know that recovering a mate is all part of the fun. Regardless of how you recover, ARB can fit you out.

Before choosing your recovery equipment, consider the following:

- What sort of terrain do you expect to encounter?
- If you intend to travel alone, do you still want the ability to help out fellow 4WDers who might be stuck?
- How heavy is your vehicle?
- Are you using your recovery equipment regularly?
- Have you considered your recovery equipment budget?

ARB's recovery range guarantees you get what you want and what you need.

RECOVERY POINTS

ARB has been at the forefront of establishing an industry benchmark for how Recovery Points are designed, tested and selected by 4WDers.

ARB's Recovery Points address issues surrounding generic tow points and their unsuitability for a range of recovery situations. ARB Recovery Points are rated for use with an eight-tonne recovery strap and a 4.75-tonne bow shackle and can safely handle side loads on angles up to the maximum turn angle of the front wheels.

ARB determines the most suitable location for each individual vehicle's Recovery Points, using a soft or bow shackle and a snatch strap with the abovementioned ratings and a breaking strength of 8,000 kilograms. When it comes to Recovery Points, you can trust ARB for the safest, most reliable option.

SNATCH BLOCKS

In certain circumstances, a snatch block can be your best friend.

When using a winch, you can use a snatch block to change the direction of pull. That means you can pick the strongest tree as the anchor, even if it's not in the direction that you want to go. Snatch blocks are also used for double line pulls, which effectively doubles the power of the winch.

SNATCH BLOCK 9000

The Snatch Block 9000 is manufactured from high-strength, low-density materials, making it strong but lightweight and ideal for competition purposes.

9000 SPECIFICATIONS	
Working Load	9,000kg
Breaking Strength	17,500kg
Side Plate Material	6mm cold rolled steel
Pulley Material	Specialised polymer
Pulley Diameter	110mm
Cable Size	8mm-13mm
Weight	2.4kg
Greaseable	Not required

SNATCH BLOCK 7000

The Snatch Block 7000 is suitable for a variety of 4WDing uses and is greaseable to ensure smooth pulley operation.

7000 SPECIFICATIONS	
Working Load	7,000kg
Breaking Strength	14,500kg
Side Plate Material	5mm cold rolled steel
Pulley Material	Solid billet steel
Pulley Diameter	93mm
Cable Size	6mm-12mm
Weight	3.5kg
Greaseable	Yes

STRAPS

SNATCH STRAPS

An ARB Snatch Strap is similar to a tow rope but is designed to stretch under load for maximum performance and safety. It is a very effective method of extracting a bogged or immobilised 4WD when a second vehicle is present.

The unique design of the strap allows it to stretch and return to its original length, aiding recovery and greatly reducing the likelihood of vehicle damage. Rather than work like a massive elastic band, it acts in a similar way to a shock absorber.

ARB snatch straps come in three different ratings to suit various vehicles and conditions. Note: the strap should be rated two to three times the weight of the vehicle being recovered. The 8,000kg snatch strap meets the needs of most vehicles.

SPECIFICATIONS			
Part Number	ARB705	ARB710	ARB715
Minimum Breaking Strength	8,000kg	11,000kg	15,000kg
Length	9m	9m	9m
Width	60mm	80mm	110mm
Stretch	20%	20%	20%
Material	100% nylon	100% nylon	100% nylon
Reinforced Eyes	Yes	Yes	Yes
Eye and Seam Protector Sleeves	Yes	Yes	Yes

WINCH EXTENSION STRAPS

An ARB Winch Extension Strap is a lightweight, non-stretch strap that is perfect for extending the length of your winch's cable when the most suitable anchor point is out of reach.

SPECIFICATIONS		
Part Number	ARB720	ARB725
Minimum Breaking Strength	4,500kg	8,000kg
Length	20m	20m
Width	55mm	80mm
Material	100% polyester	100% polyester
Reinforced Eyes	Yes	Yes
Eye and Seam Protector Sleeves	Yes	Yes

STRAP WRAP

The Strap Wrap simply stops your strap from unravelling when not in use for neat storage.

TREE TRUNK PROTECTORS

When using a tree as an anchor point in a recovery situation, wrapping cable, rope or chain around it causes damage to both your equipment and the tree. Protect the environment and your equipment.

SPECIFICATIONS		
Part Number	ARB730	ARB735
Minimum Breaking Strength	12,000kg	12,000kg
Length	3m	5m
Width	80mm	80mm
Material	100% polyester	100% polyester
Reinforced Eyes	Yes	Yes
Eye and Seam Protector Sleeves	Yes	Yes

KITS & BAGS

ARB's vehicle recovery accessories are engineered and manufactured to the highest standards, making them ideal for recreational, commercial and competition use.

RECOVERY KITS

For maximum peace of mind and security, an ARB Recovery Kit has you covered. There are three kits to choose from, depending on your individual needs.

PREMIUM RECOVERY KIT

ARB's Premium Recovery Kit comes in a large recovery bag and provides peace of mind for almost every recovery situation. It includes:

- Snatch Strap
- Winch Extension Strap
- Tree Trunk Protector
- Snatch Block
- Recovery Damper
- Bow Shackles
- Gloves

ESSENTIALS RECOVERY KIT

ARB's Essentials Recovery Kit is a step up from the Weekender option and includes recovery equipment for your basic winching needs. Housed in a compact recovery bag, it includes:

- Snatch Strap
- Tree Trunk Protector
- Snatch Block
- Bow Shackles
- Gloves

WEEKENDER RECOVERY KIT

ARB's Weekender Recovery Kit is an introductory kit with the minimum recovery gear you need to hit the tracks. Stored in a small recovery bag it includes:

- Snatch Strap
- Bow Shackles
- Gloves

RECOVERY BAGS

LARGE RECOVERY BAG

RB's Large Recovery Bag is designed to fit a complete Recovery Kit including snatch strap, tree trunk protector, recovery damper, winch extension strap, snatch block, bow shackles and gloves.

SMALL RECOVERY BAG

The Small Recovery Bag is a multi-purpose bag that suits a variety of equipment, from recovery gear to camping supplies.

COMPACT RECOVERY BAG

Perfect for carrying a single strap and shackles, and small enough to fit under or behind a seat or in the back of a drawer system.

MICRO BAG

Ideal for smaller items such as a snatch block, drag chains, shackles and general recovery items.

JACK

Safety and ease of use in one - JACK has it all.

Engineered by ARB, JACK adds hydraulic technology to the recovery scene. Gone forever is the extensive effort required to operate a mechanical jack, inch by inch. Gone forever is the dread felt when faced with the trickiest of recovery missions.

JACK kicks into action when even the lightest force is applied to the handle. The hydraulics smoothly jack up the vehicle at up to 13-millimetre increments with each downward manoeuvre. At the same time, a black rubber body bumper shields the vehicle from risk of damage during the recovery.

Then JACK’s easy-to-access, simple-to-operate, red lowering lever ensures lowering the vehicle is achieved swiftly and safely thanks to the two-stage descent feature and safety stop. With a press of the two-stage lever, a slow or rapid descent can be achieved.

FEATURES

- Body made out of 6061 T6 aluminium for maximum strength
- Nine hooking points offer the adjustable hook a wide range of lifting heights
- Capable of lifting up to 2,000 kilograms
- Body can be rotated 360 degrees to align the pivoting foot to match the terrain

SPECIFICATIONS

Minimum Lifting Height	160mm
Maximum Lifting Height	710mm-1,230mm
Travel	540mm-550mm
Lifting Range	160mm-1,230mm
Maximum Capacity	2,000kg
Compressed Height	890mm
Extended Height	1,432mm
Weight	10.5kg
mm per Stroke	Up to 13mm

JACK BASE

Spreads the load on softer surfaces such as mud or sand. It can also be used as a shovel or wheel chock.

HI-LIFT JACKS

The original “farm jack”, the Hi-Lift Jack is a tried and tested off road jack, offering multiple uses in a variety of situations.

It is rugged and versatile, and has a lifting capacity of 1,050 kilograms. Both the original Hi-Lift and Hi-Lift X-treme have become staple recovery items amongst 4WDers all over the world.

FEATURES

- Comes complete with an adjustable top clamp/clevis for use in clamping and winching
- Safety bolt is designed to shear at 3,175 kilograms
- For speedy disengaging, lifting unit automatically drops away when load is removed
- 11-centimetre long lifting nose for positive contact with load
- Steel bar can be reversed for extra long life
- Low pick-up of 11 centimetres

SPECIFICATIONS

	Original	Original	X-treme	X-treme
Part Number	ARB203	ARB204	ARB303	ARB304
Weight	12.8kg	14.2kg	14.0kg	15.5kg
Width	12.7cm	12.7cm	12.7cm	12.7cm
Height	128.9cm	156.9cm	128.9cm	156.9cm
Depth	24.5cm	24.5cm	24.5cm	24.5cm
Lifting Capacity	1,050kg	1,050kg	1,050kg	1,050kg
Clamping Capacity	340.2kg	340.2kg	340.2kg	350.2kg
Winching Capacity	2,268kg	2,268kg	2,268kg	2,268kg
Maximum Lift Height @ Nose	98.1cm	126.4cm	98.1cm	126.4cm

TRED PRO

Recovery tracks are your best friend when stuck in soft, slippery terrain. Just dig in front of the tyres, slide it underneath the wheel, and you're off and away.

The ARB TRED Pro is extremely durable and resists wear. It provides the ultimate traction by maintaining a high level of pressure on the tyre whilst withstanding the flex of being under vehicle weight on less than stable ground. Its contoured ramp has been created using 4x4 tyre dimensions and tread pattern data for optimised design and function .

OTHER RECOVERY ACCESSORIES

FORGED RECOVERY HITCH

Crafted from aerospace-grade 7075 aluminium, the ARB Recovery Hitch is engineered to perform under pressure. With a massive 25,000kg side pull minimum breaking strength and tested to 55,000kg front pull, it's purpose-built for serious recovery scenarios.

Designed just for soft shackles, its smooth edges and clever shape help extend shackle life and make setup easy. Finished in a sleek, hard anodised coating and complete with a protective rubber boot, it's strong, safe, and looks the part too.

RECOVERY DAMPER

A must for safety.

While ARB's winch cables and straps are exceptionally strong, it is essential that safety precautions – such as fitting a Recovery damper – are taken to avoid injury in the event of a failure.

In the unlikely event of a wire rope or strap failure, the Recovery Damper will absorb most of the energy in the cable or strap, thereby significantly reducing the recoil.

Don't leave anything to chance.

GROUND ANCHORS

Exactly what you need when bogged in a location with no structure around to act as an anchor point. Just plough it into the ground, hook your winch to it and get yourself out of trouble.

GLOVES

Keep your hands protected during recovery situations, when working with straps, ropes, wires or even when digging or using any other equipment.

SHACKLES

Incredibly strong, Shackles are used to connect recovery equipment to the vehicle.

MAGNUM HAND WINCH

The cost-effective alternative to a vehicle-mounted winch. The compact and lightweight Magnum Hand Winch is extremely reliable, durable and effective.

DRAG CHAIN

Five metres in length, this high-tensile steel Drag Chain comes in a handy storage bucket.

SOFT CONNECT SHACKLES

Lighter, easier and safer to use to recover vehicles.

OLD MAN EMU

THERE'S SUSPENSION & THEN THERE'S SUSPENSION

Why upgrade your suspension?

Because you bought your 4WD to be a 4WD, not a car.

Modern 4WDs are being designed to be more like cars in their handling and appointment level. They are designed for a mass market that has a variety of uses for that vehicle. It may be someone dropping off and picking up kids from school every day. It could be a tradie carrying a variety of tools and equipment. Or it could be someone towing a camper, caravan or boat. Then there's the weekend warrior, tackling harder off road tracks and trails in need of greater ground clearance.

Developing a vehicle that has such a wide range of uses involves years of development and testing. Unfortunately, in the attempt to satisfy everyone, many aspects of a vehicle become compromised, and none more so than the suspension system.

Anyone who has modified their 4WD with a range of accessories, carries regular constant loads, tows a trailer or needs more ground clearance for off road adventures will get more comfort and better handling with an upgraded suspension system.

Old Man Emu provides suspension that ensures your vehicle rides the way it's meant to.

- Extra comfort
- More control
- Greater ground clearance
- Less chance of damage
- Longevity – three-year warranty

Want more comfort, control and clearance, even with a full load? Then Old Man Emu is for you.

Why upgrade with Old Man Emu?

Owned and operated by ARB, the Old Man Emu brand has its roots in off road racing. For more than 40 years, its products have been developed and tested in Australia's harsh 4WD environments.

With an engineering focus for off road comfort and on road handling, Old Man Emu supplies tailored suspension solutions for more than 200 popular 4WD vehicles. Whether it's for work or play, touring or hardcore off road, Old Man Emu has a selection of springs, shocks and associated suspension components that will transform your 4WD's ride, handling and off road capabilities.

Old Man Emu's superior qualities are recognised globally, with its products exported to more than 100 countries.

BP-51

THE BEST OF THE BEST

With comfort and control second to none, ARB's BP-51 shock absorbers provide a comfortable and compliant ride during normal driving and a more controlled ride over challenging terrain.

Designed, developed and tested entirely in house, they truly are the ultimate in comfort and control.

BP-51 is for customers who want the best in 4WD suspension. What sets it apart from others is that it's a multiple bypass shock absorber that fits everyday applications. This is because of its unique extruded alloy body where the tubes are replaced by passages within the shock body, allowing it to fit into tighter confines such as inside a coil spring.

Another feature that sets the BP-51 apart from other shock absorbers is its adjustability of both rebound and compression (offering a large range of adjustment, allowing for adaptability across a number of different loading scenarios). The result is a ride customisation that can be tailored to individual vehicle or trip requirements.

- Internal features:
- Bypass, shim-controlled, position-sensitive damping
 - Multiple compression and rebound bypass zones for smoother transition
 - Kidney bypass ports for maximum bore size and bypass flow area
 - High-performance, high-viscosity index oil
 - Polished, high-strength, high-fatigue life shims

Adjustable spring preload/ride height

High-temperature Viton and Teflon seal pack

Hard chromed shaft

Oversized, Teflon-lined, spherical bearings

ARB designs and manufactures BP-51 in house, using state-of-the-art machinery with a large group of highly skilled and specialised engineers.

Extensive dyno, real world and destructive testing is undertaken to ensure BP-51 is built to last and will handle both on and off road conditions.

Vehicle-specific applications with no fitting modifications required

Dash 6 high-temperature Teflon hose with high-flow fittings

High-pressure nitrogen reservoir with anodised aluminium floating piston

Lightweight, aircraft grade (6061 T6) aluminium for heat dissipation and corrosion resistance with type III, hard anodised finish

On-vehicle adjustment for both rebound and compression to suit varying loads and ride preferences

Impact-resistant, replaceable shaft guard

MT64

THE ULTIMATE ALL-ROUNDER

MT64 resets the bar for ride comfortability. Drawing inspiration from the Nitrocharger and BP-51 shock absorbers, MT64 blends the strengths and benefits of the two together to create the ultimate overlanding shock absorber. With enhanced safety and greater control, MT64 has the proven reliability and durability of the Nitrocharger with the premium features of BP-51.

Named MT64 for the monotube internal design with an enormous 64-millimetre inner bore diameter, this highly engineered shock absorber and strut range delivers unmatched driving experience

The MT64 shock absorber is perfect for the everyday all-rounder as it allows you to go from the coast to the work site,

from the city to off road with unparalleled tuning for consistent handling and improved control and comfort. MT64 has been designed not only for daily adventures but also for those intense off road experiences.

Large 64-millimetre internal bore allows for more oil and bigger shim stacks to reduce heat provides more control and quicker response to any bumps. This large inside area also means more piston area, which allows maximum opportunity to tune the plushness of the ride.

MT64 uses the same precision-drawn 6061 aluminium external body BP-51. Forged 6061 aluminium body caps reduce weight while maintaining strength. The use of aluminium dissipates heat more effectively than steel and hard anodizing forms a protection against stone damage and rust.

OME elected to use oversized natural rubber bushings to reduce the noise, vibration and harshness (NVH) by absorbing any small vibrations. Taking this a step further, every bushing has a specific compound exactly suited to each level of tune, ensuring a level of comfort and ride plushness not normally found in a monotube shock absorber.

Forged bodycaps provide increased strength and assist in dissipating heat.

22.5-millimetre piston rod (shaft) for incredible strength. The hard chromed piston rod ensures maximum durability and long life.

A low-friction multi-lip seal prevents the oil from getting out, while a wiper seal stops dirt and grit from getting in. The piston rod is protected using a high-density polyethylene shaft guard.

NITROCHARGER

THE ULTRA - RELIABLE PERFORMER

Nitrocharger is the everyday shock absorber. Significant advances in key componentry and valving technology mean Nitrocharger provides greater ride comfort and handling over all terrains.

In addition, vehicle-specific valving ensures the shock absorber is matched to your OME spring selection, accessory fitment and load-carrying requirements, so there's a Nitrocharger to suit your needs, no matter what the terrain or intended vehicle use.

Impact-resistant, polymer dirt shield protects the shaft from stone chips and off road debris.

Vehicle-specific bushes manufactured from polyurethane and rubber materials for extended life.

20-millimetre diameter, induction-hardened, chrome piston rod means the Nitrocharger is better able to handle the rigours of heavy loads and tough 4x4 touring than standard shock absorbers.

Triple-lip oil seal with gas retention check valve virtually eliminates contaminant damage and provides outstanding gas and oil retention.

High viscosity index oil and nitrogen gas deliver consistent damping over a wide temperature range.

High-flow piston with open apertures ensures a uniform oil flow through the disc stacks, providing dependable, fade free damping.

With compression and rebound valving on the piston and additional compression valving in the base of the shock absorber, OME engineers are able to fine-tune the Nitrocharger in ways not possible with other shock absorbers.

Heavy-gauge steel outer tube protects inner tube and piston from damage and possible performance failure.

SPRINGS

It does not take much to overload standard springs, particularly when navigating off road conditions. ARB's range of springs provide more lift, giving more clearance to the undercarriage of your vehicle and improving the load-carrying capability of your 4WD so you can tackle any terrain with confidence.

PARABOLIC LEAF SPRINGS & OME AIR BAG KIT

Parabolic Leaf Springs with an OME Air Bag Kit give you flexibility to cater for varying loads of up to 600 kilograms, so whether it's tools during the week and a rooftop tent on the weekends, OME Parabolic Leaf Springs and Air Bag Kit system has you covered.

Standard leaf springs feature multiple leaf stages for optimal weight carrying capacity; however, with Parabolic Leaf Springs, only the first leaf stages are

required. This stage is a supple leaf that gives a comfy ride while still carrying its specific weight. Pairing the Parabolic Leaf Springs with the OME Air Bag Kit means you can vary your carrying capacity simply by inflating or deflating the air bag and using this as the alternative second stage.

This can be done through the manual ball valve that comes with the air bag, or through your ARB LINX system or standalone Air Bag Control Module (purchased separately). Each air bag can handle 45psi or 300 kilograms of weight totalling 600 kilograms of additional weight on top of your constant load, which is handled by the appropriate parabolic spring.

OME has engineered a unique internal bump stop that allows the air bag to effectively be made redundant while not in use via the propriety purge valve system allowing the bag to breathe with no internal pressure at all (Opsi), which is unique to the OME Parabolic Suspension System. The engineered purge valve included with the Air Bag Kit also allows control of venting or storing air in the bag with a simple turn.

Overall, the Parabolic Leaf Spring and Air Bag Kit system provides the new standard in comfort and weight carrying adjustability for your leaf-sprung 4WD.

LEAF SPRINGS

OME Leaf Springs have been engineered to provide optimum ride performance irrespective of operating conditions.

- Increased ride comfort and longevity
- Reduced risk of sagging
- Load testing ensures the spring meets the required specification
- Reduced friction
- Reduced spring stress and increased spring life

COIL SPRINGS

OME Coil Springs can be matched to your specific load requirements and intended vehicle usage, providing you with greater control.

- Superior strength and durability
- Reduced spring stress
- Enhanced spring life
- Multiple applications
- Designed and manufactured in Australia

OME ACCESSORIES

STEERING STABILISERS

Steering Stabilisers (also known as dampers) reduce the effect of wheel vibration and improve the feel, handling and control of your vehicle. They also reduce the aggressive rotation of the steering wheel over rough roads without affecting steering wheel return. Stabilisers are not required for every vehicle. They are suited to older style live axle suspension systems.

GREASEABLE SHACKLES & PINS

If your Old Man Emu 4WD suspension system includes leaf springs, the Old Man Emu urethane bushes that are part of the system require regular lubrication to ensure longevity. Old Man Emu Greasable Shackles and Pins allow for easy on-vehicle greasing during regular servicing.

UPPER CONTROL ARMS

Old Man Emu Front Upper Control arms are available for a range of popular 4WDs to ensure correct alignment of the front suspension and cater for the geometry change when an IFS vehicle is fitted and lifted with a suspension kit.

This essential product has been engineered for use with Old Man Emu GVM upgrades and include a forged ball joint housing, free pivoting grease and maintenance-free GIIRO bushings.

TORSION BARS

Old Man Emu Torsion Bars are designed to carry the load of winches, bull bars and dual batteries while maintaining wheel travel.

With a higher spring rate than factory torsion bars, they improve your vehicle's ride and handling, both on road and off.

BUSHES

ARB offers a variety of Old Man Emu urethane and rubber Bush Kits for shock absorbers, leaf springs, panhard rods, control arms and sway bars. Features such as our exclusive splined leaf spring bushes and Caster Correction Kits ensure correct geometry and ultimate performance.

HARDWARE

ARB has a range of vehicle-specific Old Man Emu hardware including U-bolts, centre bolts, spring liners and trim packers to complete your suspension system.

GVM UPGRADES

Available for new unregistered vehicles, GVM stands for Gross Vehicle Mass and is the maximum weight your vehicle can weigh. Everything you place on or in your vehicle, such as fuel, accessories, cargo (including passengers), the tray body for cab chassis models and even the tow ball load applied by a boat or camper trailer, adds to the overall GVM.

Equipping and packing your 4WD for remote area travel or outfitting it as a workhorse can result in your vehicle's standard GVM being inadequate.

When providing GVM upgrades, ARB ensures that the increase in a vehicle's GVM following the fitment of a complete suspension system meets the minimum ADR safety requirements.

Once the approved suspension system and GVM upgrade compliance plate have been fitted to your vehicle by an authorised Old Man Emu installer, it can then be registered according to its new increased GVM. This process ensures that your vehicle is GVM legal in all states of Australia.

Please check <https://www.arb.com.au/old-man-emu-4x4-suspension/gvm-upgrades/> for available GVM upgrades.

FRONT AXLE UPGRADES

The final weight over the front axle of your vehicle is often determined by the weight over the rear axle, as more rear axle weight will reduce the downward pressure over the front axle.

Therefore, loading and unloading of weight on the rear of a vehicle, such as unhitching a trailer or removing your touring gear, can play havoc with weight distribution across your front axles in accordance with the manufacturer's front axle load limits.

To assist in providing greater flexibility in managing load variations as you need, ARB offers a range of Old Man Emu front axle capacity upgrades for the most popular 4x4 models when installing an Old Man Emu suspension package. With up to an additional 170 kilograms of verified front axle load, tourers and tradies alike can have peace of mind that dynamic shift in weight distribution is being aptly supported across both axles.

Note: For current applications, check out arb.com.au.

AIR LOCKERS

AIR LOCKERS

Don't lose momentum.

An ARB Air Locker ensures your 4WD just keeps going, no matter the incline, no matter the conditions. You won't lose momentum – not even for a second.

- Provides the confidence to drive more difficult 4WD tracks
- Facilitates controlled descent
- Manufactured in Australia
- Race-proven technology
- Fully supported for parts and service globally
- Improved traction results in reduced track degradation
- Less chance of panel and mechanical damage
- Great for competition use

Just one push of a button and you're back on track! Extra drive instantaneously.

An ARB Air Locker solves the problem of drive being directed to a wheel that is off the ground or slipping. It replaces the factory differential centre, and when engaged, positively locks the front or rear differential providing equal drive to opposing wheels. By directing the drive to where it's needed, you get vastly improved traction allowing challenging terrain to be approached with control and confidence.

Note: Compatible with LINX

WHY FRONT LOCKERS?

A rear locker will provide your 4WD with significantly improved off road capability and allow challenging terrain to be approached in a far more controlled manner. The addition of a front locker will take your 4WD to the next level, allowing you to get the absolute best out of your vehicle.

Traversing steep, rocky terrain can be punishing on vehicles and can actually be quite dangerous, particularly if the track surface is wet and slippery. Continual wheel slippage inevitably results in the driver needing to apply more acceleration to maintain forward momentum, which can make the vehicle's stability unpredictable as the wheels scramble for traction. These scenarios also place a great deal of strain on the vehicle's drivetrain and can frequently lead to failures of mechanical components such as CV joints and axles.

A locked rear differential will vastly improve the situation, delivering equal drive to both rear wheels. But in particularly challenging situations, a loss of traction in the front can still be experienced.

Picture a steep, rutted hill with large rock ledges and the vehicle's front wheels scrambling to climb over. This scenario can lead to rollovers and drivetrain breakages as your 4WD struggles for traction. Furthermore, the front diffs and overall drivetrain architecture on some vehicles are weaker than the rear, which just exacerbates the situation.

Locked front and rear differentials in this terrain are the absolute pinnacle in terms of off road capability and safety. They minimise the strain on the vehicle and prevent degradation of the track surface.

Many 4WDs come with rear lockers as standard but their ability to lock quickly and stay engaged varies enormously. ARB Air Lockers activate in a split second and remain 100% locked until the driver deactivates them. It's this rapid engagement and overall strength that makes them so well suited to the front of vehicles. When engaged, a traditional front lock can make tight steering manoeuvres harder. With an Air Loader, you stay in control – the locker can be disengaged instantly, allowing sharp turns without compromise.

There are a whole range of scenarios where front and rear lockers will mean the difference between driving through an obstacle or having to be winched or snatched over it. Rock, mud, sand and snow, uphill and downhill... Air Lockers will become your best off road friend.

Once you've experienced this improvement in your vehicle's capability, you'll never want to be without them.

AIR LOCKER VS ELECTRONIC LOCKER

ARB's Air Locker has many advantages over conventional electronic lockers.

Electronic lockers can only be engaged at speeds up to between eight and 10 kilometres per hour. That means you have to slow or even stop to engage them – and even then, activation takes time. Imagine you're halfway up a hill and need to lock the differential. With an electronic locker you have to stop, activate and wait, which compromises your ability to get going again because momentum has been lost.

But with an ARB Air Locker, a flick of the switch gives instant lock at any moment and its super strong design allows activation at any speed.

Many modern day vehicles come fitted with a rear electronic locker. But that's only doing half the job. What about the front axle? An Air Locker fitted to the front axle provides the total package.

With an ARB Air Locker, you get:

- More drive
- Instantaneous action
- Engagement at any speed
- Greater control
- Extra strength

There really is no other option.

AIR SYSTEMS

AIR COMPRESSORS

Few 4WDers head off road without an air compressor. It provides peace of mind and certainty. ARB Air Compressors are available in both vehicle-mounted and portable kits and they're built for extreme environments.

ARB designs and manufactures its Air Compressors in house, using state-of-the-art machinery with a large group of highly skilled and specialised engineers. Tried and tested extensively to ensure you can rely on an ARB Air Compressor when out on the tracks.

Whether you're activating Air Lockers, inflating tyres and camping accessories or even reseating a tyre onto a wheel, there's a model available to suit your needs. All ARB vehicle-mounted compressors are resistant to water, dust, heat and shock to help withstand the rigours of off road travel. The portable compressors come complete with a six-metre air hose, battery clamps, inflation kit, hard-mounted activation switch, professional circuit protection and a durable carry case.

TAKE THE PRESSURE DOWN

When out 4WDing, tyre pressure can have a huge impact on your driving experience and performance, as well as longevity of your tyres and your environmental footprint. Below is a pressure guide to help you on your next getaway:

Bitumen

32-38psi

For standard size tyres, use the pressures specified on your vehicle's placard. Higher pressures will be required when carrying heavier loads.

Fast/Smooth Gravel

32-36psi

Ensure your tyre pressure isn't too low as this can result in loss of steering response and stability, especially if you're driving fast.

Slow/Rough Gravel

26-32psi

Keep in mind, the higher the speed, the more heat generated in the tyre according to your load.

Mud

22-28psi

If the mud is thick and has a loose, deep base, lower tyre pressures, avoid wheel spinning and maintain momentum. If the mud is watery and has a solid base, you can maintain high pressures, maintain momentum but never drive fast as you can lose control. If the mud is medium consistency, you need to drive with enough momentum that still maintains traction.

Sand

16-26psi

This depends on the depth and coarseness of the sand. Lower tyre pressure improves your longitudinal footprint and flotation. Sudden or heavy movements of the steering can be dangerous and speed needs to be appropriately reduced depending on depth of sand.

Rocky Gravel/Rocks

22-28psi

Always drive slowly and in low range. Lowering tyre pressure over this terrain improves traction and flexibility. Very low pressure (around 20psi or less) can create the risk of pushing the tyre bead off the rim.

Note: On-board compressors are compatible with **LINX**

Please note that these tyre measures are recommendations only and are dependent on location, weather and vehicle weight.

ARB BRUSHLESS AIR COMPRESSOR

Faster air for out there

For decades, ARB Air Compressors have set the benchmark for durability and performance, whether powering Air Lockers or inflating tyres. Now, we're taking it to the next level with our latest innovation: the ARB Brushless Air Compressor.

Engineered for maximum performance, the Brushless Air Compressor delivers up to 50% more output than our market-leading brushed models, ensuring faster inflation times and unmatched reliability on every off road adventure.

Designed for power and efficiency, built on the proven foundation of ARB's industry-leading compressors, the Brushless Air Compressor introduces cutting-edge technology that redefines air compressor performance.

Features:

- Active cooling – maintain optimal performance even during heavy use.
- Smart features – enhanced usability for a more intuitive experience.
- Maintenance-free motor – for increased life cycle.
- Efficient design – class-leading airflow-to-weight ratio for improved portability.

With faster inflation and superior durability, the ARB Brushless Air Compressor is built to keep you on the move available in

- Single and twin mounted
- Single and twin portable

Experience the next evolution in air compressor technology - only from ARB.

BRUSHED COMPRESSORS

BRUSHED SINGLE COMPRESSOR

ARB's single compressor is constructed entirely of lightweight, durable materials and features a class-leading flow rate. Available in portable and on-board.

Features:

- 12-volt Air Compressor with seven-metre (23-foot) tyre inflation hose
- Class-leading flow rate
- Sealed for moisture and dust resistance
- Hard anodised cylinder bore and teflon impregnated carbon fibre piston seal for reduced friction and maximum trouble-free life
- Quality components for quiet operation and extra long life
- Constructed entirely of lightweight, high-strength engineering grade materials
- Over-pressure safety valve equipped
- Motor is internally thermal protected against extreme temperature damage
- Heavy-duty maxi fuse equipped for professional in-line circuit protection
- Weatherproof polypropylene carry case
- Illuminated switch
- Built-in pressure switch

BRUSHED TWIN COMPRESSOR

Twice the flow, twice the speed. The twin compressor is perfect for serious 4WDers, vehicles with larger than average tyre size or for competition purposes. Available in portable and on-board.

The twin compressor comprises two single compressors, which means it has all the features of the single compressor plus the following.

Features:

- Suitable for many air tools when used in conjunction with a four-litre Air Tank (optional with on-board models)
- 100% duty cycle with fan for continuous and heavy-duty operation

ARB AIR LOCKER ACTIVATION SYSTEM

Specifically designed for those who just want a compressor to activate an Air Locker, it's compact and comes with a full wiring loom for simplified installation and plug-in connectivity to Air Locker control solenoids.

It's also suitable for running on the 12-volt accessory supply for most 12-volt and 24-volt vehicles due to its low current draw.

COMPRESSOR BRACKETS

Reliable, quality brackets to properly integrate an ARB compressor to a 4WD. Vehicle-specific brackets are available for some models with a universal option also available to suit a range of vehicles.

AIR ACCESSORIES

ARB's Air Systems range of accessories ensures you have the right component for all conceivable situations. You know they'll last – they're ARB.

TPMS

ARB's Tyre Pressure monitoring System (TPMS) monitors tyre pressure for peace of mind when 4WDing or day-to-day travel.

The ARB TPMS incorporates two functions of on road mode and off road mode. The system uses a trailer repeater (sold separately) and can monitor up to nine tyres at once.

ARB INFLATION CASE

Keep all your ARB air accessories organised and in one place. With space for all ARB inflation, deflation, gauges, hoses and general air accessories, it incorporates abrasion-resistant canvas, durable rubber handle and high-vis reflective taping for safety.

ALUMINIUM AIR TANK

The four-litre Aluminium Air Tank delivers high-volume air output suitable for rapid tyre inflation and running most air-powered tools.

AIR PRESSURE GAUGES, INFLATORS & DEFLATORS

Bronze Bourdon tube gauges accurately measure, inflate and deflate your vehicle's tyres with easy-to-read dials and protective rubber gauge guards.

Digital gauges provide finer measurement and easy-to-read displays.

AIR LOCKER MANIFOLD KIT

The Air Locker Manifold Kit enables easy installation of Air Locker solenoids.

PUMP UP KIT

Standard with the portable compressor kits, the Pump Up Kit is also an optional accessory for the mounted range. It includes quick-connect couplings for fast and easy mounting to ARB Air Compressors and accessories, a seven-metre air hose, an air accessory kit and a T-piece for in-line connection of an air chuck and pressure switch to the compressor.

E-Z TYRE DEFLATOR

The E-Z Deflator allows for the removal of the valve core for rapid tyre deflation and is available in both digital and analogue. Each are provided in a protective canvas pouch.

AIR SYSTEMS COMPONENTS

Choose from a range of air fittings, stainless braided PTFE hose and air chuck mounting solutions. Ensure your 4WD is fitted front to back with on-demand air.

AIR CHUCK WITH CLIP

ARB has a range of Air Chucks for angled or long-reach applications.

SAFARI SNORKELS

SNORKELS

Protect Your Engine from Dust & Water

A 4x4 snorkel raises the level of your vehicle’s air intake to minimise the chance of water or dust entering your engine. It transfers the air intake from under your bonnet to roof height, providing your vehicle with cleaner, fresher, cooler air.

You get maximum engine protection and less likelihood of engine damage and vehicle breakdown.

- Protects your engine from deep water/ river crossings
- Protects your engine from dust and dirt in outback conditions
- Maintains fresh air for your engine

- Prevents rainwater ingress with integrated drainage system
- UV stabilised for product reliability
- Colourfast material for maximum product life
- All stainless steel hardware

SNORKEL FEATURES

- **Ingenious design:** Safari’s Air Ram system is designed to simultaneously remove the maximum volume of water from the incoming air stream, while delivering the maximum airflow to your vehicle’s engine.
- **Durable materials:** Safari Snorkels utilise a UV-stable polyethylene body, which ensures a strong and robust fitting to the outside of your 4x4. Corrosion-resistant, stainless steel-plated hardware on all internal and external fittings and fixtures completes the treatment.
- **Vehicle specific:** Nothing fits like Safari. As a result of an intricate design process, Safari Snorkels are manufactured to integrate seamlessly.

WHICH SNORKEL IS RIGHT FOR YOU?

Safari manufactures three types of snorkel: ARMAX, and V-Spec.

ARMAX

Safari’s top-of-the-range, performance-oriented safari snorkel is designed for serious 4WD owners and those who travel off road in dusty, wet conditions:

- Lifetime warranty
- Developed to flow 30% more air than the OE air intake system
- High-flow air ducting and body ensures air supply is in excess of engine requirements
- Every component designed for maximum dust and water sealing
- Stainless steel-plated hardware for corrosion resistance
- Unique water separating Air Ram effectively disperses rain and unwanted moisture
- Works in tandem with other performance modifications
- Created from industrial spec UV-stabilised polyethylene

V-Spec

The traditional Safari Snorkel range:

- Suits popular current model vehicles
- Lifetime warranty
- Created from industrial spec UV-stabilised polyethylene

BACK OF VEHICLE

CANOPIES

Whether it's for camping, keeping equipment and tools dry and secure, or for extra storage, ARB has the perfect canopy solution for your needs. ARB canopies are built to last under all conditions. Guaranteed! Best of all, they fit your vehicle seamlessly, adding to its aesthetic appeal.

CHOOSING A CANOPY

Whether you're after modern styling, security or better organisation, we have the perfect solution for your needs. Use the handy table to find the canopy that best suits your needs.

	Ascent Canopy	Classic Canopy	Classic Plus Canopy
Full-height cab option	•	•	•
Tinted safety glass windows	•	•	•
Frameless glass windows	•		
Push-button window opening	•		
Customised window configuration	•	•	•
Central locking access	•		•
LED brake light	•	•	•
Integrated rear spoiler	•		
Internal LED light	•	•	•
Color-coding available	•	•	•
Available in smooth or textured finish		•	
Soft-touch electronic unlocking mechanism	•		•

ASCENT CANOPY

Sleek modern styling, offering the highest level of usability and comfort.

CLASSIC PLUS CANOPY

Embodying the proven designs of the Classic Canopy and engineered for versatility.

CLASSIC CANOPY

Safe and secure. Unrivalled quality, practicality and affordability.

HARDLID

The HardLid is tough, rugged, versatile and introduces the perfect starting point for further customisation.

Rated to 150 kilograms of dynamic load, the rugged ARB HardLid will transform your tub into a secure and weatherproof space for all your storage needs. The HardLid comes with ARB's innovative four-bar hinge system and has an optional premium pack that includes rails with dovetail mounting, central locking kit, interior light and upgraded heavy-duty struts.

BED RACK

The ARB Bed Rack is a tub mounting system that provides multiple storage and carrying solutions for the modern-day utility.

Utilising the unique and innovative BASE Rack dovetail mounting solution allows storage on the top and on the underside, as well as inside and outside of the Bed Rack rail.

150-kilogram dynamic load rating allows secure attachment and storage of multiple accessories

Low height profile reduces the height and wind drag for roof top tents

Multiple storage/ carrying solutions allows storage on the top, underside, outside and inside of the Bed Rack rail

Incorporates the unique BASE Rack dove tail mount system which is compatible with current BASE Rack accessories

Vehicle-specific mount kits provide additional strength to the vehicle tub and allow for tie-down points

Curved styling aesthetic with low profile for perfect vehicle integration

Corrosion resistant thanks to strong, lightweight aluminium 6063 extrusion

North-south configuration provides full tub access to allow taller items such as motorbikes and bicycles to be easily loaded

Frame design allows wiring to run inside the extrusion for top of rack or rooftop tent light and power requirements

MITS ALLOY TRAYS

Built to last.

MITS Alloy has been at the forefront of development for aluminium trays and canopies in Australia. Their products are innovative, practical and engineered to endure the demands of Australia's most extreme environments.

CNC-cut headboard window protector, guarding the cabin's rear window from debris

Finished with a textured black powder coat to protect in the harshest environments

The SHS headboard is 65 millimetres by 65 millimetres for added strength

30L capacity (gravity fed) Headboard water tank

The heavy-duty structural sub framework means your vehicle is ready to go wherever your next adventure is

The LED tail lights compliment modern vehicle aesthetics

Adjustable flared mudguards to suit different size wheels

Integrated rope tail tie-downs, making it simple and easy to secure different loads

Under tray toolboxes keep out water and dust as well as allowing an ARB compressor to be mounted

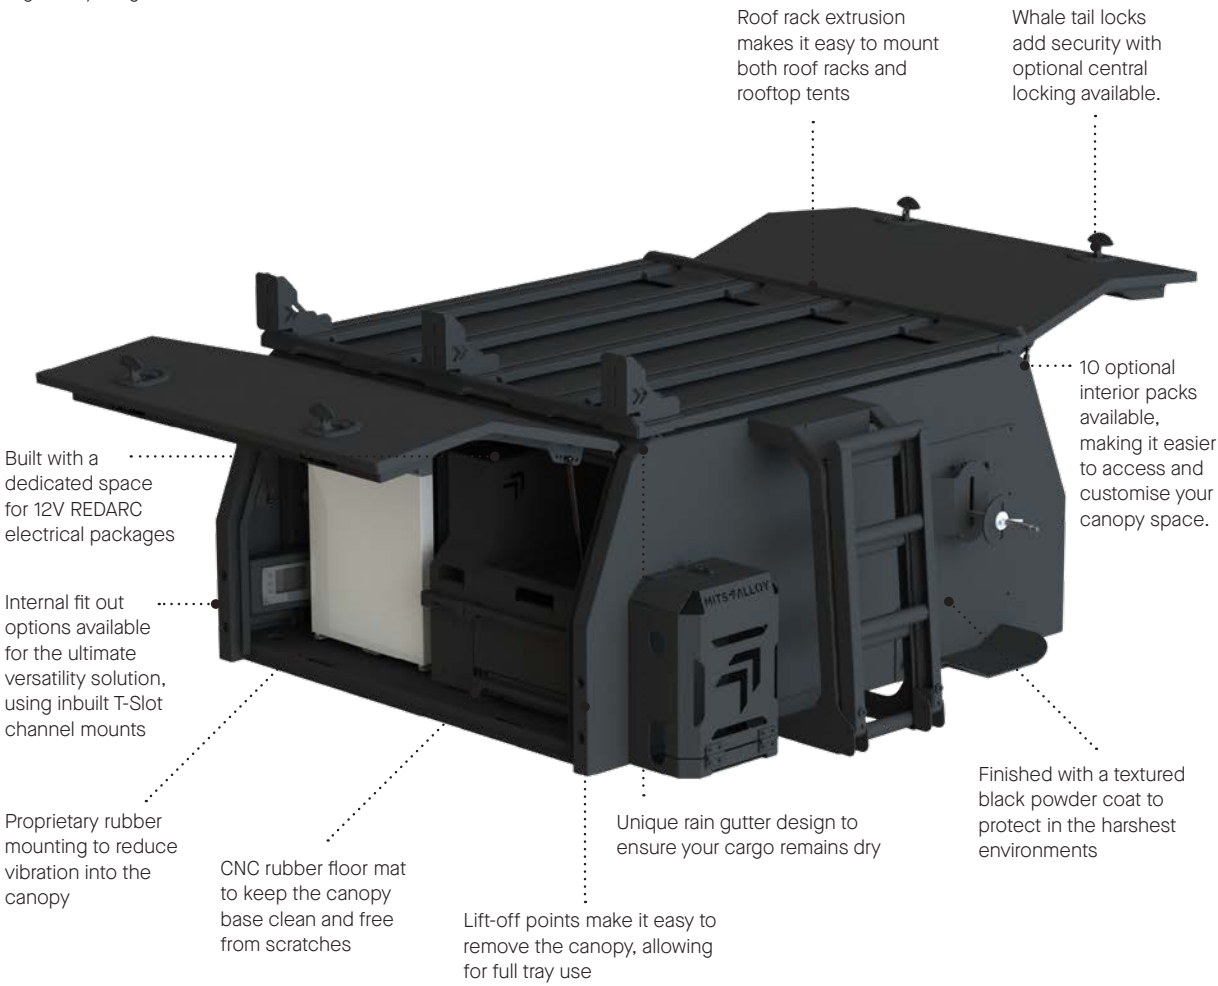

1,500-millimetre under tray drawer comes standard with a lid, making it an ideal work bench

MITS ALLOY CANOPIES

Built to last.

The perfect addition to your MITS Alloy Tray is a MITS Alloy Canopy. Providing a suite of options to mount, carry and organise your gear.

BACK OF VEHICLE ACCESSORIES

CANOPY VENT

The canopy vent is ideal for transporting animals and on other occasions when constant, cool, clean airflow is required. In addition, the vent pressurises the interior of the canopy, reducing the flow of dust through the tailgate area. The canopy vent is standard on the AscentCanopy and optional on the Classic and Classic Plus.

SECURITY MESH

The Ascent security mesh fits front or side sliding windows. It provides:

- Protection to windows from shifting or loose objects stored in the canopy
- Extra ventilation for animals
- MOLLE grid design allows for mounting essential gear, 12V controls, and quick access accessories.

The security mesh is laser cut from 2.5-millimetre solid steel sheet and powder-coated to minimise corrosion and for aesthetic appeal.

TAILGATE ASSIST

Loading and unloading is made easier with ARB's Tailgate assist which reduced the effort required to manage the weight of your tailgate. Using two different struts (model specific), the passenger side strut helps to slowly lower the tailgate and the driver side facilitates raising it. The struts have been co-developed with Stabilus, the world-renowned strut manufacturer, and ARB has designed a unique mounting system to ensure longevity.

UTE LINERS

Maintain the look and value of your vehicle, inside as well as out. An ARB Ute Liner protects the inside and tailgate of your vehicle from shifting tools and equipment. Manufactured from impact-resistant, UV-stable polyethylene, it is vacuum-formed to precise tray dimensions. It also protects against common chemicals including oil, petrol, paint and battery acid.

SPORTGUARD

The ARB Sportguard is the premium Ute Liner to protect your vehicle tub. It comes in five pieces so it's easy to remove and install. It simply snaps together with no drilling required. Features:

- Anti-slip floor
- Five-piece design for simple installation
- Multiple fitment options
- Vehicle tie-down points retained
- Contoured design maximises tub space
- Strong, durable materials

REAR BARS & TOWING

PROTECTION, PERFORMANCE & VERSATILITY

Do you need extra protection when heading off road? Would a rear step tow bar make it easier to access items from your roof rack? Or do you want the ability to tow but with added extras?

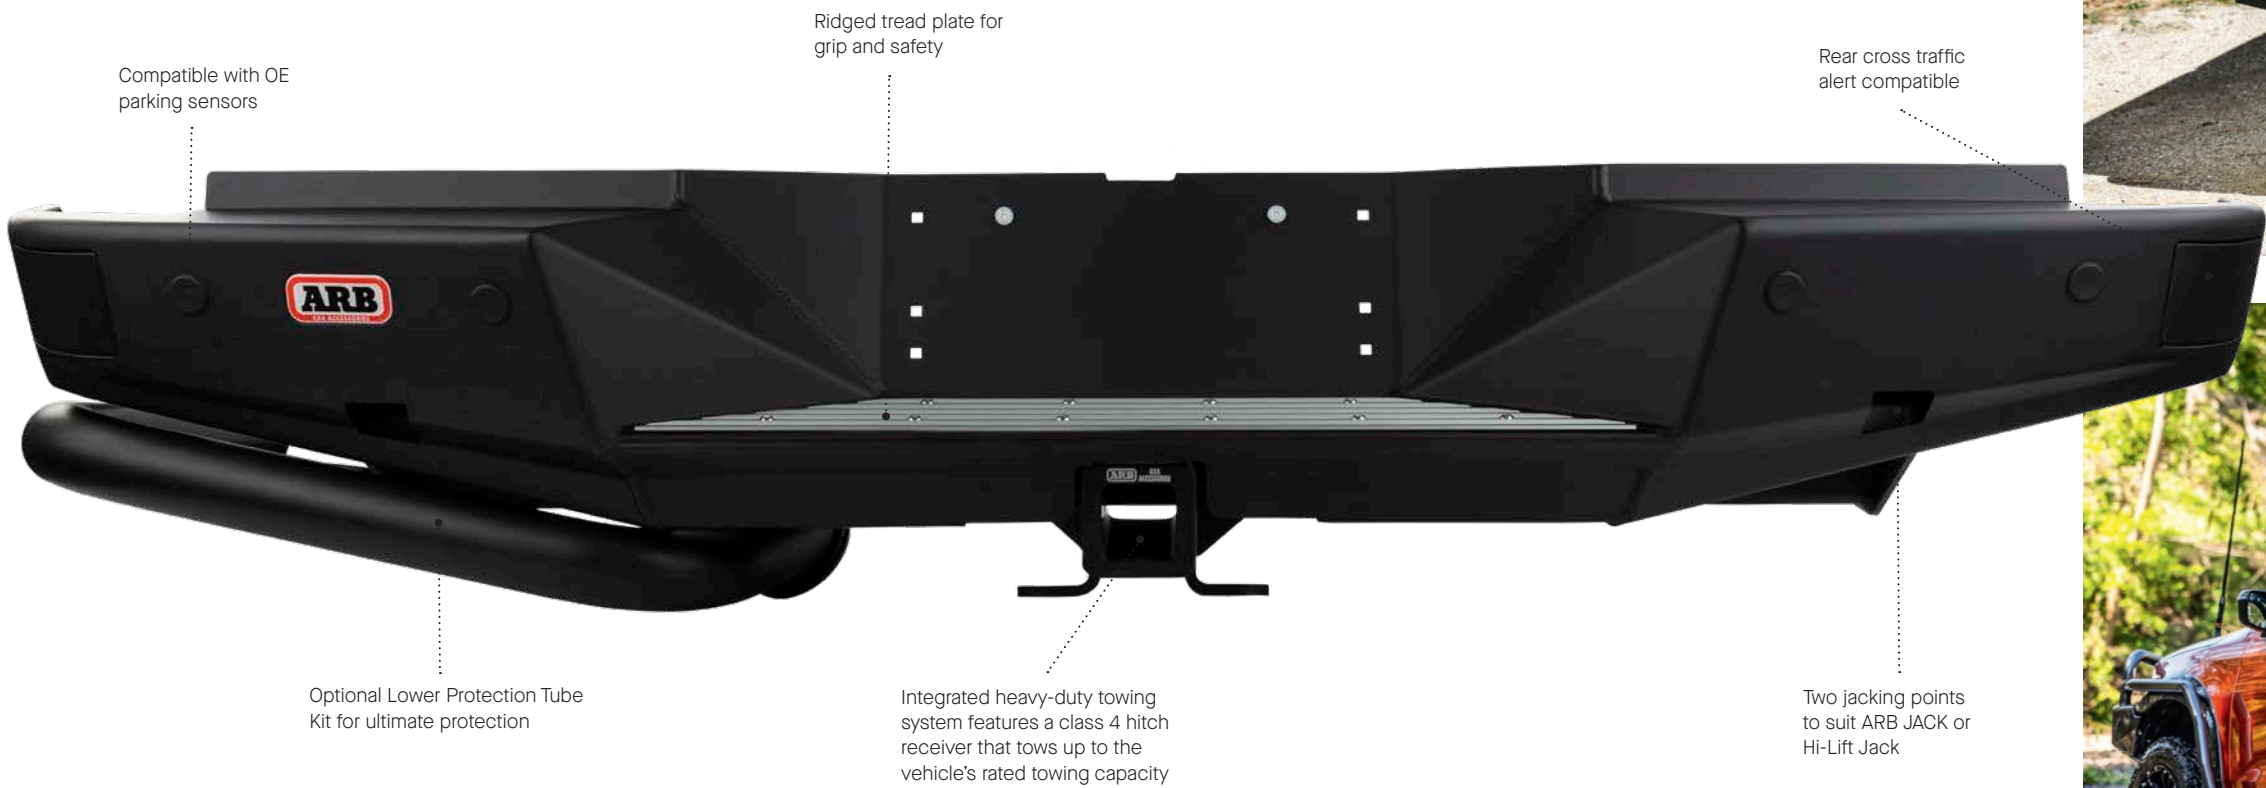

ARB's range of rear protection products provide extra functionality, peace of mind and the solution to all your towing needs. You're covered, all over. Check out the handy table below to find your perfect match.

	Summit Rear Step Tow Bar	Summit MKII Rear Step Tow Bar	Summit Raw Rear Step Tow Bar	Rear Bar	Rear Step Tow Bar	Rear Bar with Wheel Carrier	Tow Bars

SUMMIT MKII REAR STEP TOW BAR

The Summit MKII Rear Step Tow Bar (RSTB) combines design, ARB engineering and a no-compromise approach to protection and performance to the rear of the vehicle, particularly when traversing steep, rocky terrain. Compatible with the factory parking sensors and comes with optional lower tub protection.

SUMMIT REAR STEP TOW BAR

This modern, stylised RSTB provides protection, easy access to the vehicle and maximum towing capacity. It's compatible with OE parking sensors and features a textured powder-coated 60.3-millimetre tubular frame.

Steel wing panels mounted to the chassis and RSTB assembly for optimum strength and rigidity, replaceable to easily deal with the vulnerable rear tub corners when damaged (available in standard black powder-coat finish but can be colour-coded for vehicle integration)

Anodised tread panel provides grip for safe access to the vehicle tub or roof

Integrated numberplate light (model dependent)

Concealed hinged steel access panel for securely mounting trailer plug wiring, an ARB Air Compressor outlet, an ARB trailer camera wiring connection and a 50-amp Anderson plug

Styled rear diffuser panels for additional protection while adding to the modern aesthetics of the vehicle

Integrated heavy-duty towing system features a class 4 50-millimetre hitch receiver that tows up to the vehicle's rated towing capacity

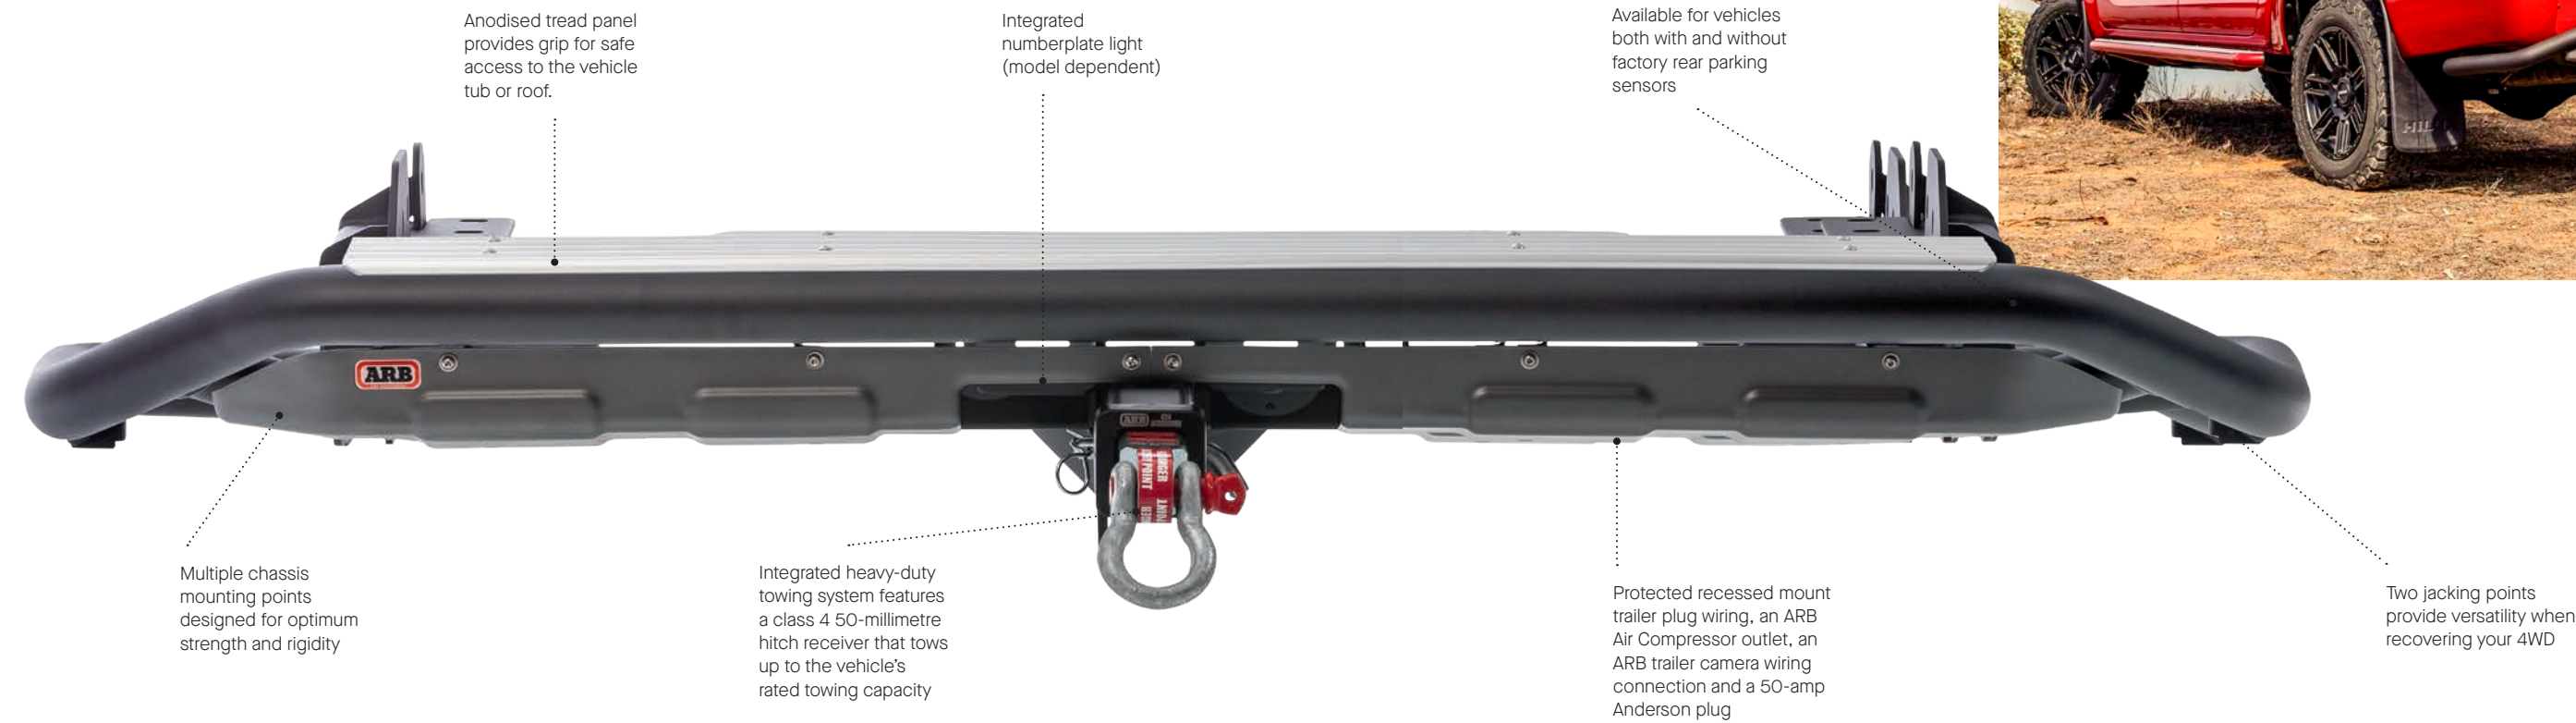

Four jacking points, one underneath each wing panel and one on either side of the rear diffuser panel, provide versatility when recovering your 4WD

Available for vehicles both with and without factory rear parking sensors

SUMMIT RAW REAR STEP TOW BAR

Based on the Summit RSTB but stripped back, the Summit Raw RSTB has a redesigned wing tube that provides protection to the lower section of the tub.

REAR BAR

REAR BAR

A Rear Bar provides no-frills rear end protection, versatility and vehicle access. Features a centre recess that allows larger tyres to be mounted on the rear door (model specific).

For wagons not requiring a wheel or jerry can holder.

REAR BAR WITH WHEEL CARRIER

Mounting your spare tyre on the back door can cause undue stress to the door assembly, while a spare wheel located underneath a vehicle can be difficult to access, more prone to damage and may affect ground clearance when driving off road.

The ARB Rear Bar With Wheel Carrier provides the solution by relocating the spare tyre onto the bumper assembly via a swing-out carrier.

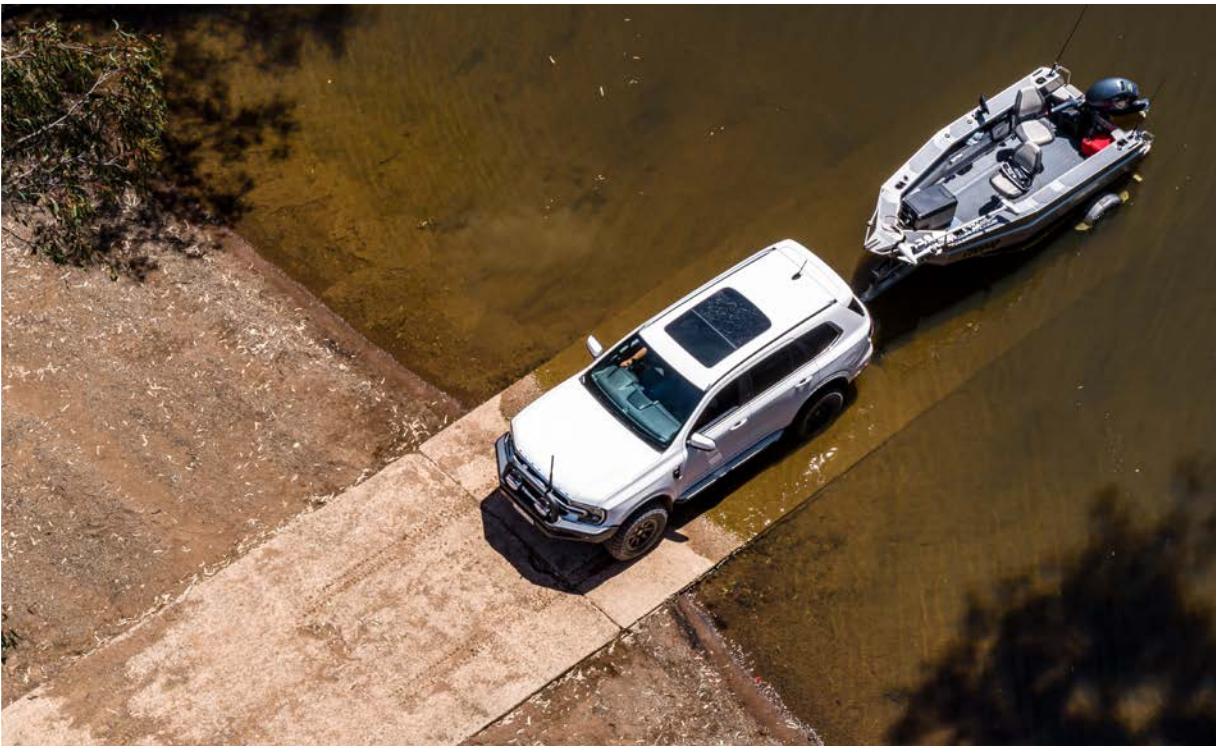

- Provides protection and convenience
- Easy access to wheel
- Avoids door assembly stress
- Maintains ground clearance

REAR STEP TOW BAR

The Rear Step Tow Bar incorporates a rated tow bar ideal for utility vehicles and tubular protection for the tub with the step section, providing easy access to the roof.

TOW-PRO ELITE

The Tow-Pro Elite sets the benchmark in trailer brake control technology. Now a third-generation product, the Tow-Pro Elite provides users with the ability to swap between proportional mode (inertia sensing) for highway driving conditions and user-controlled mode for off road driving.

TOW-PRO ELITE V3

Continuing to set the benchmark in trailer brake control technology has seen the Tow-Pro Elite become Australia's favourite and most trusted brake controller.

- Features:
- Now with even smoother braking capabilities for motorists towing heavy trailers and caravans

- Compatible with all new vehicle technology
- Newly designed remote head allows a quicker and easier installation of the Tow-Pro Elite, ensuring a proper fit into thicker and curved dashes found in European vehicles and trucks

HAYMAN REESE

X-BAR

The Hayman Reese X-Bar is a rugged, “go anywhere” tow bar engineered for off road. Providing an increased departure angle, three rated recovery points and integrated bash plates, the X-Bar is built tough for off road action.

TOW BARS

The Hayman Reese range of tow bars suits a variety of 4WD models and are designed and engineered in Australia for Australian vehicles.

The heavy-duty tow bar features a 50-millimetre by 50-millimetre square hitch receiver and is suitable for towing caravans, boats, horse floats and trailers. It also features a removable trailer ball mount.

The medium-duty tow bar is typically rated up to 1,600 kilograms and features a 40-millimetre by 40-millimetre square hitch receiver with a removable trailer ball mount.

The light-duty tow bar is typically rated up to 1,200 kilograms and is best suited for light towing and mounting bike racks.

ACCESSORIES

Hayman Reese has a comprehensive range of genuine accessories available for all your towing needs. From hitch pin locks through to spare U-bolts and R-clips, Hayman Reese has the answer.

TOWING SYSTEMS

Included in all Hayman Reese tow bars, Smartclick™ intelligent towing systems provide the latest technology wiring solutions. Each wiring loom has been engineered to suit individual vehicle applications – and it’s plug and play. Just click the smart plug and vehicle nodes together and the wiring is done.

ARB EARTH CAMPER

Pre-production model shown

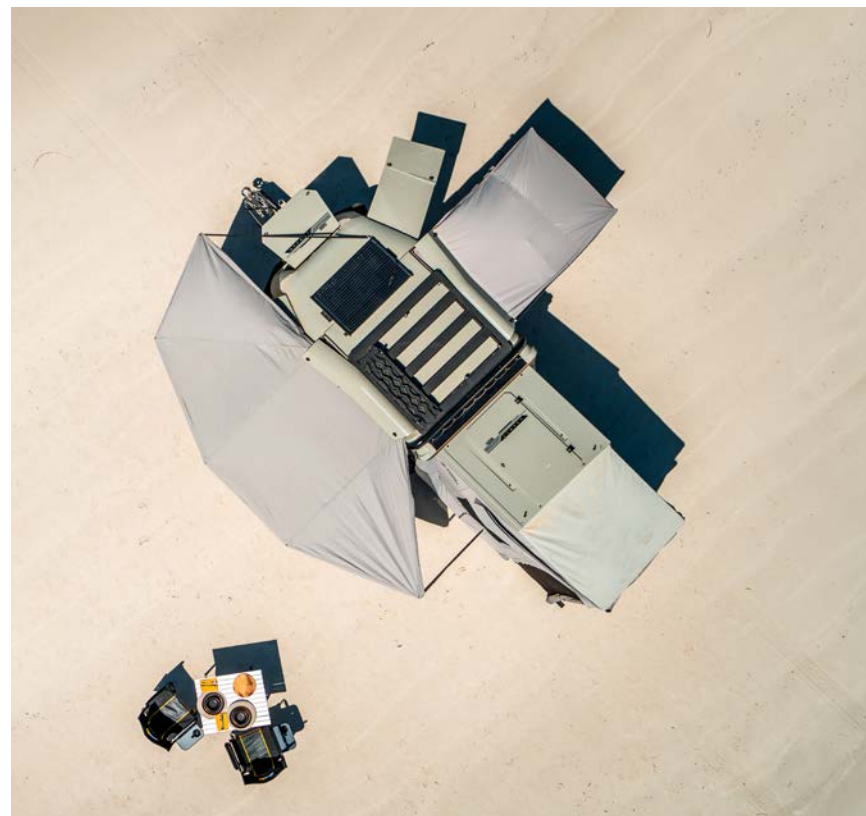

FOLLOW YOU ANYWHERE

A culmination of almost 50 years of skills, knowledge and experience across each of our product categories in the 4x4 industry has facilitated the design and manufacture of an extremely capable, compact and feature-packed off road camper trailer.

ARB's pursuit of the highest tier in both quality and functionality means you can depend on the Earth Camper to perform at the highest level – no matter where you take it.

Earth Camper is a hard roof, hard floor, compact camper with a stand-up change room and queen-size bed. The unique design separates any wet canvas away from the bedding area.

*Pre-production model shown

Equipped with an in-built, free standing awning

Includes the Earth Camper's sliding, lockable pantry drawer and top shelf

Midge-proof mesh designed to restrict insects from entering living / sleeping area

Living area is complemented with a fold-out table

Choice of three entry doorways

Highly maneuverable, versatile and reliable ARK Off Road Jockey Wheel with 750-kilogram rating

One-kilogram ABE dry fire extinguisher

96-litre ARB ZERO Fridge Freezer with dual zones

ARB patented, full-size slide-out stainless bench with swing-out three-burner cooktop and sink

Two four-kilogram included gas bottles wrapped in an Earth Camper edition neoprene cover fit neatly in a lockable gas bottle holder

Electrically operated drop-down rear door - touch of button simplicity

Earth Camper rear door transforms into a hard floor living zone, keeping you dry during inclement weather

Canvas is made from 280gsm, offering breathability, insulation and UV resistance

ROOF RACKS

CHOOSING A ROOF RACK

When it comes to roof racks, we've got something for everyone. No matter what you're storing, what you're moving, what you're taking with you, ARB should always be your first choice for roof racks.

- Available in a variety of lengths and widths so you can choose the right size for your requirements
- Vehicle-specific fitting kits
- Available in both steel and aluminium
- Available with optional extras to tailor your roof rack to your load carrying needs

Steel
Perfectly suited for the structural design and load carrying requirements of off roading.

Steel racks feature evenly spaced cross bars and can be optioned with a mesh floor.

Aluminium
The lightweight alternative for carrying excess or bulky items. Perfect for owners who may wish to remove their rack between trips.

Aluminium racks come standard with an Amplimesh™ alloy floor.

BASE RACK

BUILD. ATTACH. SET. EXPLORE.

Ultra sleek, boasting a super low mounting profile and lightweight design, the BASE Rack provides unmatched simplicity, flexibility and personalisation in your roof rack set-up.

Setting a new benchmark in strength and integration, the BASE Rack incorporates a revolutionary dovetail mounting system that makes attaching and removing loads and accessories faster and more secure.

THE RANGE

RACK SIZES

Available in different sizes to suit your vehicle and needs:

1,255mm x 1,155mm - 12.7kg approx.
Best suited to dual-cab vehicles

1,255mm x 1,285mm - 14.3kg approx.
Best suited to dual-cab vehicles

1,545mm x 1,285mm - 16.6kg approx.
Best suited to single-cab vehicles, short canopy or wagon with sunroof

1,545mm x 1,445mm - 18.5kg approx.
Best suited to vans and larger cab wagon

1,835mm x 1,155mm - 17.7kg approx.
Best suited to narrow canopy

1,835mm x 1,285mm - 19.9kg approx.
Best suited to wider canopy or smaller wagon

1,835mm x 1,445mm - 21.5kg approx.
Best suited to vans and larger cab wagon

2,125mm x 1,285mm - 22.8kg approx.
Best suited to larger cab wagon

2,125mm x 1,445mm - 24.5kg approx.
Best suited to vans and larger cab wagon

2,415mm x 1,445mm - 30.3kg approx
Best suited to vans

2,705mm x 1,445mm - 33.4kg approx
Best suited to vans

2,995mm x 1,445mm - 36.5kg approx
Best suited to vans

GUARD RAIL OPTIONS

Personalise the rack to suit your lifestyle with the following rail options:

Full Rails

Designed for the tourer. The full rails around the rack work as a load block, helping to prevent a rack full of big items such as swags and tents from shifting.

1/4 Rails

For the camper. This style of rail is great for rooftop tents.

3/4 Rails

Easy rear loading of large and awkward items such as sheet materials and rollers can be added to assist. A cross between full and trade rails, 3/4 rails are also designed for rear-folding rooftop tents.

Trade Rails

The tradie option. Great for loading long items such as timber and ladders and rollers can be added to assist. The side rails prevent items from slipping or rolling off the rack during loading and allow you to fill the rack right up to the edge.

ROOF RACKS

DELUXE RACKS

Available in a range of sizes to suit a variety of vehicles, Deluxe Racks provide extra storage space and are fully enclosed.
*Shown with optional wind deflector

CANOPY/TRADE RACK

The perfect roof rack for trade vehicles, it opens at both ends for the safe carrying of longer items such as timber and ladders. It can also be fitted with a roof rack roller for easy access on and off and is available in both steel and alloy.

TOURING RACK

Purpose-designed to hold an ARB rooftop tent and still provide ample storage at the front of the rack. The Touring Rack is manufactured from steel tubing to withstand extreme off road use.

FLAT RACK

ARB Flat Racks provide the same strength and robustness of the ARB roof rack range but with the added practicality of a flat platform. Available in alloy (featuring Amplimesh® mesh floor) or steel (with cross bars only).

CAB RACK

ARB's steel Cab Rack is built tough and engineered specifically for dual-cab utes. Manufactured in house by ARB, the rack utilises a durable mounting system and features superb construction making it well suited to a variety of recreational and commercial applications.

RHINO-RACK

The Rhino-Rack range provides 4WDers and tradespeople with a variety of load carrying options.

Innovative in design and excellence in engineering, Rhino-Rack products and accessories are built using premium quality materials and are ideal for all conditions. Rhino-Rack products are available for both guttered and gutterless 2WD and 4WD vehicles.

DRAWERS & STORAGE

DRAWER SYSTEM SOLUTIONS

Once almost exclusively used in wagons, the popularity of drawer systems has exploded. And with popularity has come innovation and flexibility. ARB's Outback Solutions Drawer System is completely modular and can be individually tailored to your needs and vehicle. Side by side, top and bottom – the choices are all yours.

ROLLER DRAWER

Traditional roll-out drawer with fixed top allows for additional modules to be stacked on top or provides a flat surface for storing other larger items. Available in different sizes and heights to suit a variety of 4WDs.

ROLLER DRAWER WITH ROLLER FLOOR

Traditional roll-out drawer with rolling top gives you plenty of storage space and allows a fridge freezer to be easily mounted on top, enabling it to be rolled in and out as required. Available in different sizes to suit a variety of 4WDs.

ROLLER DRAWER TABLE

Stainless steel pull-out bench space in the back of your vehicle. Perfect for food preparation and numerous other uses.

ROLLER FLOOR

For more convenient access to your car fridge and other stored items. Available in three sizes, it incorporates a storage tray underneath for smaller items.

DRAWER CABLE RUNNER

Keeping your fridge cable from being tangled or damaged in the back of your vehicle, this cable runner is suitable for most fridge 12-volt power cables and the length can be adjusted to suit drawer travel.

CARGO BARRIER

Extra protection in the event of a collision or emergency braking, a Cargo Barrier stops unrestrained cargo from getting thrown around and causing injury to passengers.

DRAWER SYSTEMS FEATURES

- Modular units allow greater flexibility if needs change in the future.

Stainless steel bearing runners for ultra-smooth drawer and slide operation.

Long-lasting, UV-stable commercial carpet complements modern vehicle interiors.
- Vehicle-specific side floor kit with easy latches completes installation and provides additional storage areas within the cabin or tray.

Cross-folded floor ensures maximum support for items placed within each unit.
- Self-locking anti-roll back system locks into place at full extension.

Key lockable, push-pull, slam-shut latches for ease of use and maximum security.

ORGANISERS

ARB CARGO ORGANISERS

Working seamlessly with the ARB Outback Solutions Modular Drawer System, ARB Cargo Organisers keep everything in one place. They fold flat when unused but open up to become a solution for all manner of storage issues.

Available in a range of sizes and made from 600D heavy-duty PU-coated Oxford material, ARB Cargo Organisers sport quality zippers and handles to keep your contents secure, clean and portable.

Additional features include rubber grip feet to reduce movement, removable dividers to keep everything accessible and four individual ID labels with each bag to easily identify your contents.

Handy for carrying goods from home or campsite to vehicle.

ARB HANGING ORGANISER

The ARB Hanging Organisation is the perfect way to organise your essentials while you're travelling. It has been designed to maximise storage space and convenience.

Features:

- Collapsible storage solution
- Hard-mould outer shell
- Portable and lightweight
- Simple and adjustable step up via two buckles
- Four varied height shelves
- Four side storage pockets
- Front mesh zipped windows

UTILITY CASE

Perfect for storing kitchen utensils or your off road must-have tools.

Features 18 pockets in various sizes to cater for a multitude of storage needs, as well as two handy removable pockets to store camping mugs or bulky items separately. Webbing straps with metal hooks allow the case to hang to ensure the case contents are always within easy reach.

SLIDE KITCHEN

Whether at the campsite, the local park, the job site or even the side of the road, enjoy the ease of a fully-functioning kitchen, wherever you and your 4WD are headed.

Featuring a three-burner stove, sink and ample bench space, ARB's fully freestanding Slide Kitchen can be set up in as little as 15 seconds, offering practicality for any tourer. Beyond being one of the most practical features for any 4WD, the Slide Kitchen boasts an innovative user-friendly design.

Optional replacement draw available for extra storage if Slide Kitchen isn't required

Large 304 grade stainless steel benchtop with plenty of bench space to prepare and serve. Locks into place when fully extended and holds up to 3 kilograms spread evenly on top.

Everything within arm's reach when cooking with this 450-millimetre by 345-millimetre by 140-millimetre utensils draw, also a convenient space to store the collapsible sink and gas hose

Three-burner Thetford gas stove (one large 2.5-kilowatt rapid burner and two smaller 1.75-kilowatt burners) with tempered glass lid doubling as a splashback.

12-litre collapsible silicone sink with plug

FRIDGE FREEZERS

FRIDGE FREEZERS

There's no doubt a Fridge Freezer is one of the most important necessities when going on a trip. When it comes to refrigeration on the move, ARB has you covered.

Engineered in Australia to handle our extreme conditions, ARB Fridge Freezers offer uncompromising performance with a temperature range from -22°C to +10°C, giving you the convenience of refrigerated or frozen food and drinks no matter where your journey takes you.

With an ARB fridge freezer, it's as good as unplugging your home fridge and putting it in your vehicle.

Note: Compatible with **LINX**

FEATURE PACKED

All of ARB's Fridge Freezers are packed with clever features. Below are some handy options available:

A choice between single and dual zone
A large range of sizes to suit individual needs
A large range of accessories available to complement each fridge including Transit Bags, Remote Monitors, Fridge Slides and Tie-Down Systems
Choice between weatherproof or in-cab fridges
Practical and easy to access from vehicle
Convenient drain plug for simple cleaning
Optimised compartments with separate compartment for fruit and dairy
Rubber feet integrated into fridge base for increased grip and stability
Internal light so you can access all your food and drinks in the dark

Check out the unique features of our Elements and ZERO range to see what fridge best suits your needs.

ELEMENTS WEATHERPROOF FRIDGE FREEZER

The ultimate 4WDers fridge: engineered to withstand the harshest conditions and tough enough to permanently mount in the back of an open ute. This weatherproof fridge is capable of withstanding anything Mother Nature can throw at it.

Unique magnetic lock, activated by the touchpad control panel, prevents unauthorised access or tampering with temperature settings and a padlock recess built into the exterior (an optional Permanent Mount Kit is also available to make the fridge a permanent fixture in the back of your 4WD)

Innovative gas strut holds the lid open in any position, keeping both hands free to grab food and drink

User-friendly touchpad control panel allows full functionality with the lid open and securely prevents unwanted adjustments or access with its unique user-selected locking code

Available in 60-litre size, making it perfect for family trips and long getaways

Wireless transmitter as standard on all Elements Fridge Freezers allows remote display on your LINX or mobile device

Stainless steel body and hinges, anodised aluminium latches, UV-resistant trim and protected electrical connections

Secures to the tray of your 4WD or in a wagon or canopy on a fridge slide drawer system

ZERO FRIDGE FREEZER RANGE

The problem that faces all long-distance adventures has now been solved.

Presenting ZERO: the dual-zone, all-in-one fridge and freezer, with independently controlled cooling zones – available in 69-litre and 96-litre capacities.

- Perfect for trips to the bush, the beach and long getaways
- Steel body for extra protection
- Smaller sizes also available with standard fridge or freezer function

ZERO: it's what you've been waiting for.

Beer and ice cream in the one fridge? ARB's range of ZERO Fridge Freezers have dual-zone options, meaning you can have the best of both worlds in the one fridge!

44L SPECIFICATIONS

- Features:
- Capacity: 65 x 375ml cans
 - Cooling Capacity: -22°C to +10°C
 - Weight: 23.9kg
 - External Dimensions (mm): (L) 675 x (W) 423 x (H) 496
 - Power: 12/24V DC / 100-240V AC

FRIDGE FREEZER ACCESSORIES

FRIDGE SLIDE

Available for Elements and Zero Fridge Freezers.

Ensures easy access to your car fridge at all times. Sealed roller bearings prevent dust ingress and incorporate a lock-in/lock-out mechanism to ensure the slide stays in position no matter what angle your vehicle is on.

CANVAS TRANSIT BAG

Available for Elements and Zero Fridge Freezers.

Shields your fridge from dents and scratches while also providing additional insulation in extreme temperatures. Made of tough, durable canvas, it also features a handy side pocket, bottle opener and openings for the fridge's rubber feet, power cables and drain plug hole.

TIE-DOWN SYSTEM

Available for Elements and Zero Fridge Freezers.

Ideal for ensuring your fridge is secured at all times. Simple to fit and featuring spring-loaded clips, this accessory is a smart and functional addition for your 4WD fridge.

12V & 24V WIRING ACCESSORIES

ARB stocks a wide range of 12-volt and 24-volt wiring accessories to suit your fridge freezer, allowing flexible placement options, or you can simply hardwire the fridge into the vehicle. These accessories also reduce possible voltage drop.

ARB FRIDGE APP

A handy, easy to use app to view and control your fridge from inside the cab, ARB's fridge app ensures you will arrive at your destination with plenty of icy cold drinks and food.

ELEMENTS PERMANENT MOUNT KIT

For added security, an optional Permanent Mount Kit is available for the Elements Fridge Freezer, giving it a secure and permanent place on the tray.

CAMPING

ALTITUDE ROOFTOP TENT

The ladder for the Altitude is stored internally, eliminating the need to sacrifice tub or cargo space to store

The ladder storage locker includes key lockable handles to moderate accessibility when not in use

Sleek roof rails with integrated T-slot mounting channels for a range of accessories with a 20kg roof load carrying capacity that's able to lift while loaded

Premium aluminium ladder attachment rails blended into the shell via injection molded end caps with under rail recessed dual temperature LED lighting (White/Amber) ideal for illuminating the ladder at night or ambient campsite lighting

ABS slimline shell is 330mm high and wind resistant

ARB SmartFold™ technology

For added convenience, double sided entry has been integrated to accommodate for different campsites & vehicles

Engineers have meticulously designed a steel scissor mechanism to support the weight of the tent, providing an easy and smooth movement every time

Although the mechanism has surpassed thousands of hours of testing, for peace of mind ARB engineers have designed a manual failsafe option

Durable 2.5mm thick top & bottom fiberglass shells with lightweight aluminium frame

ARB lockable D-handle locks on both sides of the Altitude for a secure close and maximised safety

Integrated front wind deflector has been implemented to reduce any potential wind noise created

ESPERANCE 2 ROOFTOP TENT

The Esperance Rooftop Tent is lightweight, slimline and designed with a contemporary looking hard shell.

FLINDERS ROOFTOP TENT

Compact without compromising on camping comfort.

SIMPSON III ROOFTOP TENT

The Simpson III Rooftop Tent provides you with ease and convenience when travelling.

SWAGS

ARB SKYDOME SWAG

We've doubled down on an Australian icon.

Over the years, the humble swag has evolved from a simple sheet of canvas to a tapered design and, more recently, to dome-shaped structures. This evolution continues with the ARB SkyDome swag.

It's big, roomy and as comfortable as you can get.

The ARB SkyDome Swag comes straight out of the box ready to use, as intended by the designers. Why is that important? Most swags come vacuum-packed and it can take weeks for their mattresses to gain proper shape, if indeed they ever do.

- Available as king single or double
- Easy set-up and pack-down
- Thick supportive mattress
- Excellent ventilation in warmer months, keeps you warm in cooler months
- Rain gutters move water away from windows

SWAG BAG

Store your ARB SkyDome Swag neatly and safely.

- Features:
- Moulded rubber carry handles on either end
 - Removable shoulder strap
 - Available in two sizes (single and double)
 - Four integrated, adjustable tie-down straps allow it to be secured to a roof rack without the need for additional straps

SWAG STRETCHER

Keep your single ARB swag off the ground with ease and comfort all in one .

- Weight rating of 150 kilograms (330 pounds)
- Quick set-up with no parts to put together
- Clip-on storage bag for boots and other personal items
- Suits ARB single swags and includes swag attachment strap
- Sturdy powder-coated steel frame
- Folds neatly into storage bag
- Single and double swag stretcher available

ARB SKYDOME

Multiple attachment points on head and foot awnings for reflective guy ropes and a solid support bar for reduced movement in windy conditions, while external awnings provide protection in foul weather and zippered internal head and foot storm flaps reduce dust entry and minimise condensation

Comfy 75-millimetre corrugated foam mattress to ensure good rest and non-rustling, machine-washable cover

Outstanding ventilation, easy access and exceptional views of the night sky through the large nylon mesh entry with all doors and windows featuring YKK zips and a rain gutter to stop water entering

Multiple pockets and storage options for items such as torches, lamps, keys, phones, wallets and drink bottles

Features a wide-brim hat holder accessible from inside or outside the swag

970gsm durable base with 75mm high return tub for protection against water ingress.

Simple to set up, minimal pegging required, nickel-plated brass eyelets for corrosion protection and elasticised aluminium bows for easy assembly and storage.

Spacious swag available in two sizes:
*King single - 2,150mm (L) x 900mm (W)
*Double - 2,150mm (L) x 1,400m (W)

Freestanding dome design with tie-down option for windy conditions and heavy-duty waterproofed canvas, designed and tested to Australian standards.

AWNINGS

Quick as a flash and your awning's up. Retractable and reliable.

Simple set-up and operation. Fits onto the side of roof racks and roof bars, and stores neatly in a sturdy soft case bag or aluminium case.

- Available in five sizes:
- 1,250mm (W) x 2,100mm (L)
 - 2,000mm (W) x 2,000mm (L)
 - 2,000mm (W) x 2,500mm (L)
 - 2,500mm (W) x 2,500mm (L)
 - 3,000mm (W) x 3,000mm (L)

- Features:
- Constructed from abrasion-resistant PU-coated 300gsm polycotton ripstop canvas
 - Fully waterproof with a 50+ UV protection rating
 - Velcro® ties to secure the roof
 - Supported by heavy-duty, height-adjustable telescopic 1.2-millimetre-gauge legs with 25-millimetre diameter. Aluminium anodised for greater corrosion resistance
 - Included pegs and guy ropes for securing legs

ALUMINIUM-ENCASED AWNING

Sleek and contemporary alternative to traditional awning covers.

Provides extra protection and functionality.

- Features:
- Includes all the awning features described above
 - Quick-release bungee cords to remove the need for zips
 - Flip-up lid for unmatched simplicity

AWNING WITH LIGHT

Light your campsite up with ease.

Comprises both the ARB Awning and an LED light strip in the awning roof to keep your camp shelter and lighting solutions together. No more fiddling with lights and hooks when all you really want to do is cook or relax.

The ARB Awning provides fast and reliable shade and protection from the elements, while the LED light strip provides up to

1,200 lumens, with a choice of two different colour modes (cool white or amber) and dimmer switch, all powered via a fused cig socket plug.

- Available in two sizes:
- Soft case: 2,000mm (W) x 2,500mm (L)
 - Soft case: 2,500mm (W) x 2,500mm (L)
 - Aluminium case: 2,500mm (W) x 2,500mm (L)

AWNING ACCESSORIES

WIND BREAKS

Hitch one up to your ARB Awning for extra protection and storage.

A wind break makes your awning structure stronger - great for windy conditions - as well as providing more room under your awning and offering more shade.

- Features:
- Manufactured from lightweight PU-coated 300gsm polycotton canvas
 - Fully waterproof with a 50+ UV protection rating
 - Tie-down points for each wind break to further secure the awning

DELUXE AWNING ROOM WITH FLOOR

Something extra.

Used with the 2,000-millimetre and 2,500-millimetre model awnings, the Deluxe Awning Room with Floor provides protection from the weather and insects, and allows for additional privacy. It can be used as a fully enclosed room or mosquito net.

- Features:
- Durable waterproof floor with cross flow ventilated mesh roof to help keep you cooler
 - Incorporated zipper-operated mesh doors in the main wall panels for easy access and to accommodate changing weather conditions
 - Provides five square metres of floor space when fitted to a 2,000-millimetre awning
 - Provides 6.5 square metres of floor space when fitted to a 2,500-millimetre awning

AWNING ALCOVE

The ARB Awning Alcove is a versatile solution grounded on the desires of the modern-day camper, providing increased comfort and convenience while protecting you from the elements. The Awning Alcove features a high-density 175gsm polyester ripstop canvas and includes a durable multi mesh mat.

QUICK-RELEASE AWNING BRACKETS

Gives you the ability to quickly unbolt your awning to pack away or move to another location such as the other side of the vehicle.

ENSUITE ROOM

Expanding ARB Touring's extensive line-up of premium camping and remote area travel accessories is the all-new Ensuite Room. Providing a private and convenient sheltered space from the elements, the ARB Ensuite Room is the perfect comfort addition to complete your campsite. Integrating some exciting new features whilst carrying across the classic aesthetics and proven quality you have come to expect from the ARB brand, the Ensuite Room is great for freshening up on the road.

CAMPING ACCESSORIES

CAMPING CHAIRS

Sit back and relax.

Comfortable seats that are stylish and available in two styles.

CAMPING TABLE

Lightweight but sturdy.

Heat resistant for cooking preparation, this camping table is the perfect size for storing neatly in your vehicle, yet big enough to fit a family of four around.

- Features:
- Unique table pins to keep table sturdy
 - Folds up for easy carrying and compact storage
 - Comes with 600-denier polyester carry bag for storage
 - Can hold up to 30 kilograms

ONTAP PORTABLE SHOWER

The ARB OnTap Portable Shower is the perfect solution for staying clean and refreshed while off the beaten track. Available in 15-litre and 20-litre sizes, it features a durable, UV-resistant construction and a pressurised system operated by a foot pump - no batteries needed.

Designed with a multi-function shower head and trigger control, with a wide mouth opening for easy filling, built-in carry handle and adjustable straps for transport, the OnTap Portable Shower is a must-have for any outdoor adventure.

ARB FIRE PIT

The ARB campfire – it's a staple piece of almost every off road set-up and the heart of the campsite when it comes to keeping warm under the stars on frosty nights.

ARB's Fire Pit is Australian made and constructed from BlueScope's weathering REDCOR® steel to offer a seriously sturdy and versatile solution when it comes to portable campfire set-ups.

FLASHLIGHT

The perfect companions to help you illuminate the campsite, under the hood or navigate a dark track. The Horizon Area and Work Lights have magnetic bases to keep the light directed and the Horizon Flashlight can reverse charge your mobile phone, making it the perfect back-up.

AREA LIGHT

WORK LIGHT

RECHARGEABLE ADVENTURE LIGHT 600

Versatile and bright.

With dual magnetic and hook mounts, the ARB Adventure Light 600 can be hung or attached virtually anywhere.

Equally effective when carrying out emergency repairs or relaxing around camp.

PUREVIEW 800 FLASHLIGHT

Bright, reliable and rechargeable.

Featuring 800 lumens and a beam distance of up to 300 metres.

For changing tyres at night, working under the bonnet or any other space where artificial light is crucial.

LED HEAD TORCH

Your hands-free lighting alternative.

Delivers up to seven hours of run time and provides a powerful 300 lumens on high setting and 180 lumens on low setting.

GUY ROPES & SUPERGRIP SAND PEGS

Added extras.

ARB's Guy Ropes have a spring assembly that acts like a shock absorber – they take the movement of the tent, which makes them ideal in windy conditions.

Supergrip Sand Pegs are specifically designed for use in deserts, river beds and beaches.

DELUXE CANVAS SLEEPING BAG

Stay warm in ultimate comfort.

ARB's Deluxe Canvas Sleeping Bag is designed for warmth, comfort and space. A dual-zip system allows two sleeping bags to be joined together to form one mega double bag to keep a couple warm and snug on those cooler nights, with a rating to -10°C.

- Features:
- 246-centimetre by 100-centimetre (open size) cotton canvas outer shell for strength and durability
 - Brushed cotton flannelette lining for a deluxe feel
 - Internal pocket for storing keys, phone or midnight snacks
 - Removable hood includes generous pillow pocket
 - Dual zippers to help control comfort and warmth
 - Removable fleece liner makes the sleeping bag adaptable to any season, and easy for washing and care
 - Unzips to create a large doona
 - Hollow fibre for breathability, water resistance and warmth

TOASTIE BRANDER

Perfect gift for ARB fans and your adventuring friends.

The ARB Toastie Brander is designed to make toasted sandwiches on the coals of an open fire or portable burner and, as the name suggests, brands the ARB logo onto both sides of the sandwich.

COMPACT SLEEPING BAG

A lighter, more compact alternative.

Perfect for the warmer months or when you have less space to pack essentials, ARB's Compact Sleeping Bag is lightweight and practical.

- Features:
- 246-centimetre by 90-centimetre open size with the ability to join two together
 - Temperature rating from +5°C to -5°C
 - Weighs just 2.85 kilograms (6.3 pounds)
 - Anti-catch zipper with draft barriers along all zips
 - Draft collar barrier with drawstring
 - Removable hood with pillow holder
 - Storage pockets to keep your smaller items within reach

FRONTIER WASH STATION

Keep your hands clean and hygienic whenever you need it.

Featuring a capacity for up to 28 litres of potable water and fitted with two integrated dispenser bottles, perfect for your soap, sanitiser or sunscreen. Manufactured from a tough, food-grade UV-stabilised polymer and symmetrically designed to mount under your utility/flatbed tray in front or behind the rear wheels.

STORMPROOF BAGS

Tough, stylish and versatile.

Highly water resistant, the bags can be packed and loaded onto a roof rack or thrown into the back of a ute without the worry of your gear getting wet.

Features PU-coated Oxford weave fabric and rubber construction, with all seams heat-sealed. A roll-up top closure and "Sure Grip" buckles means no zipper to contend with.

Available in three sizes.

COOLER BAG

Insulated to keep your food and drinks cool on warmer days.

Incorporates strong carry straps with a padded handle, external elastic strap for packing additional items, an external zip and Velcro® pockets for smaller items such as keys, wallet and phone. ARB Cooler Bags include a reinforced base for durability.

ARB TRACKPACK SIII

Keep your vehicle clean and organised with the ARB TrackPack.

With a large main compartment, two generous sized side pockets and an additional front storage pocket, the TrackPack is incredibly versatile and can be used in many ways. It provides storage for unwanted smelly rubbish and recyclables, dirty recovery gear or even wet towels from a day at the beach. Excellent construction inside and out. This bag is an essential for any touring or muddy weekend away.

TOILETRIES BAG

Keep your personal hygiene products together in a compact manner.

The large internal area has multiple mesh and zippered pockets which can be removed, with a hook for hanging a range of bathroom accessories. Includes a mirror.

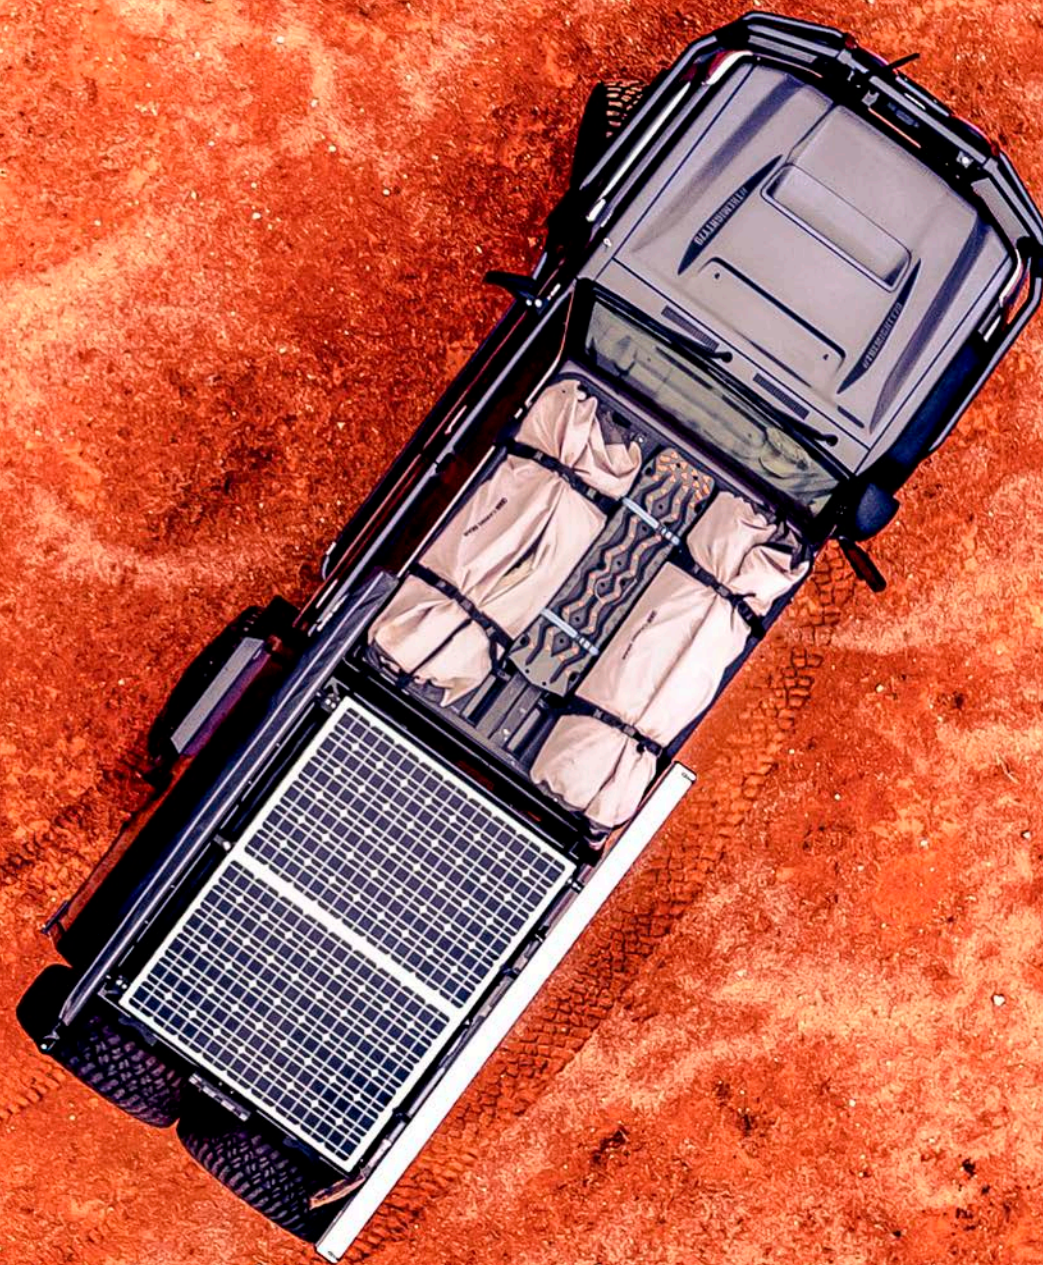

ARB TAILGATE BIN BAG

Keep your vehicle clean and organised with the ARB Tailgate Bin Bag.

With a large main compartment and an additional front storage pocket, the Tailgate Bin Bag is incredibly versatile and can be used in many ways. It provides storage for unwanted smelly rubbish and recyclables, dirty recovery gear or even wet towels from a day at the beach. Excellent construction inside and out. This bag is an essential for any touring or muddy weekend away.

POWER SOLUTIONS

THE NEED FOR POWER

4WDers have always needed access to more power as accessories such as fridges, winches and camping lights draw a significant amount of energy, which can quickly drain a vehicle's starting battery.

No matter what type of auxiliary battery you choose, you'll have to ensure it's powerful enough to suit your requirements.

The location of your auxiliary battery will depend on what vehicle you drive. While many vehicles will accommodate a second battery under the bonnet, others will not have the available space there, in which case the auxiliary battery may have to be mounted somewhere on the chassis, somewhere in the cabin or, in the case of a ute, somewhere in the tub.

No matter where the battery is mounted, it is important to fasten in a battery tray securely to avoid damage from vibration or movement and provide safety to occupants.

It is also important to use a quality wiring loom when installing a dual battery system. Poor quality looms will at best result in inefficiencies and at worst be hazardous, with the potential for fire. Always have your dual battery system installed by a professional.

SUITABLE FOR

- Recreational and professional users
- Extreme conditions
- Remote area travel
- Campers
- Towing caravans
- Towing boats

AUXILIARY BATTERIES

Power additional accessories without the risk of flattening the main battery.

An independent power source provides peace of mind in a world of accessories and draining power.

BATTERIES

A tough and reliable battery is essential on the road, especially when used for winching or running accessories such as fridges and camp lighting. ARB offer their own Slimline option and stocks: Century, Yuasa, Optima, Invicta and Revolution with a range of lead-acid deep cycle, AGM and lithium batteries.

- Independent power source for items such as fridges and camp lights
- Peace of mind in the event of a flat main battery

AUXILIARY BATTERY KITS

Manufactured from two- and three-millimetre powder-coated steel, auxiliary battery trays are available on their own or as part of a complete kit.

- A wide range of mounting options is available, including under-bonnet, tub mount, underbody, and behind-the-rear-seat installation
- Kits are supplied with tray and mounting hardware, factory terminated wiring and either a solenoid, smart solenoid or BCDC in-vehicle charger

JUMP STARTER

Never get caught out again.

Perfect for a 4x4, family vehicle, boat, motorcycle, used car yard or ride-on lawnmower, the lithium-powered ARB Jump Starter has plenty of power to start a 12-volt vehicle with engine capacity of up to 5-litre V8 diesel or 6-litre petrol.

Can also charge personal electronic devices via a 12-volt cigarette plug or the two USB ports.

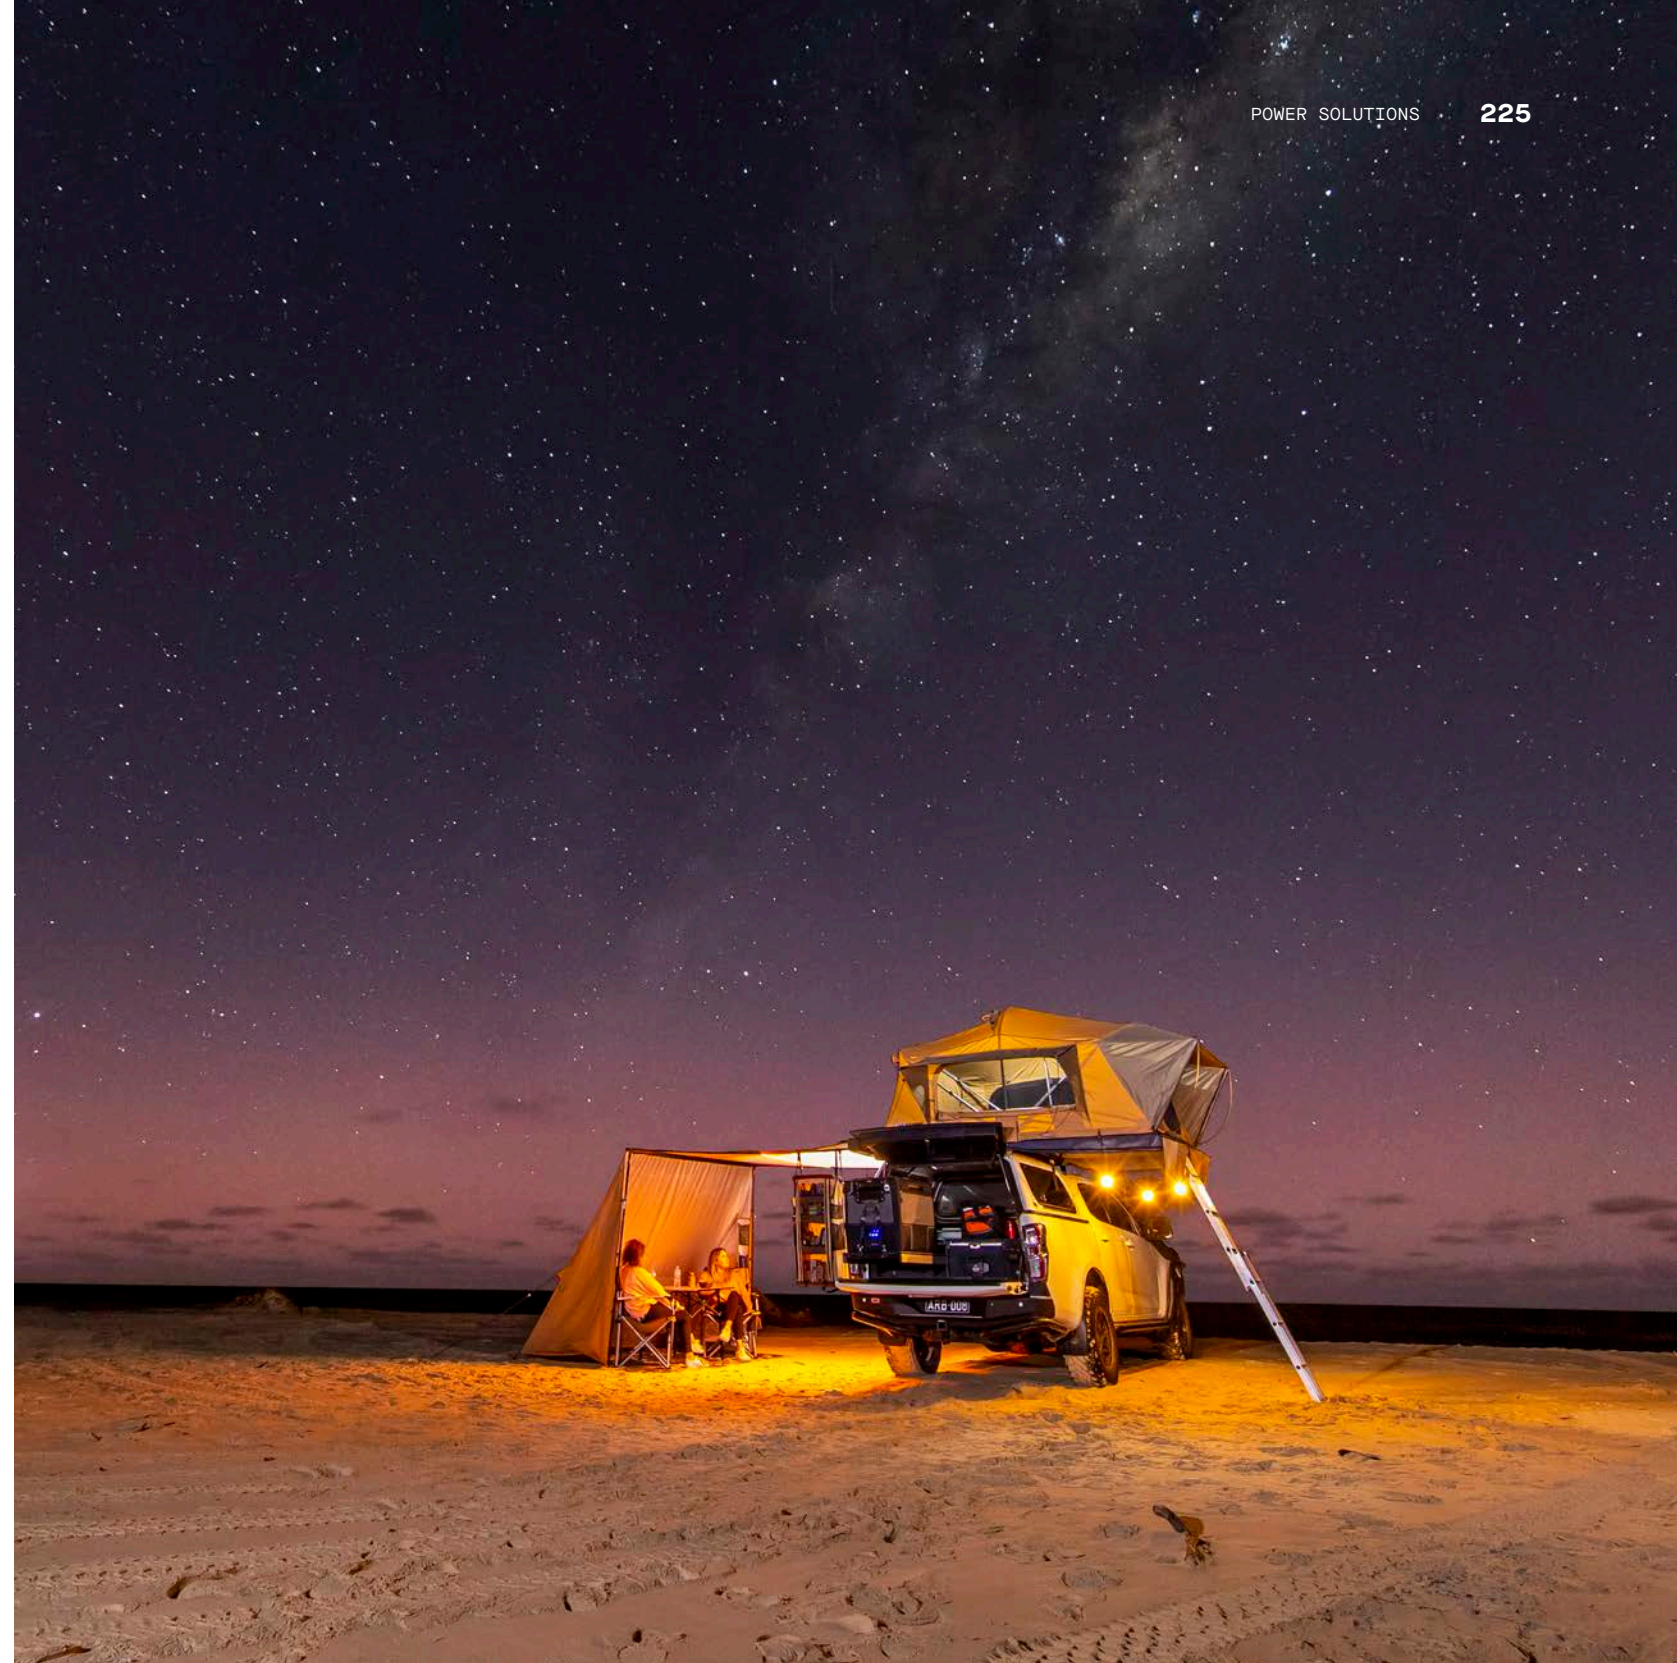

ARB SLIMLINE BATTERY

Reliable power in a compact setup

Take control of your off road adventures with the ARB Slimline 100 12V/100AH Lithium Iron Phosphate Battery. Designed with innovative features, it keeps you powered up while enjoying life's simple pleasures.

- 100 Ampere-hours (1280 Watt-hours) - power fridges, lights and devices and support high-demand appliances (2,000 watts for up to 20 minutes) in conjunction with a compatible inverter
- Features inbuilt battery management system and DC-DC charger
- Expandable power – Connect multiple batteries for extended back-up
- Advanced charging – Built-in 40A built-in 40A four-stage charger with MPPT solar optimisation; compatible with standard & smart alternators
- Tough & safe – High-quality lithium iron phosphate cells meeting Australian and international safety standards
- Smart monitoring – dedicated app for real-time battery metrics and diagnostics
- Easy installation – vehicle-specific brackets and wiring looms for a seamless set-up

REDARC

DUAL INPUT BCDC IN-VEHICLE BATTERY CHARGER

A multi-stage DC to DC charger that ensures your auxiliary battery receives optimum voltage and maximum charge where there is either voltage drop due to long battery cables or two different battery chemistries in use. REDARC's range includes three variants – 25, 40 and 50-amp models to suit a variety of charging applications. The dual-input BCDC range has been built tough to handle Australia's severe conditions.

BCDC IN-VEHICLE CHARGER

A multi-stage 20-amp DC to DC charger that ensures your auxiliary battery receives optimum voltage and maximum charge where there is either voltage drop due to long battery cables or two different battery chemistries in use whilst driving.

REDVISION

The Total Vehicle Management System that controls and monitors multiple onboard devices in a 4WD, caravan, camper trailer or motorhome in one place. Switch things like your lights, fridge, TV, inverter and more on or off using the wall display or handy app on your phone. It even gives you information on water levels and temperatures, and when paired with a "Manager" Battery Management System, you also get instant feedback on your auxiliary battery and electrical system.

BATTERY MANAGEMENT SYSTEMS

Say goodbye to dead auxiliary batteries with a REDARC Battery Management System. Built to manage the vehicle's charging system, via 240-volt, DC and MMPT solar inputs, the management system is a complete multi-stage battery charging and maintenance solution. An interactive face panel shows important elements such as charge completion, solar power generation and power usage.

SMARTCHARGE

Keep your vehicle's battery life healthy, charged and always ready to use with the REDARC smart battery charger range by DEFA. Compact and easy to use, these battery chargers are designed to automatically charge and maintain most common automotive 12-volt batteries.

Compatible with most common batteries, including the AGM battery and lead-acid batteries, the SmartCharge range is available in four-amp, six-amp, eight-amp and 10-amp variants.

SMART START SBI SERIES

This auxiliary battery isolator operates as a solenoid priority system, protecting the main battery from excessive discharge, whilst allowing the auxiliary battery to supply non-essential loads. Two models are available with both suitable if the two batteries are not the same (e.g. cranking and deep cycle).

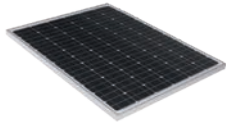

PURE SINE WAVE INVERTERS

With Pure Sine Wave Inverters, you can use your electrical devices anywhere in Australia and get the same type of 240-volt power you get at home. A Pure Sine Wave Inverter produces a clean 240-volt power supply, ensuring a smoother, more efficient running of household appliances including laptops, phone chargers, power tools, heaters, kettles and more. It works comfortably anywhere, even in Australia's harshest conditions, and features multiple levels of protection, including overload, short circuit and an over-temperature and load-controlled cooling fan.

GAUGES

Ideal for monitoring critical aspects of your vehicle's health when travelling, the extensive REDARC range of gauges combine dual or triple functions in the one 52-millimetre gauge. With selectable backlight colours and two programmable warning colours, REDARC gauges will ensure there are no unfortunate surprises.

MONOCRYSTALLINE SOLAR PANELS

REDARC Monocrystalline Solar Panels are designed specifically for camping and caravanning with a 12-volt output. They are perfectly suited for the roof of your caravan, camper trailer or roof of vehicle and are designed to withstand Australia's harsh conditions and extreme weather.

Monocrystalline Solar Panels offer the highest performance of all solar panel types, working in a variety of light conditions, and are available in four popular sizes.

FOLDING MONOCRYSTALLINE SOLAR PANEL KITS

The REDARC Monocrystalline Solar Panel Kit is the easy-to-store, high-power-yielding solar solution to your battery charging needs.

You receive all the benefits of the regular monocrystalline panels with the added flexibility and portability of a folding and freestanding design.

With a choice of a 120 or 160-watt solar panel, included is a five-metre Anderson to Anderson™ cable, so you can continue to get the most out of the sun and set up camp in a shady area. With genuine industry standard Anderson™ SB™50 connectors, installation has never been easier or faster.

REDARC recommends the purchase of a REDARC Solar Regulator to ensure the correct charge is supplied safely and efficiently.

SUNPOWER® MONOCRYSTALLINE BLANKETS

Relying on traditional campsites with mains power sources is a thing of the past.

Portable, lightweight and strong, these blankets can be easily moved around to capture the best energy output from the sun. The range is also smaller and lighter than a comparable wattage portable glass panel.

The range includes three black SunPower® Cells solar blankets in 115, 150 and 190-watt power ratings and a flexible 112-watt red Amorphous Cell solar blanket.

The Amorphous Cell solar blanket offers superior flexibility in a lightweight, conveniently sized package. Its flexible design reduces the risk of cell breakage and cracks, and is known to perform better in low light conditions compared to crystalline panels.

REGULATOR REMOTE MONITOR

Never be left wondering how your solar panels and batteries are performing. The REDARC Solar Regulator Remote Monitor provides an informative, user-friendly display tracking the power the solar panels are producing and the charge state of the battery. Coupled with an optional temperature probe, you can be confident you are correctly measuring your solar solution's performance.

SOLAR REGULATORS

REDARC Solar Regulators ensure that the power supplied by your solar panels is at the optimum voltage to charge your batteries, while the optional Remote Monitor ensures all vital information is readily available.

CABLES & CONNECTORS

The REDARC solar range includes a wide variety of different cables and connectors to cater for a multitude of individual power set-ups.

Available with adaptors to suit differing solar solutions and connection preferences, all of the cables and connectors are designed to survive in even the harshest of conditions.

LONG-RANGE FUEL TANKS

FRONTIER LONG-RANGE DIESEL TANK

The ARB Frontier Long-Range Tank sets the benchmark for long-range fuel tanks.

Manufactured from a resilient cross-linked polymer, each Frontier tank provides strength, rigidity and reliability, while also providing a significant weight reduction over steel long-range tanks. The UV-stable plastic material ensures these tanks will survive in the most hostile environments.

The Frontier tanks vary in size up to 180 litres.

ARB FRONTIER LONG-RANGE FUEL TANK

Having additional fuel on hand is essential when travelling long distances or in remote locations. The ARB Frontier Long-Range Diesel Tank sets the benchmark for long-range fuel tanks around the world.

Vehicle-specific fuel pump module

The ARB designed and manufactured fuel pump module sealing flange prevents leakage and eliminates distortion of the mounting area. In addition, it is zinc-plated for resistance against corrosion.

Easy fuel delivery and safety

An aluminium filler neck allows for fast, easy fuel delivery, while the tank breather incorporates a one-way valve to prevent fuel leakage in the event of a vehicle rollover. Space is built in to allow for expansion and contraction.

Vehicle-specific design

Each vehicle type has a uniquely designed Frontier tank to maximise available capacity. The use of polymer provides the flexibility to ensure the largest possible volume is achieved for each vehicle application.

One-piece construction

The Frontier tank is made from a cross-linked polymer, which is between 30% and 60% lighter than its steel equivalent. It is resistant to fire, heat, chemicals and UV, and provides outstanding strength and impact resistance.

Non-rigid mounting system

Steel mounting straps attach to original mounting points within the vehicle chassis, keeping the tank secure, meeting extra load requirements and allowing quick installation.

Designed and tested to go the distance

Designed, tested and manufactured in Australia to go the distance in Australian conditions.

LONG RANGER FUEL & WATER TANKS

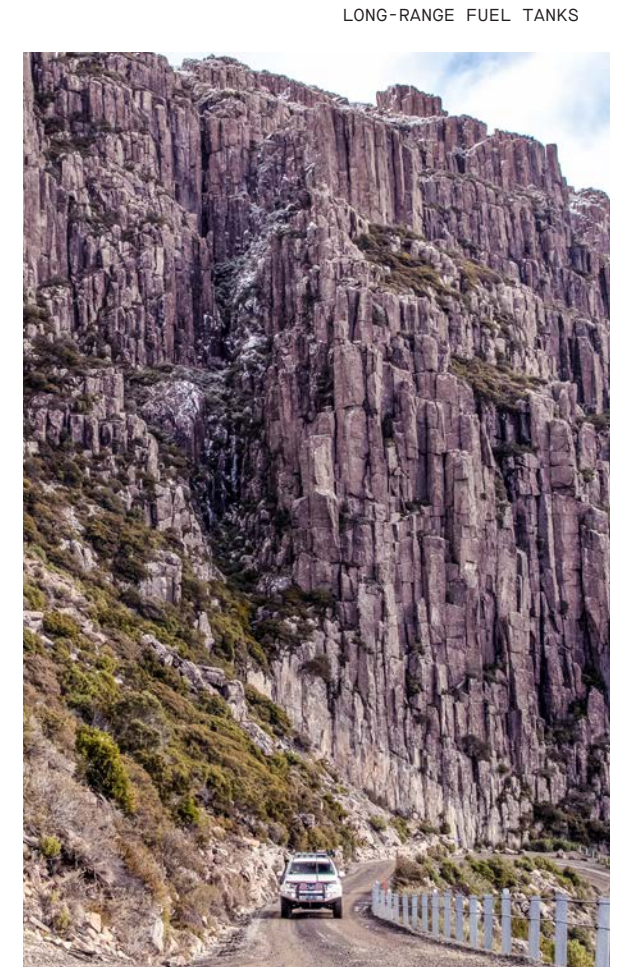

ARB carries the complete range of Long Ranger auxiliary and replacement fuel tanks, enabling you to manage the extra distance required on long trips.

- Specifically engineered for 4WDs
- Designed for maximum ground clearance
- Manufactured from two-millimetre aluminised steel
- Fuel and water combination tanks available
- Easy to install

FUEL AND WATER CONTAINERS

ARB stocks a range of water containers, as well as traditional metal style jerry cans that can store petrol or diesel, with each can designed and tested to be tough, durable and corrosion resistant.

PORTABLE FRONTIER DIESEL TANK

Designed for convenience. Built from a tough, corrosion-resistant, UV-stabilised cross-link polymer. The heavy-duty Frontier Diesel Tank is designed to mount under your utility/flatbed tray in front or behind the rear wheels, maximising the space in your tray and keeping weight close to the rear axles. Featuring a 30-litre carrying capacity, transporting diesel has never been simpler.

IN-CAB ACCESSORIES

LINX

LINX is a compact central information and control hub of your accessories right at your fingertips.

It replaces switches, gauges and monitors with one sleek and smart driver interface that avoids the need to drill holes into your dashboard for additional switches. The Android interface is designed to withstand harsher dashboard temperatures than other devices.

Utilising Bluetooth technology, it communicates with fridges and TPMS to control fridge temperature and monitor vehicle/trailer tyre pressure. Through extensive interface capability, LINX provides front and rear traction control, compressor and pressure control, and air suspension control.

If you know how to use a smartphone, you know how to use LINX.

MODULES

FRONT & REAR TRACTION

This module operates the front and rear Air Lockers quickly and efficiently, automatically sensing driver input and activating the compressor as required. It is capable of switching each locker independently or allowing the front locker to be activated only when the rear locker is engaged first (a traditional safety feature).

COMPRESSOR & PRESSURE CONTROL

This module takes tyre inflation and deflation to the next level. Simply connect the air hose from your vehicle-mounted compressor to the tyre valve and current pressure is displayed on the LINX screen. Inputting a target pressure automatically inflates or deflates to your desired level with the pressure shown in real time on the display.

CLOCK

The clock module shows the time of day in 12- or 24-hour format and can be used as a countdown timer, alarm and stopwatch.

ACCESSORY SWITCHBOARD

Operate any six types of 12-volt accessories at your fingertips with this module. Each accessory can be customised to switch on or off by user input and/or automatically by ignition, high beam headlamps, low beam headlamps or reversing lamps.

BATTERY MONITOR

Battery capacity is always an issue for serious 4WDers. LINX allows you to monitor up to three batteries simultaneously, with the added ability to set low voltage alarms on each. This ensures your beer stays cold and you are never left without enough power to start your vehicle.

SPEEDOMETER

Speedometer inaccuracies are a common occurrence. The LINX Speedometer built-in GPS ensures an accurate reading at all times, even taking into account different tyre sizes. It also shows your altitude and compass bearing and allows for speed limit warnings to be set.

AIR SUSPENSION CONTROL

Many 4WDers install air bag suspension systems to help carry the occasional loads associated with towing boats, camper trailers and caravans. LINX can control up to four air bags allowing for levelling of the vehicle side to side and front to rear. Users can preset up to four pressure modes, such as "daily drive", "caravan", "garden trailer", "boat", all with personalised pressure settings.

INCLINOMETER

The inclinometer module measures and displays your vehicle's incline and angle. Users can set a pitch and roll warning limit to suit their vehicle so an alarm sounds when the set limit is approaching.

FRIDGE CONTROL

Control up to two fridges with the touch of a button and ensure you have the coolest food and drinks on arrival at your destination.

TPMS

Keep track of your tyre pressure from in the cab and have peace of mind when travelling off road.

INTENSITY IQ LIGHTS CONTROL

Allows users to turn the lights on and off, select different presets and customise names for all presets.

*Some modules optional

LINX

GENERAL SETTINGS

Users can customise the colour theme to match any interior dash, apply night mode for automated dimming and set the preferred unit measurements for air pressure, speed and temperature.

Note: ARB is continuing to develop and add new modules, so LINX will evolve your on and off road driving experience long into the future. When updating LINX, simply go into Settings to find new modules.

LINX ACCESSORIES

ARB has a range of components and hardware to help you seamlessly integrate optional accessories and your LINX display in vehicle.

VEHICLE-SPECIFIC MOUNTS

Position the LINX mobile display conveniently and unobtrusively within reach of the driver, providing an unobstructed view of the road.

UNIVERSAL LINX GIMBAL MOUNT

This mount allows the display to be orientated to the desired position and set so that each time the display is returned to the vehicle, it's always in the optimal position.

LINX PRESSURE CONTROL KIT

This kit allows you to take full advantage of LINX's pressure control module. Perfect for the easy and accurate adjustment of tyre pressures or controlling a set of air bags from within or out of the vehicle.

LINX AIR BAG ISOLATION KIT

For use with LINX's air suspension module, this kit provides the ability to independently adjust the pressure and ride height in each air bag. It makes levelling a vehicle from side to side (left to right) a simple on-display adjustment.

RELAY BOX

Extending LINX capability to control power to up to six accessories and greatly simplifies installation.

HEMA

Hema has delivered mapping and navigation excellence to 4WDers and tourers for more than three decades. They produce Australia's most accurate and user-friendly navigation equipment and maps.

4WD NAV

- Combines award-winning Hema EziOzi interface and OziExplorer navigation system
- Hema seamless 1:1 million Australian Touring map
- Australia Topo 250k map
- Hema 4WD & Touring maps
- Hema NZ Road Atlas maps

STREET NAV

- Upgraded to suggest real-time alternatives to avoid congested roads
- Turn-by-turn navigation from iGo Primo
- Two years of free map updates
- Latest NAVTEQ Australia and New Zealand

POINTS OF INTEREST CAMPS & CARAVAN PARKS AUSTRALIA WIDE

Packed with information regarding particular campsites, site images and more than 6,000 camps Australia wide.

MAPS & ACCESSORIES

No one knows maps like Hema. Hema's range of maps and road atlases will allow you to navigate Australia and other regions of the globe with confidence.

GME

GME is the leader in radios designed and engineered to survive harsh off road conditions. The vast range of GME radio equipment and accessories ensures you're always in contact no matter where you are.

Fitted to or under your vehicle's dash or console with minimal fuss, GME's UHF radios come with a host of features to meet individual needs, from signal strength meters and adjustable squelch to program-free storage functions and over-voltage protection. GME's UHF radios are the ones you can trust to provide a reliable communication system, wherever you are.

XRS™ CONNECT

The XRS™ family is a radio platform designed to be smart, adaptable and rugged. Enabled by Bluetooth® Smart technology, XRS™ is the first of a new generation of connected UHF radios with unique features never before seen. With the first ever apps designed for UHF CB radio, the XRS™ range introduces new features including the ability to update the radio firmware and the industry-first Location Services. The XRS™ App range combines easy to navigate menus with the familiar technology of a smart device to control the features and settings of the radio. The new XRS™ Connect professional grade speaker microphone features a powerful two-watt speaker, customisable buttons and a high-contrast OLED screen guaranteeing crystal clear, anti-glare display.

ANTENNAS

Without a quality antenna, your UHF radio's ability to receive and broadcast signals will be severely limited. A GME Antenna will not let you down. Selecting the correct antenna is dependent on a number of variables and ARB can help you choose the right model for your requirements.

UHF HANDHELDS

UHF Handhelds combine the benefits of reliable communication with the freedom to leave your 4WD behind. They come with a desktop charger and AC adaptor or rechargeable batteries, with several additional accessories also available.

SAFETY TIPS OFF ROAD

An off road getaway is always an exciting trip to plan but when staying out in the bush or in the middle of nowhere it is important to have safety top of mind.

- Ensure your vehicle is well equipped and in good working order.
- Pack protective clothing and comfortable walking shoes (a good pair of hiking boots or shoes with lots of support can help prevent sprained ankles on uneven surfaces).
- Pack extra food and water in case you are stranded for a few days.
- Pack a fully stocked first aid kit.
- Participating in a first aid course is a good

- option if you intend to travel to rural areas with limited access to medical facilities.
- Pay attention to any signs and safety warnings in the area.
 - Keep a close eye on weather conditions.
 - Pack a map and compass.
 - Bring your mobile phone in case of an emergency.
 - If you are in a very remote location, take a sat phone with you.
 - COMMUNICATION IS VITAL: Let someone know where you are planning to go, what tracks and when, especially when travelling alone. If you are travelling in a convoy, keep on the radios and if something looks unsafe, let everyone know.
 - Set rules and boundaries for children to try and

- prevent accidents.
- Dehydration can creep up very quickly. Ensure everyone (especially the elderly and children) stay hydrated.
 - Arriving at your campsite in daylight makes it easier to have a good look around for any potential dangers.
 - Pack recovery gear to get your car out of a sticky situation including a shovel, snatch strap, winch extension strap, snatch block, tree trunk protector, gloves and shackles.
 - Walk it first if in doubt, whether it be a hard track or deep water. It always pays to check.

FIRST AID/ EMERGENCY

Be prepared for life's unavoidable accidents and emergencies. ARB provides three different first aid kits to meet your needs.

FAMILY FIRST AID KIT

Fully stocked for the largest families or most remote area trips, the Family First Aid Kit includes an Eye Wound Kit and a Snake and Spider Bite Kit.

PERSONAL FIRST AID KIT

Ideal for smaller trips and individuals, the Personal First Aid Kit provides a comprehensive selection of bandages, gauze pads, dressings and more.

FIRE EXTINGUISHERS

ARB has a range of fire extinguishers in convenient sizes, so they can be easily stored in your vehicle.

SNAKE AND SPIDER BITE KIT

Contains a cold pack, bandages and a comprehensive information booklet to help you easily identify poisonous snakes and spiders.

FIRESTRYKER

A small and lightweight cylinder, the Firestryker will have you prepared for unexpected fire emergencies. The powerful extinguishing charge produces a potassium aerosol jet that lasts 100 seconds (approximately) to combat flames.

REVERSE CAMERAS

ARB has a range of reverse camera systems, offering an extra element of safety to your daily driving routine.

- Multi-View Camera
- 5.6-inch Dash Mount Screen
- Auxiliary Infrared Camera
- Auxiliary Camera
- Trailer Camera Kit
- Reversing Camera and Monitor System

INTERIOR PROTECTION

SEAT COVERS

Heading off road requires durability, reliability and quality. ARB has vehicle-specific interior protection, an easy-to-clean essential for all that life can bring in your car.

Great looking and comfortable with the added bonus of functionality, ARB's seat cover range will give you peace of mind whilst taking on your day-to-day life.

Available in both neoprene and canvas materials, these vehicle-specific covers will fit snug to your seats and protect them from spills and any debris you bring in.

Designed to last, these covers are machine washable and UV protected for everyday wear, whilst also being compatible with the vehicle's seat heating and air bags (ADR compliant) to ensure normal seat functionality.

SUN SHADES

Keep the Australian sun at bay with ARB's range of vehicle-specific Sun Shades. Available for a wide range of different vehicles, every Sun Shade is specifically designed for each model to ensure a neat fit with the windscreen shape within the trim and glass gaps.

The result is fuss-free protection from the sun that does not require any suction caps or straps. Simple to set up and simple to store with an included storage roll bag, the ARB Sun Shade is an essential part of every Aussie summer.

FLOOR MATS

Expertly designed to catch and hold debris, ARB Floor Mats are a waterproof solution that includes secure foot placement and a snug fit to cover all areas of your OE footwells and even utilise the vehicle's retention clips where applicable.

The moulded deep-dish design makes them easy to clean; simply wipe or hose off any debris, dry and then place back in the vehicle ready for the next adventure.

The thermoplastic elastomer material provides an odourless solution that has seamless edging to provide secure grip and protection across all of your typical high-impact carpeted surfaces.

- Vehicle and model specific
- 100% waterproof and simple to clean
- 3D moulded to each vehicle for a perfect fit every time with elevated edges to retain debris
- Made from thermoplastic elastomers that provide all the benefits of rubber without the odour
- Two-stage design for secure foot placement, reduced spillage and complete protection
- Unique surface texture designed and moulded for a secure grip over the entire surface
- Seamless edging to integrate with vehicle's interior
- Compatible with OEM safety retention clips
- Engineered debris channels that disperse debris towards catchment zones
- Includes one driver mat, one passenger mat and one set of rear mats or a full single rear mat depending on vehicle

RECARO

Sit in a RECARO seat and you'll want one for life.

RECARO is the flagship brand of aftermarket seats. They are intelligently designed to keep you supported, relaxed and free from fatigue even after a long day off road.

There are four models and each can be customised to meet individual requirements.

SPECIALIST

The Specialist backrest offers the smallest side bolsters of the RECARO range, giving subtle support to the body, primarily around the waist area.

EXPERT

The Expert seat concentrates support around the ribs. It has been designed with adjustable side bolsters to allow flexibility in the amount of support provided. With up to 60 millimetres of adjustability in the side bolsters, the Expert seat can be adapted to suit differing body shapes and comfort preferences.

SR-C

The SR-C seat features a sportier look, with great support from the shoulders to the hips, making it ideal for long distances and rough terrain touring. Equipped with flat side bolsters on the seat cushion to provide easier access for SUVs or off road vehicles.

ERGOMED

The Ergomed seat concentrates subtle support to the waist area. Can be optioned with a universal side air bag (SAB). Provides the most comfortable ride possible.

BLACK DUCK

There's not a 4WDer around who doesn't face the same problem: dirty seats. The good news is that Black Duck has you (and your seats) covered.

Protects from dirt, grease, grime and liquid.

- Hardwearing
- Waterproof
- Tear resistant
- Australian made
- Air bag compatible
- Options for most 4WDs
- Available in canvas, denim and Black Duck 4Elements fabric

SWITCHES

ARB has a range of vehicle-specific accessory switches and covers.

These plug straight into manufacturers' designated spaces in the vehicle.

THE CLASSICS

Keen to deck out your older 4WD in ARB accessories?

ARB grew up in the 70s, so we know classic cars well as they were a big part of our humble beginnings and are still a big part of the ARB world.

There is a long list of accessories available for a huge range of older 4WDs including bull bars, rails and steps, suspension, Air Lockers and more!

To find out more information and see what is available for your vehicle, head to arb.com.au or pop into your local store and chat to one of our friendly staff.

4X4 CULTURE

SUBSCRIBE

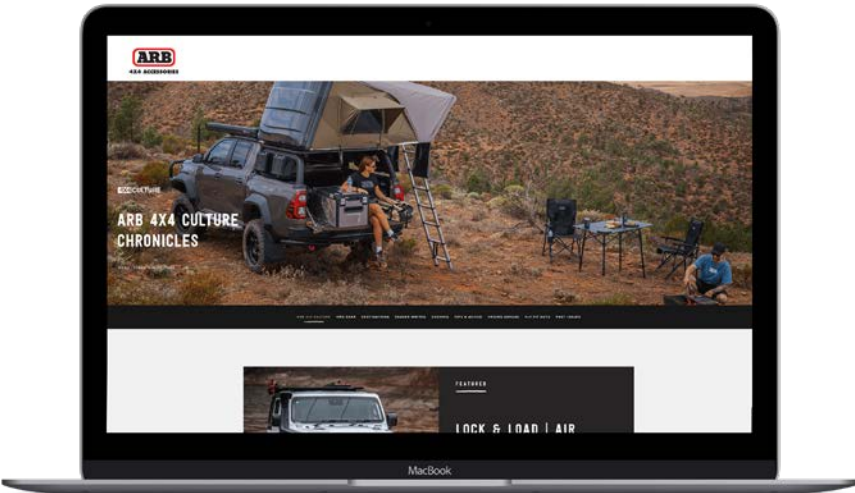

Each year, ARB produces three published 4WDing magazines. Each issue is full of fantastic content around outback and regional adventures and destinations, 4x4 tips and tricks, camping recipes, exciting new product development and much more.

To ensure you receive each issue immediately, along with information on special promotions and new product development, subscribe today by visiting arb.com.au/subscribe.

4X4 CULTURE CHRONICLES

4x4 Culture Chronicles is your one-stop shop for current and past information from 4x4 Culture magazine! Unearth a variety of articles on ARB products, off road travel, off road cooking and 4WD tips. Discover what makes 4x4 Culture Australia's number one FREE off road magazine!

ARB accessorised vehicles shown with optional accessories depicted throughout this publication are for illustration purposes only. Current features and specifications may vary. Not all accessories are available on or compliant for all model variants. Accessories depicted comprise ARB and aftermarket accessories. ARB accessories as fitted to vehicles are covered by the ARB and product-specific warranty. Terms and conditions apply, for full details please visit our Warranties page: arb.com.au

Please check with your local ARB Store or Stockist to confirm pricing, availability, compatibility, specific vehicle applications or for any other queries. Always consider the mass of your load and your selected accessories to ensure your vehicle will not exceed vehicle and accessory load limits. The illustrations used are not an indication or promise that the accessories and/or vehicle shown is compliant in your country, state or location.

All efforts are made to ensure images are accurate representations of the actual product; however, some images are computer-generated renders. Appearance of the actual product may differ due to print quality or other factors and customers are advised to satisfy themselves of the features of the actual ARB accessories.

An aerial view of a group of off-road vehicles, including SUVs and pickup trucks, driving along a winding dirt road in a desert environment. The landscape is characterized by reddish-brown soil, scattered green shrubs, and distant mountains under a clear blue sky. The vehicles are kicking up dust as they travel. The text "ADVENTURE AWAITS" is overlaid in the upper right corner.
